Naturalist's Mexico Roland H. Wauer, 1992 To the nature lover Mexico is a biological paradise possessing the greatest natural diversity in North America With only one fourth the land area of the United States it possesses as many plant species some twenty thousand and many more kinds of animals than its northern neighbor Yet the tourist attractions of Mexico that are known to most visitors are the cities the beaches and the archeological sites Little is available to guide the visitor through Mexico s magnificent outdoors Roland Wauer found long ago that the two ingredients of nature he enjoyed most were the discovery of new birds and the exploration of the remote habitats where they occur Since 1966 he has made annual trips into Mexico to pursue these interests From his adventures he has compiled an indispensable companion for anyone visiting Mexico with an interest in the country s spectacular natural environment He introduces us to all parts of Mexico s outstanding diversity from its arid lowlands and coastal islands to the

forested uplands and humid jungles once home of the ancient Mayans He offers vivid word pictures of tropical forests and the northern deserts Twenty nine color photographs and thirty nine black and white shots provide further reason to explore the flora and fauna that thrive off the beaten path This unique introduction to Mexico s avifauna and the rest of its natural environment is designed to aid either in preparation for a trip or during a trip to Mexico It offers a fascinating invitation to find enjoy and respect the diverse and magnificent world of tropical nature that exists there
