Rarest Of The Rare Vanishing Animals Timeless Worlds:

From The Rarest of the Rare Diane Ackerman, Susan Makov, Green Cat Press, BFK Rives (Firm), 2008 **The Rarest of the Rare** Diane Ackerman, 1997-01-14 Ackerman journeys in search of monarch butterflies and short tailed albatrosses monk seals and golden lion tamarin monkeys the world's rarest creatures and their vanishing habitats She delivers a rapturous celebration of other species that is also a warning to our own Traveling from the Amazon rain forest to a forbidding island off the coast of Japan enduring everything from broken ribs to a beating by an irate seal Ackerman reveals her subjects in all their splendid particularity She shows us how they feed mate and migrate She eavesdrops on their class and courtship dances She pays tribute to the men and women who have devoted their lives to saving them **The Rarest of the Rare** Diane Ackerman, 2011-07-13 The renowned author of *A Natural History of the Senses* takes readers in search of the rarest of the rare species likely to disappear before most of us have ever seen them From Brazil to the Pacific to Japan Ackerman shares her concern at the animals plight rejoices at the chance to experience them and cheers those who work to save these fantastic creatures *Imagining Extinction* Ursula K. Heise, 2016-08-10 We are currently facing the sixth mass extinction of species in the history of life on Earth biologists claim the first one caused by humans Activists filmmakers writers and artists are seeking to bring the crisis to the public's attention through stories and images that use the strategies of elegy tragedy epic and even comedy *Imagining Extinction* is the first book to examine the cultural frameworks shaping these narratives and images Ursula K Heise argues that understanding these stories and symbols is indispensable for any effective advocacy on behalf of endangered species More than that she shows how biodiversity conservation even and especially in its scientific and legal dimensions is shaped by cultural assumptions about what is valuable in nature and what is not These assumptions are hardwired into even seemingly neutral tools such as biodiversity databases and laws for the protection of endangered species Heise shows that the conflicts and convergences of biodiversity conservation with animal welfare advocacy environmental justice and discussions about the Anthropocene open up a new vision of multispecies justice Ultimately *Imagining Extinction* demonstrates that biodiversity endangered species and extinction are not only scientific questions but issues of histories cultures and values **Endangered Species** Jan A. Randall, 2018-01-18 A detailed exploration of the variety of threats that endangered species are facing around the world whether they are due to human impact or so called natural causes *Endangered Species* is a more complex issue and problem than it may seem on the surface What species are endangered and what is causing them to become vulnerable to population decline How can essential industries such as farming housing development and manufacturing continue to thrive without harming flora and fauna that are protected Are current efforts adequate or should more be done to protect endangered species And who should be responsible for the substantial costs of working to save endangered species *Endangered Species A Reference Handbook* begins with an introduction that addresses major threats and extinctions in history discusses the geographical and cultural contexts in which these incidents happened

highlights other key moments along the endangered species timeline and clearly shows why the topic of endangered species matters. The following sections examine an unbiased synthesis of classic and contemporary studies that inform the issue of endangered species and outline the most controversial events related to endangered species and the actions that have been taken to address them. The book also presents perspective essays by scholars, activists, and other experts to provide diverse informed opinions on the issue of endangered species and includes a data and documents chapter that applies research findings to provide answers to questions like what species are most likely to become endangered in the future and which practices have historically been the most effective at protecting vulnerable species.

Reading Programs for Young Adults Martha Seif Simpson, 2015-11-16 School and public libraries often provide programs and activities for children in preschool through the sixth grade but there is little available to young adults. For them, libraries become a place for work, the place to research an assignment or find a book for a report, but the thought of the library as a place for enjoyment is lost. So how do librarians recapture the interest of teenagers? This just might be the answer. Here you will find theme-based units such as Cartoon Cavalcade, Log On at the Library, Go in Style, Cruising the Mall, Space Shots, Teens on TV, and 44 others that are designed for young adults. Each includes a display idea, suggestions for local sponsorship of prizes, a program game to encourage participation, 10 theme-related activities, curriculum tie-in activities, sample questions for use in trivia games or scavenger hunts, ideas for activity sheets, a bibliography of related works, and a list of theme-related films. The units are highly flexible, allowing any public or school library to adapt them to their particular needs.

Gaither's Dictionary of Scientific Quotations Carl C. Gaither, Alma E. Cavazos-Gaither, 2012-01-04 This unprecedented collection of 27,000 quotations is the most comprehensive and carefully researched of its kind, covering all fields of science and mathematics. With this vast compendium, you can readily conceptualize and embrace the written images of scientists, laymen, politicians, novelists, playwrights, and poets about humankind's scientific achievements. Approximately 9,000 high-quality entries have been added to this new edition to provide a rich selection of quotations for the student, the educator, and the scientist who would like to introduce a presentation with a relevant quotation that provides perspective and historical background on his subject. Gaither's Dictionary of Scientific Quotations, Second Edition, provides the finest reference source of science quotations for all audiences. The new edition adds greater depth to the number of quotations in the various thematic arrangements and also provides new thematic categories.

Vulnerable Earth Pramod K. Nayar, 2024-11-21 Shows how the literature of climate crisis foregrounds a feature that humans and nonhumans share differentially with the planet: vulnerability.

Theorizing Animals Nik Taylor, Tania Signal, 2011-04-21 Drawing on current trends in postmodernism and posthumanism, this book

offers a challenge to current ways of thinking, theorising, and talking about animals and human-animal relations.

I Praise My Destroyer Diane Ackerman, 2011-07-27 Diane Ackerman's poems reveal her intense response to the several worlds of nature, science, and society. Her lyricism fuses wit and sobriety, meditation and activism, and she confronts us with figures both real

and fantastic As always her strong connection with the natural world the realms of language and literature myth and imagination combines with her deep understanding of the sciences to offer her readers a singular American voice This is not a voice crying in the wilderness but one that gives forth songs of joy and wonder Organized into seven sections including Timed Talk By Atoms Moved and Tender Mercies I Praise My Destroyer is less an assorted collection than an organically coherent whole one that reveals Ackerman s true calling as a twentieth century metaphysical poet of the highest order

Going on Faith William Zinsser, 2011-02-01 In this deeply felt book nine American writers and thinkers from different points of the religious compass discuss how their work is nourished by spiritual concerns Diana Ackerman explains why she calls herself a messenger of wonder and how in her observations of the natural world there is a form of beholding that is a kind of prayer David Bradley recalls how his inheritance as the son grandson and great grandson of black preachers has enabled him at considerable pain to be touched by the word Frederick Buechner makes an intensely personal journey to his roots as a novelist In fiction as in faith something outside ourselves is breathed into us if we re open enough to inhale it Allen Ginsberg describes how his poetry is grounded in the Buddhist idea of renunciation of hand me down conceptions and the meditative practice of letting go of thoughts Mary Gordon retraces an odyssey in which the religious beliefs and forms of a Catholic girlhood turned out to be as useful as a wiretap to the grown up novelist Patricia Hampl describes how the writing of *Virgin Time* took her on a series of pilgrimages to explore the contemplative life Hillel Levine tells of his search for the mystery of goodness exemplified by a Japanese diplomat in Lithuania who saved thousands of Jews on the eve of World War II Hugh Nissenson explains how his work as a Jewish writer has been animated by a sense of the holy and shaped by the poetry drama and narrative of the King James Bible Jaroslav Pelikan revisits three religious writers Augustine Newman and Boethius whose influence on other religious writers over the centuries has never gone out of fashion Together as William Zinsser notes in his introduction these writers are on a pilgrimage to find the source of their faith as individuals and their strength as artists
