Rational Consumer Theory And Evidence:

The Rational Consumer Robert Ernest Hall, 1990 The Rational Consumer brings together eight articles that represent key points in the development of Robert Hall's ideas on consumption over the past two decades. Since the late 1960s, Robert Hall's research has had a significant impact on the macroeconomic study of consumer behavior. The Rational Consumer brings together eight articles that represent key points in the development of Hall's ideas on consumption over the past two decades. In his introduction, Hall puts this work into perspective, tying together his ideas and pointing to how consumer behavior should work in the future given what he has discovered. Working within the standard intertemporal models of consumption, the overlapping generations model, and the infinite lifetime model, Hall's contributions to methodology have been especially important. Particularly noteworthy was his challenge to the prevalent model in which current consumption was seen as deriving from expected future income. Hall argued that consumption was instead based upon the actual present discounted value of future income.

The Persuasion Industries Steven McKevitt, 2018-08-09 At the end of the twentieth century, Britain was a consumer society. Commerce, intoxicating and addictive, had almost entirely colonized modern life. People were immersed in and ultimately defined by promotional culture. The things they consumed had overtaken class, religion, geography, or occupation as the primary form of self-identity and self-expression. For much of the twentieth century, all forms of brand communication, from political campaigning to product advertising, were based on the theory of rational appeals to rational consumers. There was only one problem with this theory: it was wrong. The Persuasion Industries: The Making of Modern Britain examines developments in marketing, advertising, public relations, and branding. It explores the role they played in the emergence of the consumer society. New ideas from fields of behavioural psychology and economics, together with internal developments such as planning, positioning, and corporate branding, allowed persuasion to become the driving force within many commercial enterprises. Together, these changes led to the emergence of an alternative, emotional model of brand communication. A simple idea that proved so compelling, it changed the world we live in.

Consumer Theories of Harm Paolo Siciliani, Christine Riefa, Harriet Gamper, 2019-09-19 It has long been thought that fairness in European Consumer Law would be achieved by relying on information as a remedy and expecting the average consumer to keep businesses in check by voting with their feet. This monograph argues that the way consumer law operates today promises a

lot but does not deliver enough It struggles to avoid harm being caused to consumers and it struggles to repair the harm after the event To achieve fairness solutions need to be found elsewhere Consumer Theories of Harm offers an alternative model to assess where and how consumer detriment may occur and solutions to prevent it It shows that a more confident use of economic theory will allow practitioners to demonstrate how a poor standard of professional diligence lies at the heart of consumer harm The book provides both theoretical and practical examples of how to combine existing law with economic theory to improve case outcomes The book shows how public enforcers can move beyond the dominant transparency paradigm to an approach where firms have a positive duty to treat consumers fairly and shape their commercial offers in a way that prevents consumers from making mistakes Over time this fairness by design approach will emerge as the only acceptable way to compete

Consumer Casualties J. Wan,2014-11-06 Junmin Wan takes a two prong approach to analysing this pressure in Japan in his new volume Consumer Casualties He first clarifies the consumer preference for habit to identify useful approaches toward solving a number of economic issues such as gambling and other addictive practices

Contemporary Scientific Realism Timothy D. Lyons,Peter Vickers,2021-06-08 Scientific realists claim we can justifiably believe that science is getting at the truth However they have faced historical challenges various episodes across history appear to demonstrate that even strongly supported scientific theories can be overturned and left behind In response realists have developed new positions and arguments As a result of specific challenges from the history of science and realist responses we find ourselves with an ever increasing dataset bearing on the possible relationship between science and truth The present volume introduces new historical cases impacting the debate and advances the discussion of cases that have only very recently been introduced At the same time shifts in philosophical positions affect the very kind of case study that is relevant Thus the historical work must proceed hand in hand with philosophical analysis of the different positions and arguments in play It is with this in mind that the volume is divided into two sections entitled Historical Cases for the Debate and Contemporary Scientific Realism All sides agree that historical cases are informative with regard to how or whether science connects with truth Defying proclamations as early as the 1980s announcing the death knell of the scientific realism debate here is that rare thing a philosophical debate making steady and definite progress Moreover the progress it is making concerns one of humanity s most profound and important questions the relationship between science and truth or put more boldly the epistemic relation between humankind and the reality in which we find ourselves

Influence of Marketing on Tobacco Consumption Behavior in Rural and Urban Areas of the Southwestern Region of Nigeria Oluwole O. Iyiola, 2008-10-02 The tobacco industry has always shown much interest in marketing their line of products and have been very successful in portraying smoking as a socially acceptable behavior to billions of people throughout the world Studies have shown in developed nations that tobacco marketing leads to the onset of smoking among adolescents in Nigeria no such study has been done The purpose of this research is to assess the potential influence of tobacco marketing on tobacco consumption among rural and urban residents in the southwestern region of Nigeria The survey was designed by the researcher thirty six items self administered by paper instrument using a cross sectional design were distributed to six hundred people in southwestern Nigeria The study involved 436 males 72 7% and 164 females 27 3% Of these 336 came from rural areas and 264 came from urban areas respectively Some 337 respondents 56 2% indicated that they were influenced by tobacco marketing to smoke while 263 43 8% indicated that they were not influenced The chi square statistic was used to test the null hypotheses The result shows a positive significant relationship that supports the notion that tobacco marketing has a positive influence on tobacco consumption in the study areas This study also revealed that more males in the urban area are being influenced by tobacco marketing to smoke

The Limits of Rationality Karen Schweers Cook, Margaret Levi, 2008-10-03 Prevailing economic theory presumes that agents act rationally when they make decisions striving to maximize the efficient use of their resources Psychology has repeatedly challenged the rational choice paradigm with persuasive evidence that people do not always make the optimal choice Yet the paradigm has proven so successful a predictor that its use continues to flourish fueled by debate across the social sciences over why it works so well Intended to introduce novices to rational choice theory this accessible interdisciplinary book collects writings by leading researchers The Limits of Rationality illuminates the rational choice paradigm of social and political behavior itself identifies its limitations clarifies the nature of current controversies and offers suggestions for improving current models In the first section of the

book contributors consider the theoretical foundations of rational choice Models of rational choice play an important role in providing a standard of human action and the bases for constitutional design but do they also succeed as explanatory models of behavior Do empirical failures of these explanatory models constitute a telling condemnation of rational choice theory or do they open new avenues of investigation and theorizing Emphasizing analyses of norms and institutions the second and third sections of the book investigate areas in which rational choice theory might be extended in order to provide better models The contributors evaluate the adequacy of analyses based on neoclassical economics the potential contributions of game theory and cognitive science and the consequences for the basic framework when unequal bargaining power and hierarchy are introduced

Seduction by Contract Oren Bar-Gill, 2012-08-23 Seduction by Contract explains how consumer contracts emerge from market forces and consumer psychology Consumers predictable mistakes they are short sighted optimistic and imperfectly rational compel sellers to compete by hiding the true costs of products in complex misleading contracts Only better law can overcome the market's failure

Think Consumer Jamil Ammar, 2011-01-18 The availability of a wide range of branded products makes the selection of the right type of goods a difficult process This is particularly true in the case of goods whose characteristics consumers do not have complete information about which they can only learn about after purchasing experiencing goods A trade mark quality guarantee facilitates consumers choice by sending quality signals It also enables a trader of branded goods to differentiate the quality of his goods from those of his competitors Accordingly trade mark protection is said to enhance economic efficiency and thus the production of quality goods and reduce consumer search costs In order for this to work however among other conditions the trader must maintain consistent quality over time and across consumers Otherwise trade mark protection will enhance

artificial product differentiation and thus distort competition To date despite its profound significance the quality guarantee is seen as performing an economic function that trade mark law is ill equipped to deal with As a result this function is not enforced under trade mark law Contrary to mainstream thinking this book argues that the quality function of a trade mark should be recognised and enforced through trade mark law What is at stake is far from insignificant it is about bridging the ever increasing gap between the legal rationales for trade mark protection and the economic consequences of this protection in practice The book is also about how consumers should shape their relationship with trade marks and what role law should play in constructing that relationship By giving independent legal substance to the quality function trade mark law encourages a trader to improve the quality of his goods instead of simply improving the persuasive or advertising value of the mark which in turn enhances artificial product differentiation increases rather than decreases consumer search costs and distorts competition
