Among culturally and linguistically diverse groups in the United States the Latino population is the largest and fastest growing. Thus to prepare for the growing numbers of Latino children and to make the most of their education educators, researchers and policymakers must recognize and build on the invaluable resource represented by Latino students. The information provided is based on current research and practice in the field. Our school system continues to underestimate the cognitive and socioemotional potential of Latino students by its limited awareness and representation of the Latino cultural characteristics, social dynamics, interests and abilities, bilingualism as well as confronting socioeconomic challenges and educational needs. This situation clearly demonstrates a need for a reformulation of educational practice at all grade levels and for the provision of accurate information to assist practitioners and researchers in their knowledge and practice.

Kamil, Peter B. Mosenthal, P. David Pearson, 2016-11-18. A comprehensive overview of important contemporary issues in the field of reading research from the mid 1980s to mid 1990s, this well received volume offers readers an examination of literacy through a variety of lenses, some permitting microscopic views and others panoramic views. A veritable who's who of specialists in the field, chapter authors cover current methodology as well as cumulative research-based knowledge. Because it deals with society and literacy, the first section provides the broadest possible view of literacy. The second section defines the range of activities culturally determined to be a part of the enterprise known as literacy. The third focuses on the processes that individuals engage in when they perform the act of reading. The fourth section visits the environment in which the knowledge that comprises literacy is passed on from one generation to the next. The last section, an epilogue to the whole enterprise of reading research, provides apt philosophical reflection.      Research in Education, 1973-12      *Discourse as Structure and Process* Professor Teun A. van Dijk, 1997-02-11. Comprehensive and accessible, the volume covers a huge variety of discourse genres including written and spoken and storytelling and argumentation. The chapters also illustrate the necessity to examine the mental processes of the language users. *Scientific Realism in Studies of Reading* Alan D. Flurkey, Eric J. Paulson, Kenneth S. Goodman, 2020-08-13 This book provides research based insights that deepen and broaden current understandings of the nature of reading. Informed by psycholinguistic and sociolinguistic views of reading as meaning construction, the studies build on principles of scientific realism, an approach to inquiry that incorporates and values a wide variety of methods of observation to find the most inclusive, ecologically valid description of the reading process as it is observed in a variety of contexts from a wide range of perspectives. Focusing on how facts are discovered, developed, and used in the construction of knowledge about reading, a data-driven and theory-driven construction that results from observing the reading process with a variety of tools, methods, disciplines, and conceptual frameworks, scientific realism goes beyond rationalism and experimentation to include studies of events and experiences but still satisfies even the most narrow definitions of what state and national lawmakers refer to as reliable and replicable research on reading. Each study in this volume breaks ground for a new line of reading research underpinned by the theory of reading based in scientific realism. *Scientific Realism in Studies of Reading* is directed to reading researchers, teacher educators, reading specialists, special educators, graduate students, and related education professionals in the disciplines of applied psycholinguistics and sociolinguistics and is appropriate as a text for advanced courses in these areas.
