## **Readings In Curriculum Evaluation:**

Readings in Curriculum Evaluation Peter A. Taylor, Doris M. Cowley, 1972      SAGE Directions in Educational Psychology  
Neil J. Salkind, 2010-10-31 Educational psychology is a broad field characterized by the study of individuals in educational settings and how they develop and learn. It incorporates information from such sub-disciplines such as developmental psychology, human development across the life span, curriculum and instruction, motivation and measurement, and assessment. Neil Salkind has mined the rich and extensive backlist of SAGE education and psychology journals to pull together a collection of almost 100 articles to be the definitive research resource on education psychology. Section One: Human Growth and Development focuses on the processes involved in human growth and development, including ages and stages of development, different theoretical perspectives, and the role and effectiveness of early intervention among other topics. Section Two: Cognition, Learning, and Instruction concentrates on the mechanisms through which individuals learn and retain information. Section Three: Motivation explores why individuals seek out goals and what the mechanisms are that characterize this search as it relates to learning. Section Four: Measurement, Assessment, and Statistics looks at the topics that are critical to understanding individual differences, the growth in the use of computers as assessment tools, qualitative and quantitative methods, statistical techniques, and evaluation.

**Practitioner's Guide to Curriculum-Based Evaluation in Reading**  
Jason E. Harlacher, Tami L. Sakellaris, Nicole M. Kattelman, 2013-12-11 The educators are dedicated and concerned. The curriculum is successful. Yet some students aren't reading at grade level and meetings air problems without making progress. Many students continue to flounder, leading to more meetings with the same lack of meaningful results. The Practitioner's Guide to Curriculum-Based Evaluation in Reading gives researchers and professionals the means to break this frustrating cycle crafted by authors who have not only been there and done that but can explain in depth how to replicate the method. Focusing on reading but applicable across subject areas, this highly accessible guide defines curriculum-based evaluation. CBE provides conceptual background and analyzes its component steps. Assessment and intervention are given equal attention within a problem-solving model featuring tools for skill assessment, progress monitoring, goal setting, and other bedrock tasks. Chapters build to lead readers beyond classroom strategies to guidelines for problem-solving and decision-making to effectively address individual student needs. Included in the coverage: The curriculum-based evaluation process; Relating CBE to the Multi-Tier System of Support model; Using CBE in daily practice, both in classwork and schoolwide; Decoding early literacy and reading comprehension; Progress monitoring and decision-making; Plus FAQs, handouts, and other supplemental materials. This level of educational insight and pedagogical detail make the Practitioner's Guide to Curriculum-Based Evaluation in Reading a clarion call for researchers, graduate students, and professionals in school and clinical child psychology, assessment, testing, and evaluation, applied linguistics, language education, special education, and allied education, educational psychology, and social work.
