Howard Patterson ... and Karl W. H. Scholz ...** Samuel Howard Patterson,1927 **Economics, Volume 2: Modern Economic Problems** Frank A. Fetter,2020 Professor Fetter s *Economic Principles* is the second half of a two volume treatise on economics The first half *Economic Principles* deals with the basics The author of this volume is one of the great American economists His contributions to economic literature have been notable and while it would of course be too much to say that they have won universal acceptance it can safely be affirmed that they have quite generally been accorded respectful and sympathetic attention Professor Fetter occupies a place of distinction not only as a thinker and writer in the field of economics but also as a university teacher Several years ago he served also as President of the American Economic Association Few are better qualified therefore to prepare a general treatise on economics This volume constitutes the second part of a work dealing with the principles of economics which in some respects may be regarded as a revision of Professor Fetter s *Principles of Economics* published as a single volume But the treatment of the principles of value and distribution in volume I of the new work differs materially if not radically from that in the earlier text and at the same time as Professor Fetter himself remarks the years since have been so replete with interesting happenings in the field of practical problems that volume II represents more than a mere revision of the corresponding chapters in the earlier book Hence the present volumes taken together must be regarded as an essentially new contribution Considering the variety of economic problems that Professor Fetter discusses it seems extraordinary that he has been able to compress his treatment within the limits of a comparatively small book His success in this direction however has been due to his method of treatment While

essential facts have not been neglected he has not attempted to give an encyclopedic description of all the elements involved in the several problems but he has confined himself rather to a setting forth of the points of principle involved in them suggesting in this connection the solutions which sound analysis and a healthy for as a writer it will appear superfluous to speak of style But for those who may not know let it be said that Professor Fetter writes with a nicety and clearness of expression and with a delicacy of touch and of humor that stamp him as a writer of the first class

Privatization and Foreign Investments in Nigeria Lawrence Okechukwu Azubuike, 2009 Nigeria's political economy has straddled the ideological divide between socialism and capitalism The country produces oil and at some point in its existence it embarked on robust state involvement in the economy This was marked by the acquisition or establishment of numerous state enterprises Over the years the performance of these enterprises was found to be dismal and as part of the overall reform of the economy Nigeria has joined the global trend toward reduction in direct state ownership of enterprises Indeed it has embarked on massive divestment of state interests in once publicly owned firms Besides the universal rationale of efficiency one of the objectives of the privatization exercise in Nigeria is the attraction and retention of foreign investments This work examines the direct and indirect linkage between the government's divestiture of its interests in firms on the one hand and foreign investments in the country on the other hand The book is divided into seven chapters Chapter 1 reviews the political and economic history of Nigeria to set the background and context that necessitated the introduction of the reform package of which privatization is just an aspect Chapter 2 is a discussion of various natures of state involvement in an economy This ranges from mere regulation to active participation The chapter discusses the competing conceptual and ideological theories and tries to situate the Nigerian experience within the broader conceptual dichotomies of capitalism socialism and the via media of mixed economy Chapter 3 is an examination of the meaning and rationales for privatization of state owned enterprises generally and the Nigerian attempts in particular Nigeria's privatization program is an ongoing exercise Yet two distinct attempts are identifiable one which started in 1988 and the reinvigoration of the exercise albeit with

new constitutive frameworks in 1999 Thus Chapters 4 and 5 review the legal and institutional frameworks for these two exercises Chapter 6 deals with foreign investments in Nigeria The discussion encapsulates the pros and cons of foreign investments especially in Nigeria Chapter 7 explores the direct and indirect linkages between the privatization program in Nigeria and foreign investments in the country This is particularly apposite because one of the touted objectives of the privatization exercise is the attraction of foreign investments A conclusion follows The work finds that although foreign investments appear to have been indirectly boosted by the privatization exercise foreign investors initially did not show interest in direct acquisition of the shares and other interests being relinquished by the government but that that attitude has been changing gradually
