Roberts, 2011-10-26 In this brief text two leaders of the Teaching Sociology movement encourage students development of their sociological imaginations through role taking Assuming the role of a child living in poverty in India or of a member of an African tribe students learn to re envision their global society An

Lofland, 2017-07-12 This book is about the public realm defined as a particular kind of social territory that is found almost exclusively in large settlements This particular form of social psychological space comes into being whenever a piece of actual physical space is dominated by relationships between and among persons who are strangers to one another as often occurs in urban bars buses plazas parks coffee houses streets and so forth More specifically the book is about the social life that occurs in such social psychological spaces the normative patterns and principles that shape it the relationships that characterize it the aesthetic and interactional pleasures that enliven it and the forces anti urbanism privatism post war planning and architecture that threaten it The data upon which the book's analysis is based are diverse direct observation interviews contemporary photographs historic etchings prints and photographs and historical maps histories of specific urban public spaces or spatial types and the relevant scholarly literature from sociology environmental psychology geography history anthropology and architecture and urban planning and design Its central argument is that while the existing body of accomplished work in the social sciences can be reinterpreted to make it relevant to an understanding of the public realm this quintessential feature of city life deserves much more than it deserves to be the object of direct scholarly interest in its own right Choice noted that The author's writing style is unusually accessible and the often fascinating narrative is generously supported by well chosen photos **Institutions in Modern Society** Jeffrey E. Knowledgeable Women Sara Delamont, 2002-06-01 In *Knowledgeable Women* Sara Delamont traces the history of women's education and the elites it produces She examines class and gender divisions in the structure and contest of education in Britain and the USA from 1850 to the present day Her empirical focus is of course elites especially elite women but the justification for this is the belief that sociologists should study the powerful as well as the poor and powerless Above all Delamont argues the case for the relevance to sociology of a serious study of women their schooling and professional training and their struggle to enter the professions She also encourages a broader focus to the sociology of education itself viewing her subject from an anthropological structuralist perspective and encouraging the inclusion of anti sexist ideas and material from other areas of sociology such as the study of science and stratification She demonstrates for the first time the relevance to education of structuralist theorists such as Mary Douglas *Knowledgeable Women* is a structuralist and feminist challenge to the sociology of education by an author highly regarded in Britain and the USA It offers a non sexist structuralist fully sociological sociology of education **Annual Catalogue of the University of Kansas** University of Kansas, 1975

Ackerley, 2015-10-23 Many twenty first century evangelical charismatics in Britain are looking for a faith that works They want to experience the miraculous in terms of healings and God sent financial provision Many have left the mainstream churches to join independent charismatic churches led by those who are perceived to have special insights into faith and to teach principles that will help believers experience the miraculous But all is not rosy in this promised paradise and when people are not healed or they remain poor they are often told that it is because they did not have enough faith or are too negative This study seeks to discover the origin of the principles that are taught by some charismatic leaders Ackerley identifies them as the same ideas that are taught by the positive confession health wealth and prosperity movement originating in the United States The origins of the ideas are traced back to New Thought metaphysics and its background philosophies of subjective idealism and American pragmatism These principles were imported into the UK through contact between British leaders and those influenced and trained by American word of faith teachers The author seeks to explain the persuasiveness of such teachers through examining case studies He suggests their miracles may well have social and psychological explanations rather than divine origins **Social Prisms** Jodi A.
