urban studies **Urban Theory and the Urban Experience** Simon Parker, 2015-04-24 Urban Theory and the Urban Experience brings together classic and contemporary approaches to urban research in order to reveal the intellectual origins of urban studies and the often unacknowledged debt that empirical and theoretical perspectives on the city owe one another. From the foundations of modern urban theory in the work of Weber, Simmel, Benjamin and Lefebvre to the writings of contemporary urban theorists such as David Harvey and Manuel Castells and the Los Angeles school of urbanism, Urban Theory and the Urban Experience traces the key developments in the idea of the city over more than a century. Individual chapters explore investigative studies of the great metropolis from Charles Booth to the contemporary urban research of William J. Wilson, along with alternative approaches to the industrial city ranging from the Garden City Movement to the new urbanism. The volume also considers the impact of new information and communication technologies and the growing trend towards disaggregated urban networks, all of which raise important questions about viability and physical and social identity of the conventional townscape. Urban Theory and the Urban Experience concludes with a rallying cry for a more holistic and integrated approach to the urban question in theory and in practice. For the benefit of students and tutors, frequent question points encourage exploration of key themes and annotated further readings provide follow-up sources for the issues raised in each chapter. The book will be of interest to students, scholars, practitioners and all those who wish to learn more about why the urban has become the dominant social, economic and cultural form of the twenty-first century.

Wassenhoven, 2022-03-28 The purpose of the book is to elaborate a planning theory which departs from the plethora of theories which reflect the conditions of developed countries of the North West. The empirical material of this effort is derived from a country, Greece, which sits on the edge between North West and South East at the corner of Europe. No doubt there is extensive international literature on planning theory in general from a bewildering variety of viewpoints. The interested professional or student of urban and regional planning is certainly aware of the dizzying flood of books.

articles and research reports on planning theory and of their never ending borrowing of obscure concepts from more respectable scientific disciplines from mathematics to philosophy and from physics to economics human geography and sociology He or she probably observed that there is a growing interest in theoretical approaches from the viewpoint of the so called Global South The author of the present book has for many decades faced the impasse of attempting to transplant theories founded on the experience of the North West to countries with a totally different historical political social and geographical background He learned that the reality that planners face is unpredictable patchy and responsive to social processes frequently of a very pedestrian nature Planning strives to deal with private interests which planners are keen to envelop in a single public interest which is extremely hard to define The behaviour of the average citizen far from being that of the neoclassical model of the homo economicus is that of an individual a kind of homo individualis who interacts with the state and the public administration within a complex web of mutual dependence and negotiation The state and its administrative apparatus i e the key determinants and fixers of urban and regional planning policy bargain with this individual offer inducements exemptions derogations and privileges deviate unhesitatingly from their grand policy pronouncements but still defend the rationality and comprehensiveness of the planning system they have legislated and operationalized It is by and large a successful modus vivendi but only thanks to a constant practice of compromise Hence the term compromise planning which the author coined as an alternative to all the existing theoretical forms of planning This is the sort of planning and of the accompanying theory with which he deals in this book It is the outcome of experience and knowledge accumulated in a long personal journey of academic teaching in England and Greece research and professional involvement
