Real Guide:

Hilbert's Program Michael Detlefsen, 1986-04-30 Hilbert's Program was founded on a concern for the phenomenon of paradox in mathematics. To Hilbert, the paradoxes which are at once both absurd and irresistible revealed a deep philosophical truth, namely that there is a discrepancy between the laws according to which the mind of homo mathematicus works and the laws governing objective mathematical fact. Mathematical epistemology is therefore to be seen as a struggle between a mind that naturally works in one way and a reality that works in another. Knowledge occurs when the two cooperate. Conceived in this way, there are two basic alternatives for mathematical epistemology: a skeptical position which maintains either that mind and reality seldom or never come to agreement or that we have no very reliable way of telling when they do; and a non-skeptical position which holds that there is significant agreement between mind and reality and that their potential discrepancies can be detected, avoided, and thus kept in check. Of these two, Hilbert clearly embraced the latter and proposed a program designed to vindicate the epistemological riches represented by our natural (if non-literal) ways of thinking. Brouwer, on the other hand, opted for a position closer in Hilbert's opinion to that of the skeptic. Having decided that epistemological purity could come only through sacrifice, he turned his back on his classical heritage to accept a higher calling.

Multistate Guide to Sales and Use Tax Daniel Davis, 2008-09 Multistate Guide to Sales and Use Taxation Construction provides guidance to construction contractors for dealing with the difficult sales and use tax issues inherent in their businesses, particularly if they operate in several states. In addition to the usual problems in complying with different bodies of law, administering a hodgepodge of state and local tax rates and dealing with a variety of tax agency audit programs, the contract process and insufficient recordkeeping further complicate an already complicated task.
