the true definition of sustainability is a debating point in itself can such a concept exist with respect to non renewable resources Perhaps the ideal sustainability model is one that minimizes negative environmental impact and maximizes benefits to society the economy and regional national development Developed and near developed economies rely for commodity supplies on developing countries where major mining operations are often a mainstay of the domestic economy Limited environmental regulation and low wages lead to charges of exploitation Also large numbers of people have no alternative to living by informal often dangerous artisanal mining This Special Publication gives examples from developing countries from all scales of mineral extraction The volume reviews environmental economic health and social problems and highlights the need to solve these before sustainability can be achieved The better solutions require mutual understanding through full involvement of all stakeholders education training and investment so that small scale and artisanal mines can grow into well managed operations At larger scales most major international mining companies have now improved their practices and are monitoring their progress although there is no room for complacency in this rapidly changing area
