Archaeology of Logic Andrew Schumann,2023-04-27 The question arises whether logic was given to us by God or whether it is the result of human evolution I believe that at least the modus ponens

rule A and if A then B implies B is inherent in humans but probably many other modern systems e.g. resource logic, non-monotonic logic etc. are the result of humans adapting to the environment. It is therefore of interest to study and compare the way logic is used in ancient cultures as well as the way logic is going to be used in our 21st century. This welcome book studies and compares the way formation of logic in three cultures: Ancient Greek 4th century B.C., Judaic 1st century B.C., 1st century A.D. and Indo-Buddhist 2nd century A.D. The book notes that logic became especially popular during the period of late antiquity in countries covered by the international trade of the Silk Road. This study makes a valuable contribution to the history of logic and to the very understanding of the origins and nature of logical thinking. Prof. Dov Gabbay, King's College London, UK. Andrew Schumann in his book demonstrates that logic step by step arose in different places and cultural circles. He argues that if we apply a structural genealogical method as well as turn to various sources, particularly religious, philosophical, linguistic etc., then we can obtain a more general and more adequate picture of emergence and development of logic. This book is a new and very valuable contribution to the history of logic as a manifestation of the human mind. Prof. Jan Wolenski, Jagiellonian University, Poland. The author of the *Archaeology of Logic* defends the claim calling it logic is after all which sees logical competence as a practical skill that people began to learn in antiquity as soon as they realized that avoiding cognitive biases in their reasoning would make their daily activities more successful. The in-depth reading of the book with its diving into the comparative quotations in the long dead or hardly known to most of us languages like Sumerian, Akkadian, Aramaic, Hebrew and etc. will be rewarded by the response that the logical competence is diverse and it can be trained despite the inevitability of the reasoning fallacies and that critical discussions and agonial character of the social life are the necessary tools for that. Prof. Elena Lisanyuk, *German and English*. Joseph Leonhard Hilpert, 1846. Horse Riding. Sara Louise Kras, 2013-08-01. People have been riding horses for centuries. Horses were ridden for travel, for hunting and on the battlefield. Today riding is a favorite activity for many people. It is one of the best ways to enjoy nature and get exercise at the same time. Your readers will explore this fun pastime, discovering its styles, history and how to get started. *The encyclopædic dictionary*, Robert Hunter, 1903.
