**Historical Practices in Horsemanship and Equestrian Sports** Timothy Dawson, Anastasija Ropa, 2022-11-01 New things are forgotten old things this rediscovery of the past is especially important in horsemanship and equestrian sports Despite advances in sciences and technology the physiologies and psychologies of the two principal agents the equid and the human have undergone relatively few changes since horse domestication The studies collected in this volume outline such essential and recurring challenges in equestrianism as gender issues equine identification the use of hyperflexion and groundwork in training as well as many others from prehistory to this day *Riding High* Sandra Swart, 2010-01-01 An examination of the role of horses in the colonial economies of South Africa Horses were key to the colonial economies of southern Africa buttressing the socio political order and inspiring contemporary imaginations Just as they had done in Europe Asia the Americas and North Africa these equine colonizers not only provided power and transportation to settlers and later indigenous peoples but also helped transform their new biophysical and social environments The horses introduced to the southern tip of Africa were not only agents but subjects of enduring changes This book explores the introduction of these horses under VOC rule in the mid seventeenth century their dissemination into the interior their acquisition by indigenous groups and their ever shifting roles In undergoing their relocation to the Cape the horse of the Dutch empire in southeast Asia experienced a physical transformation over time Establishing an early breeding stock was fraught with difficulty and horses remained vulnerable in the new and dangerous environment They had to be nurtured into defending their owners ambitions first those of the white settlement and then African and other hybrid social groupings The book traces the way horses were adapted by shifting human needs in the nineteenth century It focuses on their experiences in the South African War on the cusp of the twentieth century and highlights how horses remained integral to civic functioning on various levels replaced with mechanization only after lively debate The book thus reinserts the horse into the broader historical narrative The socio economic and political ramifications of their introduction is delineated The

idea of ecological imperialism is tested in order to draw southern African environmental history into a wider global dialogue on socio environmental historiographical issues The focus is also on the symbolic dimension that led horses to be both feared and desired Even the sensory dimensions of this species interaction with human societies is explored Finally the book speculates about what a new kind of history that takes animals seriously might offer us      **The Science of Equestrian**
