President's Committee on Mental Retardation, 1973 **Children Today** ,1973 *Revisiting "The Culture of the School and the Problem of Change"* Seymour B. Sarason, 1996 Revisiting The Culture of the School and the Problem of Change provocatively and seamlessly joins Seymour Sarason s classic landmark text on school change with his own insightful reflections on those same issues in the face of today s crisis in public schools This is an

extensive monograph length revisiting Part I of this book reproduces the second edition of Sarason's ground breaking work *The Culture of the School and the Problem of Change* in which he detailed how change can affect a school's culturally diverse environment either through the implementation of new programs or as a result of federally imposed regulations. Throughout many of the major assumptions about change in institutions are challenged. Specific events and examples demonstrate that any attempt to implement change involves some existing regularity within the school. Dr. Sarason also takes a close look at government involvement in change efforts in schooling and includes a detailed examination of current efforts to implement PL 94-142 into public schools. He presents compelling evidence that the federal effort to change and improve schools has largely been a failure. Also included are investigations into the purposes of schooling and how these purposes can be affected by change and the process by which educators and administrators formulate intended outcomes of change efforts. In Part II Dr. Sarason revisits the text and the issues 25 years after the original publication. As he explains in his preface to him the word crisis means a point in time when a dangerous situation contains conflicting forces of an intensity or seriousness that in the near term will be dramatically altered depending on which forces win out. When I wrote the book a quarter century ago I did not regard our schools as in crisis though my intuition was that a crisis would come sooner or later. It has in my opinion come. Believing that what happens in our cities and our schools will determine the fate of our society Dr. Sarason is deeply concerned that the reform arena is being manipulated by forces that are at best untroubled by and at worst intent on the dismantling of the public school system. That coupled with his fear that even the system's defenders are not focusing on the real issues has infused Dr. Sarason's return to the topic of educational change with a great sense of urgency. The important things he has to say will be welcomed by all who truly care about the state of the public schools that America's children attend.

In a Different Key John Donvan, Caren Zucker, 2016-01-19 PULITZER PRIZE FINALIST NEW YORK TIMES BESTSELLER Sweeping in scope but with intimate personal stories this is a deeply moving book about the history, science and human drama of autism. Walter Isaacson, 1 New York Times bestselling author of *The Code Breaker* Remarkable. A riveting tale about how a seemingly rare childhood disorder became a salient fixture in our cultural landscape. *The Wall Street Journal* Ten Best Nonfiction Books of the Year. The inspiration for the PBS documentary *In a Different Key*. In 1938 Donald Triplett of Forest, Mississippi became the first child diagnosed with autism. Beginning with his family's odyssey *In a Different Key* tells the extraordinary story of this often misunderstood condition from the civil rights battles waged by the families of those who have it to the fierce debates among scientists over how to define and treat it. Unfolding over decades *In a Different Key* is a beautifully rendered history of people determined to secure a place in the world for those with autism by liberating children from dank institutions, campaigning for their right to go to school, challenging expert opinion on what it means to have autism and persuading society to accept those

who are different This is also a story of fierce controversies from the question of whether there is truly an autism epidemic and whether vaccines played a part in it to scandals involving facilitated communication one of many unsuccessful treatments to stark disagreements about whether scientists should pursue a cure for autism to compelling evidence that Hans Asperger discoverer of the syndrome named after him participated in the Nazi program that consigned disabled children to death By turns intimate and panoramic In a Different Key takes us on a journey from an era when families were shamed and children were condemned to institutions to one in which a cadre of people with autism push not simply for inclusion but for a new understanding of autism as difference rather than disability *Comparing Special Education* John G. Richardson, Justin J.W. Powell, 2011-05-17 In today's schools the number of students who receive additional resources to access the curriculum is growing rapidly and the ongoing expansion of special education is among the most significant worldwide educational developments of the past century Yet even among developed democracies the range of access varies hugely from one student in twenty to one student in three In contemporary conflicts about educational standards and accountability special education plays a key role as it draws the boundaries between exclusion and inclusion *Comparing Special Education* unites in depth comparative and historical studies with analyses of global trends with a particular focus on special and inclusive education in the United States England France and Germany The authors examine the causes and consequences of various institutional and organizational developments illustrate differences in forms of educational governance and social policy priorities and highlight the evolution of social logics from segregation of students with special educational needs to their inclusion in local schools What Does Due Process Do?
