Rio Report Reshaping The International Order A Report To The Club Of Rome Coordinator:

From Malthus to the Club of Rome and Back Paul Neurath, 2017-07-05 This collection of articles on population growth spans 20 years of the author's thinking and research on a wide range of issues. The book opens with a presentation of the early history of demography before Thomas Malthus wrote his essay on the principles of population in 1798 that marked the beginnings of modern demography as a science. The author follows up with a chapter on the estimates made at various times in the past hundred years about the maximum number of people who could live on earth. Four papers deal with the debates about global models of population growth and the limits to growth. Sharp swings in population policy in China from the Communist Revolution under Mao in 1949 to the one child per family rule in 1979 are also considered. Another chapter compares population policy in Japan, China, and India. A chapter is devoted to the role of oil and the soaring price of this basic input into agriculture as a constraint on food production and as a result on population growth. A closing chapter considers the great migrations of the 19th and 20th centuries, including the transatlantic and transpacific movements, the mass migrations after World Wars I and II, and those of recent decades. This book will interest scholars and students in economics and other social sciences dealing with the issues of demography, population growth, and economic development. Human Rights and World Public Order Myres Smith McDougal, Harold Dwight Lasswell, Lung-chu Chen, 2019 As a classic text of the New Haven School of International Law, this book explores human rights and international law in the broadest sense, taking into account social sciences research while embracing all values secured or consequently fulfilled or needed to thus be achieved. The re-issuance of this venerable title unveils this work to a new generation of scholars, students, and practitioners of international law and human rights. [The History of Development](#) Gilbert Rist, 2002-10 With all its hopes of a more just and materially prosperous world, development has fascinated societies in both North and South. Looking at this collective fancy in retrospect, Gilbert Rist shows the underlying similarities of its various theories and strategies and their shared inability to transform the world. He argues persuasively that development has always been a kind of collective delusion which in reality has simply promoted a widening of market relations despite the good intentions of its advocates.

Shaping Tomorrow's World Elke Seefried, 2024-05-01 *Shaping Tomorrow's World* tells the crucial story of how futures studies developed in West Germany, Europe, the US, and within global futures networks from the 1940s to the 1980s. It charts the emergence of different approaches and thought styles within the field, ranging from Cold War defense intellectuals such as Herman Kahn to critical peace activists like Robert Jungk. Engaging with the challenges of the looming nuclear war, the changing phases of the Cold War, 1968, and the growing importance of both the Global South and environmentalism, this book argues that futures scholars actively contributed to these processes of change. This multiple award-winning study combines national and transnational perspectives to present a unique history of envisioning, forecasting, and shaping the future. *A Survey of International Intergovernmental Organizations* Melvin L. Myers, 1978 *The Quest*
