Valkyrie Jóhanna Katrín Friðriksdóttir, 2020-04-02 **LONGLISTED FOR THE 2020 CUNDILL HISTORY PRIZE** Valkyries, the female supernatural beings that choose who dies and who lives on the battlefield. They protect some but guide spears, arrows, and sword blades into the bodies of others. Viking myths about valkyries attempt to elevate the banality of war, to make the pain and suffering, the lost limbs and deformities, the piles of lifeless bodies of young men glorious and worthwhile. Rather than their death being futile, it is their destiny and good fortune determined by divine beings. The women in these stories take full part in the power struggles and upheavals in their communities for better or worse. Drawing on the latest historical and archaeological evidence, *Valkyrie* introduces readers to the dramatic and fascinating texts recorded in medieval Iceland, a culture able to imagine women in all kinds of roles, carrying power not just in this world but pulling the strings in the other world too. In the process, this fascinating book uncovers the reality behind the myths and legends to reveal the dynamic, diverse lives of Viking women.

The Drowning of Money Island Andrew S. Lewis, 2019-10-01 Offers a glimpse of the future of vanishing shorelines in America in the age of climate change where the wealthy will be able to remain the longest while the poor will be forced to leave. Journalist Andrew Lewis chronicles the struggle of his New Jersey hometown to rebuild their ravaged homes in the face of the same environmental stresses and governmental neglect that are endangering coastal areas throughout the United States. Lewis grew up on the Bayshore, a 40-mile stretch of Delaware Bay beaches, marshland, and fishing hamlets at the southern end of New Jersey, whose working-class community is fighting to retain their place in a country that has left them behind. The Bayshore, like so many rural places in the US, is under immense pressure from a combination of severe economic decline, industry loss, and regulation. But it is also contending with one of the fastest rates of sea-level rise on the planet and the aftereffects of one of the most destructive hurricanes in American history, Superstorm Sandy. If in the years prior to Sandy the Bayshore had already been slowly disappearing, its beaches eroding and lowland cedar woods hollowing out into saltwater bleached ghost forests, after the hurricane the community was decimated. Today, homes and roads and memories are crumbling into the rising bay. Cumberland, the poor rural county where the Bayshore is located, had been left out of the bulk of the initial federal disaster relief package post-Sandy. Instead of money to rebuild, the Bayshore got the New Jersey Department of Environmental Protection's Superstorm Sandy Blue Acres Program, which identified and purchased flood-prone neighborhoods where working-class citizens lived, then demolished them to be converted to open space. *The Drowning of Money Island* is an intimate yet unbiased, lyrical yet investigative portrait of a rural

community ravaged by sea level rise and economic hardship as well as the increasingly divisive politics those factors have helped spawn It invites us to confront how climate change is already intensifying preexisting inequality
