Rise Of The Rustbelt:

The Rise of the Rustbelt Philip Cooke, 1995 First Published in 1995 Routledge is an imprint of Taylor Francis an informa company *Remaking the Rust Belt* Tracy Neumann, 2016-05-26 Cities in the North Atlantic coal and steel belt embodied industrial power in the early twentieth century but by the 1970s their economic and political might had been significantly diminished by newly industrializing regions in the Global South This was not simply a North American phenomenon the precipitous decline of mature steel centers like Pittsburgh Pennsylvania and Hamilton Ontario was a bellwether for similar cities around the world Contemporary narratives of the decline of basic industry on both sides of the Atlantic make the postindustrial transformation of old manufacturing centers seem inevitable the product of natural business cycles and neutral market forces In *Remaking the Rust Belt* Tracy Neumann tells a different story one in which local political and business elites drawing on a limited set of internationally circulating redevelopment models pursued postindustrial urban visions They hired the same consulting firms shared ideas about urban revitalization on study tours at conferences and in the pages of professional journals and began to plan cities oriented around services rather than manufacturing all well in advance of the economic malaise of the 1970s While postindustrialism remade cities it came with high costs In following this strategy public officials sacrificed the well being of large portions of their populations *Remaking the Rust Belt* recounts how local leaders throughout the Rust Belt created the jobs services leisure activities and cultural institutions that they believed would attract younger educated middle class professionals In the process they abandoned social democratic goals and widened and deepened economic inequality among urban residents

Dealing with Deindustrialization Margaret Cowell, 2014-09-25 The late 1970s and 1980s saw a process of mass factory closures in cities and regions across the Midwest of the United States What happened next as leaders reacted to the news of each plant closure and to the broader deindustrialization trend that emerged during this time period is the main subject of this book It shows how leaders in eight metropolitan areas facing deindustrialization strived for adaptive resilience by using economic development policy The unique attributes of each region asset bases modes of governance civic capacity leadership qualities and external factors influenced the responses employed and the outcomes achieved Using adaptive resilience as a lens Margaret Cowell provides a thorough understanding of how and why regions varied in their abilities to respond to deindustrialization

The Rise of Stadiums in the Modern United States Mark Dyreson, Robert Trumpbour, 2013-09-13 Many Americans know more about the stadiums that loom over their cityscapes or college campuses than they do about any other aspect of the nation's geography Stadiums serve as iconic monuments of urban and university identities Indeed the power of sport in modern American culture has produced sportscares landscapes literally shaped by their devotion to athletic competition Curiously given the importance of the secular cathedrals in American culture historians have paid little attention to these edifices *The Rise of Stadiums in the Modern United States* Cathedrals of Sport seeks to remedy that oversight This book will analyze stadiums

from a variety of perspectives paying special attention to the links between the built environment in which Americans watch and play games and the larger social environments that the nation's sporting practices inhabit *The Rise of Stadiums in the Modern United States* Cathedrals of Sport explores the role of stadiums in shaping urban identities determining the economics of intercollegiate athletics influencing local and national politics This book was previously published as a special issue of the *International Journal of the History of Sport*

Postindustrial DIY Daniel Campo, 2024-02-13 Chronicles grassroots efforts to recover rebuild and enjoy architecturally iconic but economically obsolete places in the American Rust Belt A pioneering Detroit automobile factory A legendary iron mill at the edge of Pittsburgh A campus of concrete grain elevators in Buffalo Two monumental train stations one in Buffalo the other in Detroit These once noble sites have since fallen from their towering grace As local elected leaders did everything they could to destroy what was left of these places citizens saw beauty and utility in these industrial ruins and felt compelled to act Postindustrial DIY tells their stories The culmination of more than a dozen years of on the ground investigation ethnography and historical analysis author and urbanist Daniel Campo

immerses the reader in this postindustrial landscape weaving the perspectives of dozens of DIY protagonists as well as architects planners and preservationists Working without capital expertise and sometimes permission in a milieu dominated by powerful political and economic interests these do it yourself actors are driven by passion and a sense of civic duty rather than by profit or political expediency They have craftily remade these sites into collective preservation projects and democratic grounds for arts and culture environmental engagement regional celebrations itinerant play and in the moment constructions Their projects are generating excitement about the prospect of Rust Belt life even as they often remain invisible to the uninformed passerby and fall short of professional preservation or environmental reclamation standards Demonstrating that there is no such thing as a site that is too far gone to save or reuse Postindustrial DIY is rich with case studies that demonstrate how great architecture is not simply for the elites or the wealthy The citizen preservationists and urbanists described in this book offer looser more playful and often more publicly satisfying alternatives to the development practices that have transformed iconic sites into expensive real estate or a clean slate for the next profitable endeavor Transcending the disciplinary boundaries of architecture historic preservation city planning and landscape architecture Postindustrial DIY suggests new ways to engage adapt and preserve architecturally compelling sites and bottom up strategies for Rust Belt revival

Voices from the Rust Belt Anne Trubek, 2018-04-03

Timely the collection paints intimate portraits of neglected places that are often used as political talking points A good companion piece to J D Vance's *Hillbilly Elegy* Booklist The essays in *Voices from the Rust Belt* address segregated schools rural childhoods suburban ennui lead poisoning opiate addiction and job loss They reflect upon happy childhoods successful community ventures warm refuges for outsiders and hidden oases of natural beauty But mainly they are stories drawn from uniquely personal experiences A girl has her bike stolen A social worker in Pittsburgh makes calls on clients A journalist from Buffalo moves away and misses home A father gives his daughter a bath in the lead contaminated water of Flint Michigan from the introduction Where is America's Rust Belt It's not quite a geographic region but a linguistic one first introduced as a concept in 1984 by Walter Mondale In the modern vernacular it's closely associated with the Post Industrial Midwest and includes Michigan Ohio and Pennsylvania as well as parts of Illinois Wisconsin and New York The region reflects the country

s manufacturing center which over the past forty years has been in decline In the 2016 election the Rust Belt s economic woes became a political talking point and helped pave the way for a Donald Trump victory But the region is neither monolithic nor easily understood The truth is much more nuanced Voices from the Rust Belt pulls together a distinct variety of voices from people who call the region home Voices that emerge from familiar Rust Belt cities Detroit Cleveland Flint and Buffalo among other places and observe with grace and sensitivity the changing economic and cultural realities for generations of Americans

Schooling the Rustbelt Kids Pat Thomson,2020-08-04 A truly exceptional book Michael W Apple University of Wisconsin Madison A gripping insight into the local struggles facing disadvantaged schools and a compelling account of the injustice of their place in the bigger picture Professor Geoff Whitty Director Institute of Education University of London Schools in disadvantaged areas are struggling in the current economic and political environment Like schools everywhere they are being asked to do more with less but they face more obstacles In recent years education policy has shifted from a holistic approach to learning to a focus on narrow educational outcomes spelling reading and writing Thomson shows that this approach penalises disadvantaged schools and argues that educational and social disadvantage are inextricably linked in children s everyday lives Examining primary and secondary schools in disadvantaged areas in a post industrial rustbelt city *Schooling the Rustbelt Kids* reopens the debate about inequality in schooling It provides concrete evidence that typical government policies in the Western world are not working and that they are helping to create a permanent underclass Thomson outlines an alternative whole of government approach to policy which builds on those school programs that do make a real difference to educational outcomes Thomson also emphasises the influence of local geography Schools are coloured by particular neighbourhoods permeated by national and global events and tangled in complex networks of social relations Interventions which work in one school may not work in others
