the appraisal of residential property Volume 1 has been updated and covers the valuation process as it relates to residential properties particularly when valuation is undertaken for secured lending purposes It addresses the basic skills required the risks posed in a valuation the key drivers of value emerging issues that impact valuation and the key legal and RICS regulatory considerations that a valuer needs to understand Volume 2 of the series goes on to consider the practical aspects of the survey and inspection of residential properties in more detail Not only does this include updated sections on the most common defects for example building movement moisture problems wood rot and wood boring insects it also covers emerging challenges including assessing personal safety hazards modern construction technologies and materials and invasive plants The volume also takes account of the Home Survey Standard recently published by the RICS and the changes resulting from climate change the energy crisis and concerns about fire safety Building services in domestic residential properties is another area of rapid change especially with the development of low carbon and renewable technologies To ensure that this aspect is covered in sufficient detail the content is to be included in Volume 3 Assessing Building Services An essential book for students studying to enter the residential survey and valuation profession and for existing practitioners who wish to improve their knowledge of current practices **Dampness in Buildings** E G Gobert,T A Oxley,2013-11-05

This book explains the nature of dampness in buildings how to diagnose a dampness problem before it gets out of hand and how to deal with it It covers the problems of rising dampness and condensation and how to distinguish them which are generally not fully understood even by many professional surveyors The book stresses the need to use a moisture meter to obtain reliable and comprehensive information Dampness in Buildings will be of immediate practical use to surveyors architects builders housing managers and health inspectors It will be equally valuable to house owners and potential purchasers *CRM Bulletin* United States. Dealing with Heritage Barbara Lubelli,Uta Pottgiesser,Wido Quist,Susanne Rexroth,2025-04-01 It is an honor to introduce this book which brings together a number of very important aspects of the restoration architect s profession with this short statement Dealing with heritage requires that the restoration architect makes well considered and definable choices It should not only be about conservation but attention must and may also be paid to making heritage future proof When it comes to making heritage future proof we still stand at the start of a major sustainability transition in which making interventions will be indispensable Such interventions are made possible by recognizing and utilizing the opportunities that heritage offers but they should always be made from a view that places the preservation of the core values of the heritage centrally This book is part of a series of books produced in cooperation with and financed by the Stichting Rondeltappe Bernoster Kemmers All books of the series have been reviewed and edited by Silvia Naldini Section of Heritage Architecture Faculty of Architecture and the Built Environment Delft University of Technology The Netherlands **Applied Building Physics** Hugo S. L. Hens,2012-01-09 Die Energiekrise der 1970er Jahre h ufig auftretende Feuchteprobleme Klagen ber das

Sick Building Syndrom und mangelnden Komfort hinsichtlich Raumklima und Behaglichkeit und nicht zuletzt das Bemühen um Nachhaltigkeit haben die Bauphysik zu einem Innovationsmotor auf dem Gebäudesektor gemacht. Dabei war die gesellschaftliche Forderung nach Energieeinsparung in Gebäuden ohne Gebrauchseinschränkungen der Auslöser für die ganzheitliche Planung. Wie alle Ingenieurwissenschaften ist auch die Bauphysik anwendungsorientiert. Weshalb sich nach einem ersten Buch über die Grundlagen das vorliegende zweite Buch mit den Hintergründen der Gebrauchstauglichkeit und den Anforderungen an Energieeffizienz in Gebäuden befasst. Außenklimabedingungen und Raumklimaberechnungen werden diskutiert. Energieverluste und -gewinne werden für Gebäude und separat für die Gebäudehülle untersucht. Die wichtigen physikalischen Eigenschaften für den gekoppelten Wärme- und Feuchtetransport durch Baukonstruktionen werden für zahlreiche Materialien aufgeführt. Für das Buch stützt sich der Autor auf seine Erfahrungen aus 35 Jahren Lehre der Bauphysik für Architekten und Bauingenieure und 40 Jahre Tätigkeit in der Forschung und als Beratender Ingenieur.
