Rising Middle Power:

Middle Powers and the Rise of China Bruce Gilley, Andrew O'Neil, 2014-09-10 China's rise is changing the dynamics of the international system. Middle Powers and the Rise of China is the first work to examine how the group of states referred to as middle powers are responding to China's growing economic, diplomatic and military power. States with capabilities immediately below those of great powers, middle powers still exercise influence far above most other states. Their role as significant trading partners and allies or adversaries in matters of regional security, nuclear proliferation and global governance issues such as human rights and climate change are reshaping international politics. Contributors review middle power relations with China in the cases of South Korea, Malaysia, Thailand, Indonesia, Australia, South Africa, Turkey and Brazil, addressing how these diverse nations are responding to a rising China, the impact of Chinese power on each and whether these states are being attracted to China or deterred by its new power and assertiveness. Chapters also explore how much or how little China and, for comparison, the US value middle powers and examine whether or not middle powers can actually shape China's behavior. By bringing a new analytic approach to a key issue in international politics, this unique treatment of emerging middle powers and the rise of China will interest scholars and students of international relations, security studies, China and the diverse countries covered in the book.

India: A Rising Middle Power John W. Mellor, 2019-04-11 This volume discusses topics important to understanding the basis of India's global role. Rethinking Middle Powers in the Asian Century Tanguy Struye de Swielande, Dorothee Vandamme, David Walton, Thomas Wilkins, 2018-09-27 The term middle power is conceptually fragile. Some scholars have even argued for abandoning it. This book argues that the concept needs to be analysed more profoundly and that new analytical tools need to be developed to better understand the phenomenon. The traditional approach based on Western states is insufficient and has become increasingly irrelevant in a transformed global environment. Instead of drawing from a single theory of international relations, the contributors have chosen to build upon a wide range of theories in a deliberate demonstration of analytic eclecticism. A pluralistic approach provides stronger explanations while remaining analytically and intellectually rigorous. Many of the theory contributions are reconsidering how the largely Western bases of such theorising need revising in light of the emerging middle powers, many of which are in Asia. Presenting a strong argument for studying middle powers, this book explores both the theory and empirical applications of the concept by rethinking the definition and characteristics of middle powers using a range of case studies. It examines changes in the study of middle powers over the last decade, proposing to look at the concept of middle powers in a coherent and inclusive manner. Finally, it aims to further the discussion on the evolution of the international system and provides sound conclusions about the theoretical usefulness and empirical evolution of middle powers today.

Brazil as a Rising Power Kai Michael

Kenkel, Philip Cunliffe, 2016-01-08 This book examines the normative tensions inherent in upward mobility within the international system focusing particularly on the clash between sovereign self interest and the putatively universal norms associated with international interventions It provides extensive detail and deep analysis of Brazil's nature as a rising power and that nature's implications for how the country crafts its international profile on issues such as intervention In addition the book proposes innovative ways of re-organising thematic conceptual and empirical research on the normative behaviour of emergent powers with regard to institutions of global governance and questions of intervention In analysing what distinguishes Brazil as a rising power the contributors begin from the assumption that participation in intervention is an increasingly crucial element in demonstrating the capacity and responsibility for which demand accrues as a state seeks increased international profile As such the debates around intervention serve as an indicative locus for examining the clash of norms that accompanies emergence as a global player The book's approach is to organise the analysis around thematic rather than chronological or praxis based lines using the Brazilian case as an illustrative example capable of extrapolation to other emerging powers such as Turkey India and others This work draws together rich empirical detail with sophisticated and varied conceptual analysis and will be of interest to scholars of international relations Latin American politics and global governance

Security Strategies of Middle Powers in the Asia Pacific Ralf Emmers, Sarah Teo, 2018-02-05 Security Strategies of Middle Powers in the Asia Pacific examines what drives the different regional security strategies of four middle powers in the Asia Pacific Australia Indonesia South Korea and Malaysia Drawing on the extant middle power literature the authors argue that the regional security strategies of middle powers could take two forms namely functional or normative A functional strategy means that the middle power targets its resources to address a specific problem that it has a high level of interest in while a normative strategy refers to a focus on promoting general behavioural standards and confidence building at the multilateral level This book argues that whether a middle power ultimately employs a more functional or normative regional security strategy depends on its resource availability and strategic environment
