**Ecological Policy Handbook - Vol. II** Alessandro PIRONE, 2020-03-31 Areas of concern are identified as critical natural services that have been exploited beyond their regeneration capacity In this second Volume the concept of sustainable scale is assessed with some limits and thresholds underlined It should be noted that environmental impacts combined with ethical and cultural issues will irrevocably damage life support natural functions if not corrected The hole in the ozone layer biodiversity climate change energy population soil fertility toxic substances water commerce and trade natural disasters and humans threaten all critical ecosystems The available scientific data as time passes more precise and reliable show humans have a key role in this situation also for inability to take a proactive part in political decision making In this context attention was given to the role

of humanity intoxicated by the current economic paradigm which is ruled by market laws that aim to obtain a mere financial advantage     Home Grown Brian Halweil, 2002 Entering the foodshed The transcontinental lettuce The Wal Mart effect Making food deserts bloom Farmers as entrepreneurs Taking back the market Rebuilding the local foodshed The personal case for eating local     *Global Environmental Change: The Threat to Human Health* Samuel S. Myers, 2009-11 Over the past two to three hundred years humanity's ecological footprint has ballooned to such an extent that we are now fundamentally altering the planet We have transformed the Earth's land surface and altered the function of its ecosystems and we are triggering the rapid loss of both terrestrial and marine life We are also profoundly changing our planet's climate It is increasingly apparent that the breadth and depth of the changes we are wreaking on the environment are imperiling not only many of the other species with which we share the ecological stage but the health and wellbeing of our own species as well Global climate change threatens human health in numerous and profound ways Large segments of the population will experience more heat waves altered exposure to infectious disease and more frequent natural disasters Most significantly climatic disruption threatens the adequacy of the core building blocks of health for large populations around the globe sufficient food and nutrition safe water for drinking and sanitation fresh air to breathe and secure homes to live in As climate change dismantles these central elements of healthy societies people with fewer resources will be forced to migrate in large numbers to lands where they may not be welcome A likely result of all of these processes will be increased civic instability and strife     **Natural Capitalism** Paul Hawken, Amory B. Lovins, L. Hunter Lovins, 2013-09-13 On its first publication 10 years ago Natural Capitalism rocked the world of business with its innovative new approach an approach that fused ecological integrity with business acumen using the radical concept of natural capitalism This 10th anniversary edition features a new Introduction by Amory B Lovins and Paul Hawken which updates the story to include the successes of the last decade It clearly sets out the path that we must now take to ensure the future prosperity of our civilisation and our planet

**Powering the Low-Carbon Economy: The Once and Future Roles of Renewable Energy and Natural Gas** Saya Kitasei, 2010 Natural gas provides a natural complement to variable renewable energy sources such as wind and solar power It is the cleanest fossil fuel emitting less than half the carbon dioxide and a fraction of the smog forming pollutants that coal power plants do Moreover it can be used in a variety of efficient flexible and scalable generating technologies enabling it to back up wind and solar generation on a range of time and geographic scales If new supplies can be produced responsibly natural gas can deliver immediate reductions in carbon emissions from the power sector Methane the main component of natural gas already is being captured from landfills and other renewable sources which can contribute a growing share of natural gas supplies in the decades ahead As renewable energy and natural gas become more economical their share in global power generation markets is increasing at the expense of coal Working together renewable energy and natural gas can facilitate a rapid decarbonization of the power sector and provide the foundation for a low carbon energy future starting
