Risk-Based Decision-Making for Assessing Petroleum Impacts at Exploration and Production Sites Sara J. McMillen, Renae I. Magaw, 2001-01-01 *Subterranean Estates* Hannah Appel, Arthur Mason, Michael Watts, 2015-06-24 Oil is a fairy tale and like every fairy tale is a bit of a lie Ryzard Kapuscinski Shah of Shahs The scale and reach of the global oil and gas industry valued at several trillions of dollars is almost impossible to grasp Despite its vast technical expertise and scientific sophistication the industry betrays a startling degree of inexactitude and empirical disagreement about foundational questions of quantity output and price As an industry typified by concentrated economic and political power its operations are obscured by secrecy and security Perhaps it is not surprising then that the social sciences typically approach oil as a metonym of modernity money geopolitics violence corruption curse or commodity rather than considering the daily life of the industry itself and of the hydrocarbons around which it is built Subterranean Estates gathers an interdisciplinary group of scholars and experts to instead provide a critical topography of the hydrocarbon industry understood not solely as an assemblage of corporate forms but rather as an expansive and porous network of laborers and technologies representation and expertise and the ways of life oil and gas produce at points of extraction production marketing consumption and combustion By accounting for oil as empirical and experiential the contributors begin to demystify a commodity too often given almost demiurgic power Subterranean Estates shifts critical attention away from an exclusive focus on global oil firms toward often overlooked aspects of the industry including insurance finance law and the role of consultants and community organizations Based on ethnographic research from around the world Equatorial Guinea Nigeria Oman the United States Ecuador Chad the United Kingdom Kazakhstan Canada Iran and Russia and featuring a photoessay on the lived experiences of those who inhabit a universe populated by oil rigs pipelines and gas flares this innovative volume provides a new perspective on the material symbolic cultural and social meanings of this multidimensional world
