A groundbreaking new volume which represents the first sustained effort to fully explain the development of American religious history and its creation within evolving political and social frameworks. Spans a wide range of traditions and movements from the Baptists and Methodists to Buddhists and Mormons. Explores topics ranging from religion and the media, immigration and piety, though to politics and social reform. Considers how American religion has influenced and been interpreted in literature and popular culture. Provides insights into the historiography of religion but presents the subject as a story in motion rather than a snapshot of where the field is at a given moment. **Social Change and Cultural**

Ojibwe Singers Michael David McNally, 2009

In the early nineteenth century Protestant missionaries promoted the translation of evangelical hymns into the Ojibwe language regarding this music not only as a shared form of worship but also as a tool for rooting out native cultural identity But for many Minnesota Ojibwe today the hymns emerged from this history of material and cultural dispossession to become emblematic of their identity as a distinct native people Author Michael McNally uses hymn singing as a lens to view culture in motion to consider the broader cultural processes through which Native American peoples have creatively drawn on the resources of ritual to make room for survival integrity and a cultural identity within the confines of colonialism

Native American Religion Joel W. Martin, 2001-02-22 Native Americans practice some of America s most spiritually profound historically resilient and ethically demanding religions Joel Martin draws his narrative from folk stories rituals and even landscapes to trace the development of Native American religion from ancient burial mounds through interactions with European conquerors and missionaries and on to the modern day rebirth of ancient rites and beliefs The book depicts the major cornerstones of American Indian history and religion the vast movements for pan Indian renewal the formation of the Native American Church in 1919 the passage of the Native American Graves and Repatriation Act of 1990 and key political actions involving sacred sites in the 1980s and 90s Martin explores the close links between religion and Native American culture and history Legendary chiefs like Osceola and Tecumseh led their tribes in resistance movements against the European invaders inspired by prophets like the Shawnee Tenskwatawa and the Mohawk Coocoochee Catharine Brown herself a convert founded a school for Cherokee women and converted dozens of her people to Christianity Their stories

along with those of dozens of other men and women from noble warriors to celebrated authors are masterfully woven into this vivid wide ranging survey of Native American history and religion Those Who Belong Jill Doerfler, 2015-07-01 Despite the central role blood quantum played in political formations of American Indian identity in the late nineteenth and twentieth centuries there are few studies that explore how tribal nations have contended with this transformation of tribal citizenship Those Who Belong explores how White Earth Anishinaabeg understood identity and blood quantum in the early twentieth century how it was employed and manipulated by the U S government how it came to be the sole requirement for tribal citizenship in 1961 and how a contemporary effort for constitutional reform sought a return to citizenship criteria rooted in Anishinaabe kinship replacing the blood quantum criteria with lineal descent Those Who Belong illustrates the ways in which Anishinaabeg of White Earth negotiated multifaceted identities both before and after the introduction of blood quantum as a marker of identity and as the sole requirement for tribal citizenship Doerfler's research reveals that Anishinaabe leaders resisted blood quantum as a tribal citizenship requirement for decades before acquiescing to federal pressure Constitutional reform efforts in the twenty first century brought new life to this longstanding debate and led to the adoption of a new constitution which requires lineal descent for citizenship The Solidarity of Kin Kenneth M. Morrison, 2012-02-01 Arguing that Native Americans religious life and history have been misinterpreted author Kenneth M Morrison reconstructs the Eastern Algonkians world views and demonstrates the indigenous modes of rationality that shaped not only their encounter with the French but also their self directed process of religious change In reassessing controversial anthropological historical and ethnohistorical scholarship Morrison develops interpretive strategies that are more responsive to the religious world views of the Eastern Algonkian peoples He concludes that the Eastern Algonkians did not convert to Catholicism but rather applied traditional knowledge and values to achieve a pragmatic and critical sense of Christianity and to preserve and extend kinship solidarity into the future The result was a remarkable intersection of Eastern Algonkian and missionary cosmologies

Resistance and Recognition at Kitigan Zibi Dennis Leo Fisher, 2023-11-15 *Resistance and Recognition at Kitigan Zibi* tells the modern history of Kitigan Zibi the largest and oldest Algonquin reserve in Canada This local history sheds light on the larger experience of the Algonquin First Nations whose traditional lands span the Ottawa River watershed and cross contemporary boundaries Drawing on archival sources and interviews with community members this work elucidates the relationship between culture and politics on the reserve during the twentieth century Despite the disruptions of settler colonialism the Algonquin have maintained a distinct identity and have waged a multifaceted struggle against assimilation and economic marginalization This struggle has played out in political spaces including border crossing celebrations grand councils and courtrooms This fight has also informed strategic labour choices interactions with game wardens and protests against the Catholic Church *Resistance and Recognition at Kitigan Zibi* demonstrates that the contest over recognition of treaty rights and traditional lands is longer broader and deeper than previously understood Standing on the Premises of

God Fritz Detwiler,1999-12 The Christian Right is arguably the most significant social movement in the United States today In recent years these religious conservatives have loudly protested a public education system they believe no longer represents their interests or values Educators often dismiss critiques based on religious values as irrational or flimsy failing to appreciate the coherence of these criticisms from the Christian Right s own perspective While the Christian Right has become ever more sophisticated in its lobbying and powerful in its influence educators and parents find themselves lacking the background knowledge necessary to respond effectively to its efforts Standing on the Premises of God speaks directly to this dilemma explaining current incarnations of the Christian Right its leadership its intellectual and theological foundations and its tactics so that those interested in the debates over education will be better prepared to engage them constructively Taking the novel approach of framing the Christian Right as a revitalization movement Detwiler shows how it seeks to effect cultural transformation in order to bring public education and our society more generally in line with its worldview His theoretical model provides insights into why education is so pivotal to the Christian Right and also assesses the religious viability of the Christian Right as a social movement

Tradition, Solidarity and Empowerment: The Native Discourse in Canada Steffi Retzlaff,2012-01-31 This study represents a significant step towards understanding

an important social phenomenon in Canada at the end of the twentieth and beginning of the twenty first century Throughout much of the twentieth century the life of virtually all Aboriginal people had been marked by a set of policies directed from Ottawa These had contributed to undermining both their traditional cultures and also the familial bonds vital for the development of a positive self image and a healthy relationship with other members of society as also with society as a whole The negative impact of such policies is now very widely recognised and documented The study does not set out to shed further light on this set of causes and effects What it does do successfully is investigate a number of the linguistic strategies based partly on aboriginal discursive models partly on positive presentation of a range of topics handled very differently in Euro Canadian media and partly on the propagation and consistent use of key items of terminology some of which have begun to enter at least some of the Euro Canadian media and strands of political discourse Prof Robert Gould Carleton University Ottawa The analytical framework employed in this study is Critical Discourse Analysis CDA CDA is said to focus on relevant social cultural and political problems and processes Accordingly its task is both deconstructive and constructive However the emphasis of research in CDA is mainly on problems and the deconstructive moment which aims at revealing hidden and not so hidden linguistic strategies and how dominant discourses are appropriated or naturalized The analysis presented in this book runs counter to this generally employed CDA practice It pays attention to constructive moments The focus is on counter discourses as they are used by Aboriginal people in Canada to resist ingrained hegemonic practices to build and develop new power relations as well as social and political identities
