Semantics Primes And Universals:

Semantics : Primes and Universals Anna Wierzbicka, 1996-03-28 This book provides a synthesis of Wierzbicka's theory of meaning which is based on conceptual primitives and semantic universals using empirical findings from a wide range of languages. While addressed primarily to linguists, the book deals with highly topical and controversial issues of central importance to several disciplines including anthropology, psychology, and philosophy. Conceptual primitives and semantic universals are the cornerstones of a semantic theory which Anna Wierzbicka has been developing for many years. **Semantics Primes and Universals** is a major synthesis of her work, presenting a full and systematic exposition of that theory in a non-technical and readable way. It delineates a full set of universal concepts as they have emerged from large-scale investigations across a wide range of languages undertaken by the author and her colleagues. On the basis of empirical cross-linguistic studies, it vindicates the old notion of the psychic unity of mankind while at the same time offering a framework for the rigorous description of different languages and cultures. A major synthesis of Anna Wierzbicka's work.

Semantic Primes and Universal Grammar Bert Peeters, 2006-08-16 This volume is part of a research program which started with the publication in 1972 of Anna Wierzbicka's groundbreaking work on Semantic Primitives. The first within the program to focus on a number of typologically similar languages, it proposes a French, Spanish, Portuguese, and Italian version of the Natural Semantic Metalanguage (NSM) elaborated over the years by Wierzbicka and colleagues. Repetition is avoided through teamwork; a number of authors working on the languages under examination have had equal input in a set of five papers dealing with distinct parts of the metalanguage. Some of the findings presented here invite us to have a fresh look at what has already been achieved and to amend some of the working hypotheses of the NSM approach accordingly. The volume also contains six case studies on Italian *sfogarsi*, Portuguese *saudades*, Spanish *crisis*, French *certes*, Spanish expressions of sincerity, and Italian and Spanish diminutives respectively.

Semantic and Lexical Universals Cliff Goddard, Anna Wierzbicka, 1994-05-04. This set of papers represents a unique collection: it is the first attempt ever to empirically test a hypothetical set of semantic and lexical universals across a number of genetically and typologically diverse languages. In fact, the word collection is not fully appropriate in this case since the papers report research undertaken specifically for the present volume and shaped by the same guidelines. They constitute parallel and strictly comparable answers to the same set of questions coordinated effort with a common aim and a common methodology. The goal of identifying the universal human concepts found in all languages is of fundamental importance both from a theoretical and a practical point of view since these concepts provide the basis of the psychic unity of mankind underlying the clearly visible diversity of human cultures. They also allow us to better understand that diversity itself because they provide a common measure without which no precise and meaningful comparisons are possible at all. A set of truly universal or even near universal concepts can provide us with an invaluable tool for interpreting and explaining all the culture specific meanings encoded in the language and culture systems of the world. It can also provide us with a tool for explaining meanings across cultures in education, business, trade, international relations, and so on. The book contains 13 chapters on individual languages including Japanese by Masayuki Onishi, Chinese by Hilary Chappel, Thai by Anthony Diller, Ewe by Felix Ameka, Miskitu languages of South America by Kenneth Hall, Australian Aboriginal languages Aranda, Yankunytjatjara, and Kayardild by Jean Harkins. Semantic theory and semantic universals by Goddard. Introducing lexical primitives by Goddard and Wierzbicka. Semantic primitives across languages: a critical review by Wierzbicka.

Cross-linguistic Semantics Cliff Goddard, 2008. Cross linguistic semantics investigating how languages package and express meanings differently is central to the linguistic quest to understand the nature of human language. This set of studies explores and demonstrates cross linguistic semantics as practised in the natural semantic metalanguage NSM framework originated by Anna Wierzbicka. The opening chapters give a state of the art overview of the NSM model, propose several theoretical innovations, and advance a number of original analyses in connection with names and naming, clefts and other specificational sentences, and discourse anaphora. Subsequent chapters describe and analyse diverse phenomena in ten languages from multiple families, geographical locations, and cultural settings around the globe. Three substantial studies document how the metalanguage of NSM semantic primes can be realised in languages of widely differing types: Amharic, Ethiopia; Korean, East Asia; and East Cree, Canada. Each constitutes a lexicogrammatical portrait in miniature of the language concerned. Other chapters probe topics such as inalienable possession in Koromua, Papua New Guinea; epistemic verbs in Swedish.

hyperpolysemy in Bunuba Australia the expression of momentariness in Berber ethnogeometry in Makasai East Timor value concepts in Russian and virtuous emotions in Japanese This book will be valuable for linguists working on language description lexical semantics or the semantics of grammar for advanced students of linguistics and for others interested in language universals and language diversity Meaning and Universal Grammar Cliff Goddard, Anna Wierzbicka, 2002-01-01 Volume one of a set of studies that is founded on the idea that universal grammar is based on indeed inseparable from meaning The theoretical framework is the natural semantic metalanguage NSM approach originated by Anna Wierzbicka and developed in collaboration with Cliff Goddard **Words and Meanings** Cliff Goddard, Anna Wierzbicka, 2014 This book presents cross linguistic and cross cultural investigations of word meaning from different domains of the lexicon concrete abstract physical sensory emotional and social The words they consider are complex culturally important and basic in a range of languages that includes English Russian Polish French Warlpiri and Malay *Imprisoned in English* Anna Wierzbicka, 2014 Imprisoned in English argues that in the present English dominated world social sciences and the humanities are locked in a conceptual framework grounded in English and that scholars need to break away from this framework to reach a more universal culture independent perspective on things human *Mental States* Andrea C. Schalley, Drew Khlenz, 2007-12-13 The contributions to this volume focus on what language and language use reveals about cognitive structure and underlying cognitive categories Wide ranging and thought provoking essays from linguists and psychologists within this volume investigate the insights conceptual categorization can give into the organization and structure of the mind and specific mental states Topics and linguistic phenomena discussed include narratives and story telling language development figurative language linguistic categorization linguistic relativity and the linguistic coding of mental states such as perceptions and beliefs With contributions at the forefront of current debate this book will appeal to anyone with an interest in language and the cognitive structures that support it *Ontolinguistics* Andrea C. Schalley, Dietmar Zaefferer, 2008-08-22 Current progress in linguistic theorizing is more and more informed by cross linguistic including cross modal investigation Comparison of languages relies crucially on the concepts that can be coded with similar effort in all languages These concepts are part of every language user's ontology the network of cross connected conceptualizations the mind uses in coping with the world Assuming that language comparability is rooted in the comparability of user ontologies the idea of the present volume is to further instigate progress in linguistics by looking behind the interface with the conceptual intentional system and asking a still underexplored question How are ontological structures reflected in intra and cross linguistic regularities This question defines the research program of ontology based linguistics or ontolinguistics Recent advances in the theory of language have been characterized by an emphasis on external explanatory adequacy and thus on relating language to other phenomena The research program introduced in this volume adds a decisively distinct and fresh aspect to this emerging new contextualization of the field by bringing together insights

from different areas mainly linguistics but also neuroscience philosophy and artificial intelligence In providing these disciplines with a new common task the exploration of the impact of ontological structures on linguistic regularities the ontolinguistic approach promises to develop into a vital branch of cognitive science Documenting the beginnings the book aims to instigate future interdisciplinary research in this area It will be of interest to researchers in linguistics artificial intelligence philosophy and cognitive science in general Space and Time in Languages and Cultures Luna Filipovi?,Kasia M. Jaszczolt,2012-07-24 This is an interdisciplinary volume that focuses on the central topic of the representation of events namely cross cultural differences in representing time and space as well as various aspects of the conceptualisation of space and time It brings together research on space and time from a variety of angles both theoretical and methodological Crossing boundaries between and among disciplines such as linguistics psychology philosophy or anthropology forms a creative platform in a bold attempt to reveal the complex interaction of language culture and cognition in the context of human communication and interaction The authors address the nature of spatial and temporal constructs from a number of perspectives such as cultural specificity in determining time intervals in an Amazonian culture distinct temporalities in a specific Mongolian hunter community Russian specific conceptualisation of temporal relations Seri and Yucatec frames of spatial reference memory of events in space and time and metaphorical meaning stemming from perception and spatial artefacts to name but a few themes The topic of space and time in language and culture is also represented from a different albeit related point of view in the sister volume Space and Time in Languages and Cultures Linguistic diversity HCP 36 which focuses on the language specific vis vis universal aspects of linguistic representation of spatial and temporal reference

Human Rights and the Body Annabelle Mooney,2016-05-13 *Human Rights and the Body* is a response to the crisis in human rights to the very real concern that without a secure foundation for the concept of human rights their very existence is threatened While there has been consideration of the discourses of human rights and the way in which the body is written upon research in linguistics has not yet been fully brought to bear on either human rights or the body Drawing on legal concepts and aspects of the law of human rights Mooney aims to provide a universally defensible set of human rights and a foundation or rather a frame for them She argues that the proper frames for human rights are firstly the human body seen as an index reliant on the natural world secondly the globe and finally language These three frames generate rights to food water sleep and shelter environmental protection and a right against dehumanization This book is essential reading for researchers and graduate students in the fields of human rights and semiotics of law **Language in Life, and a Life in**

Language: Jacob Mey, a Festschrift Ken Turner,2012-11-02 This is a collection of invited papers that honours Professor Jacob Mey on the occasion of his eightieth birthday Professor Mey is and has for a long time been at once one of the most respected enterprising industrious scholarly and now avuncular members of the numerous linguistics communities in which he has worked He has made over a distinguished working life significant contributions to all of the sub disciplines of

linguistics from phonetics through phonology morphology syntax semantics and especially pragmatics He has sought to make connections between these sub disciplines and broader areas of thought These connections have resulted in ground breaking advances in for example Japanese sociolinguistics pragmatics and artificial intelligence Marxist linguistics pragmatics and therapy pragmatics and machine processed information gender and language literary pragmatics and societal pragmatics The collection ends with an in depth discussion between Professor Mey and one of the editors in which Professor Mey speaks fully and frankly about his life in language and language in life **Die Slavischen Sprachen / The Slavic Languages.**

Halbband 1 Sebastian Kempgen,Tilman Berger,Peter Kosta,Karl Gutschmidt,2009 In many respects the agreement systems of Slavonic languages are close to canonical Controllers of agreement are often present they have overt expression of features and they take consistent agreements The target has obligatory bound expression of agreement and there is matching of features values for person number and gender How ever Slavonic also shows several very interesting instances of agreement choices induced by a range of different controller types These agreement choices provide good evidence for the constraints of the Agreement Hierarchy and the Predicate Hierarchy as well as for various types of condition on agreement notably animacy and precedence Language and Bilingual Cognition Reader in Applied Linguistics Vivian Cook,Vivian
