National Security and International Relations (Routledge Revivals) Peter Mangold, 2013-10-14 First published in 1990 National Security and International Relations provides a concise analysis of the problem of national security in the twentieth century It examines the criteria by which states decide what level of security they want to seek in an uncertain and essentially Hobbesian world and why some states tend to underinsure while obsessively insecure states overinsure frequently making others more insecure in the process In the wake of two world wars and the threat of nuclear destruction Peter Mangold argues that war was becoming as much a source of insecurity as the intentions of other states It then explores the different approaches attempted during the twentieth century to ameliorate or ideally escape from the security dilemma These range from international regimes to the restructuring of the international politics of Western Europe so as to substitute cooperation for conflict and U S and Soviet attempts to render nuclear competition safer through arms control and confidence building measures Of special value to students of International Relations and Strategic Studies this book will also interest those keen to understand the challenges embodied in Gorbachev's new thinking in foreign policy

Left, Right Engler Yves Engler, 2019-10-15 The left is supposed to be opposed to colonialism and at least skeptical of nationalism However Left Right shows that for decades now this hasn't been the case in Canada Yves Engler marshals damning detail on the long surprising history of support from the New Democratic Party and labor unions for such policies and international interventions as the coup in Haiti the assassination of Patrice Lumumba the Bay of Pigs invasion the Korean War and much more The rhetoric of the mainstream left he shows has also tended to concede major points to the dominant war mongering ideology with prominent commentators such as Linda McQuaig and Stephen

Resolving the Security Dilemma in Europe Bjørn Møller,1991 For the first time since the beginning of the Cold War more than 40 years ago the political determinants of military security in Europe are changing much more quickly than the technological ones Non offensive defence is now a more acceptable strategy than it was before and this book points towards realistic solutions to the problems of excessive dependence on nuclear weapons and or self defeating offensive force structures The ideas examined are especially important for British and American audiences since the Anglo Saxon countries are the ones most wedded to NATO orthodoxy and therefore the slowest to react to the current wave of change
