RECENT RESULTS ON SEMI-LINEAR HYPERBOLIC
PROBLEMS IN BOUNDED DOMAINS

A. HARAUX[*]

1. GENERALITIES

Let Ω be a bounded open domain in $\mathbb{R}^n$, $n \geq 1$ and f, g two <u>odd</u> functions: $\mathbb{R} \to \mathbb{R}$ such that,

(1.1) $\qquad f \in C^1(\mathbb{R})$, $f' \geq 0$

(1.2) $\qquad g$ is continuous and non-decreasing.

The partial differential equation

$$(1.3) \quad \begin{cases} \dfrac{\partial^2 u}{\partial t^2} - \Delta u + f(u) + g(\dfrac{\partial u}{\partial t}) = h(t, x), & (t, x) \in \mathbb{R}^+ \times \Omega \\[2mm] u(t, x) = 0 & (t, x) \in \mathbb{R}^+ \times \partial\Omega \end{cases}$$

represents the small oscillations of an n-dimensional membrane with fixed edge $\{0\} \times \partial\Omega$ under the action of 4 forces

- The elastic (global, distributed) force represented by Δu.

- A non linear <u>restoring force</u> $-f(u)$, of local character.

- A <u>damping force</u> $-g(\dfrac{\partial u}{\partial t})$, possibly non linear, also of local character.

- An exterior time-dependent force density $h(t, x)$.

The physical interpretation of (1.3) suggests that the initial value problem must be well set in the function space $C(\mathbb{R}^+, H_0^1(\Omega)) \cap \cap C^1(\mathbb{R}^+, L^2(\Omega))$ and that the <u>total energy</u> given by

$$(1.4) \qquad E(t) = \int_\Omega \left\{ \frac{1}{2} (\frac{\partial u}{\partial t})^2 + \frac{1}{2} |\Delta u|^2 + \int_0^{u(t,x)} f(s)ds \right\} dx$$

must play an important role in the definition of solutions to (1.3).

Equation (1.3) has been studied by a number of authors since 1953. More precisely, the initial-value problem has been studied successively

Semilinear Hyperbolic Problems In Bounded Domains

Roland Glowinski,Jean-Paul Zolesio

Semilinear Hyperbolic Problems In Bounded Domains:

Semi-Linear Hyperbolic Problems in Bounded Domains Alain Haraux,1987-01-01 The opening chapter provides background information on the basic functional setting semi groups and the abstract wave equation almost periodicity and the wave equation and technical tools Succeeding chapters cover the initial value problem asymptotics in autonomous cases non resonance in the purely dissipative case stability of periodic and almost periodic solutions oscillation properties in the conservative case and global properties of the full equation Includes bibliographic references and indexes by author and subject , **From Finite to Infinite Dimensional Dynamical Systems** James Robinson,Paul Glendinning,2001-05-31 Proceedings of the NATO Advanced Study Institute Cambridge UK 21 August 1 September 1995 *Exact Controllability and Stabilization of the Wave Equation* Enrique Zuazua,2024-08-23 This comprehensive monograph illustrates the intricate realm of controllability and stabilization of wave phenomena Authored by an expert in the field this book integrates J L Lion s renowned HUM method multiplier techniques and the construction of Lyapunov functionals Through meticulous analysis and practical applications this book provides invaluable insights for researchers seeking to navigate the expansive domain of wave like equations and their control Whether you are a seasoned mathematician or a newcomer to the field this book serves as an indispensable guide offering a thorough introduction and essential tools for understanding and controlling wave phenomena **Asymptotic Behavior of Dissipative Systems** Jack K. Hale,2010-01-04 This monograph reports the advances that have been made in the area by the author and many other mathematicians it is an important source of ideas for the researchers interested in the subject Zentralblatt MATH Although advanced this book is a very good introduction to the subject and the reading of the abstract part which is elegant is pleasant this monograph will be of valuable interest for those who aim to learn in the very rapidly growing subject of infinite dimensional dissipative dynamical systems Mathematical Reviews This book is directed at researchers in nonlinear ordinary and partial differential equations and at those who apply these topics to other fields of science About one third of the book focuses on the existence and properties of the flow on the global attractor for a discrete or continuous dynamical system The author presents a detailed discussion of abstract properties and examples of asymptotically smooth maps and semigroups He also covers some of the continuity properties of the global attractor under perturbation its capacity and Hausdorff dimension and the stability of the flow on the global attractor under perturbation The remainder of the book deals with particular equations occurring in applications and especially emphasizes delay equations reaction diffusion equations and the damped wave equations In each of the examples presented the author shows how to verify the existence of a global attractor and for several examples he discusses some properties of the flow on the global attractor Mathematical Analysis of Deterministic and Stochastic Problems in Complex Media Electromagnetics G. F. Roach,I. G. Stratis,A. N. Yannacopoulos,2012-03-04 Electromagnetic complex media are artificial materials that affect the propagation of electromagnetic waves in surprising ways not usually seen in nature

Because of their wide range of important applications these materials have been intensely studied over the past twenty five years mainly from the perspectives of physics and engineering But a body of rigorous mathematical theory has also gradually developed and this is the first book to present that theory Designed for researchers and advanced graduate students in applied mathematics electrical engineering and physics this book introduces the electromagnetics of complex media through a systematic state of the art account of their mathematical theory The book combines the study of well posedness homogenization and controllability of Maxwell equations complemented with constitutive relations describing complex media The book treats deterministic and stochastic problems both in the frequency and time domains It also covers computational aspects and scattering problems among other important topics Detailed appendices make the book self contained in terms of mathematical prerequisites and accessible to engineers and physicists as well as mathematicians *Long-Time Behavior of Second Order Evolution Equations with Nonlinear Damping* Igor Chueshov,Irena Lasiecka,2008 The authors consider abstract nonlinear second order evolution equations with a nonlinear damping Questions related to long time behavior existence and structure of global attractors are studied Particular emphasis is put on dynamics which in addition to nonlinear dissipation have noncompact semilinear terms and whose energy may not be necessarily decreasing For such systems the authors first develop a general theory at the abstract level They then apply the general theoryto nonlinear wave and plate equations exhibiting the aforementioned characteristics and are able to provide new results pertaining to several open problems in the area of structure and properties of global attractors arising in this class of PDE dynamics **Partial Differential Equations arising from Physics and Geometry** Mohamed Ben Ayed,Mohamed Ali Jendoubi,Yomna Rébaï,Hasna Riahi,Hatem Zaag,2019-05-02 Presents the state of the art in PDEs including the latest research and short courses accessible to graduate students **Equadiff-91 - International Conference On Differential Equations (In 2 Volumes)** C Perello,C Simo,Morales J De Sola,1993-05-25 Equadiff 91 stems from the series of conferences initiated by the late Professor Vogel The first conference Equadiff 70 which was held in Marseille Since then similar conferences had been held in Brussels Florence Wurzburg as well as Xanthi The purpose of the Equadiff series of conferences is to present the latest development in the field of differential equations both ordinary and partial including their numerical treatment and applications to the mathematics community These conferences had attracted renowned mathematicians from all over the world to present their studies and findings The latest conference under the series was Equadiff 91 held in Barcelona It attracted some 30 renowned mathematicians Researchers and graduate students of pure and applied mathematics will find this compilation of conference proceedings up to date relevant and insightful **Attractors Under Autonomous and Non-autonomous Perturbations** Matheus C. Bortolan,Alexandre N. Carvalho,José A. Langa,2020-05-29 This book provides a comprehensive study of how attractors behave under perturbations for both autonomous and non autonomous problems Furthermore the forward asymptotics of non autonomous dynamical systems is presented here for the first time in a unified

manner When modelling real world phenomena imprecisions are unavoidable On the other hand it is paramount that mathematical models reflect the modelled phenomenon in spite of unimportant neglectable influences discounted by simplifications small errors introduced by empirical laws or measurements among others The authors deal with this issue by investigating the permanence of dynamical structures and continuity properties of the attractor This is done in both the autonomous time independent and non autonomous time dependent framework in four distinct levels of approximation the upper semicontinuity lower semicontinuity topological structural stability and geometrical structural stability This book is aimed at graduate students and researchers interested in dissipative dynamical systems and stability theory and requires only a basic background in metric spaces functional analysis and for the applications techniques of ordinary and partial differential equations   Control Methods in PDE-Dynamical Systems Fabio Ancona,2007 While rooted in controlled PDE systems this 2005 AMS IMS SIAM Summer Research Conference sought to reach out to a rather distinct yet scientifically related research community in mathematics interested in PDE based dynamical systems Indeed this community is also involved in the study of dynamical properties and asymptotic long time behavior in particular stability of PDE mixed problems It was the editors conviction that the time had become ripe and the circumstances propitious for these two mathematical communities that of PDE control and optimization theorists and that of dynamical specialists to come together in order to share recent advances and breakthroughs in their respective disciplines This conviction was further buttressed by recent discoveries that certain energy methods initially devised for control theoretic a priori estimates once combined with dynamical systems techniques yield wholly new asymptotic results on well established nonlinear PDE systems particularly hyperb These expectations are now particularly well reflected in the contributions to this volume which involve nonlinear parabolic as well as hyperbolic equations and their attractors aero elasticity elastic systems Euler Korteweg models thin film equations Schrodinger equations beam equations etc in addition the static topics of Helmholtz and Morrey potentials are also prominently featured A special component of the present volume focuses on hyperbolic conservation laws to take advantage of recent theoretical advances with significant implications also on applied problems in all these areas the reader will find state of the art accounts as stimulating starting points for further research   Von Karman Evolution Equations Igor Chueshov,Irena Lasiecka,2010-04-08 In the study of mathematical models that arise in the context of concrete plications the following two questions are of fundamental importance i we posedness of the model including existence and uniqueness of solutions and ii qualitative properties of solutions A positive answer to the rst question ing of prime interest on purely mathematical grounds also provides an important test of the viability of the model as a description of a given physical phenomenon An answer or insight to the second question provides a wealth of information about the model hence about the process it describes Of particular interest are questions related to long time behavior of solutions Such an evolution property cannot be v i ed empirically thus any in a priori information about the long time asymptotics can be used in predicting an

ultimate long time response and dynamical behavior of solutions In recent years this set of investigations has attracted a great deal of attention Consequent efforts have then resulted in the creation and infusion of new methods and new tools that have been responsible for carrying out a successful an ysis of long time behavior of several classes of nonlinear PDEs

Delay Differential Evolutions Subjected to Nonlocal Initial Conditions Monica-Dana Burlică,Mihai Necula,Daniela Roșu,Ioan I. Vrabie,2018-09-03 Filling a gap in the literature Delay Differential Evolutions Subjected to Nonlocal Initial Conditions reveals important results on ordinary differential equations ODEs and partial differential equations PDEs It presents very recent results relating to the existence boundedness regularity and asymptotic behavior of global solutions for differential equations and inclusions with or without delay subjected to nonlocal implicit initial conditions After preliminaries on nonlinear evolution equations governed by dissipative operators the book gives a thorough study of the existence uniqueness and asymptotic behavior of global bounded solutions for differential equations with delay and local initial conditions It then focuses on two important nonlocal cases autonomous and quasi autonomous The authors next discuss sufficient conditions for the existence of almost periodic solutions describe evolution systems with delay and nonlocal initial conditions examine delay evolution inclusions and extend some results to the multivalued case of reaction diffusion systems The book concludes with results on viability for nonlocal evolution inclusions   Control and Estimation in Distributed Parameter Systems H. T. Banks,1992-01-01 Research in control and estimation of distributed parameter systems encompasses a wide range of applications including both fundamental science and emerging technologies The latter include smart materials piezoceramics shape memory alloys magnetostrictives electrorheological fluids fabrication and testing design of high pressure chemical vapor deposition CVD reactors for production of microelectronic surfaces e g semiconductors while the former include groundwater contamination cleanup and other environmental modeling questions climatology flow control and fluid structure interactions as well as more traditional topics in biology mechanics and acoustics These expository papers provide substantial stimulus to both young researchers and experienced investigators in control theory Includes a comprehensive and lucid presentation that relates frequency domain techniques to state space or time domain approaches for infinite dimensional systems including design of robust stabilizing and finite dimensional controllers for infinite dimensional systems It focuses on these two approaches to control design in an integrated system theoretic framework This is excellent reading for researchers in both the frequency domain and time domain control communities In other articles topics considered include pointwise control of distributed parameter systems bounded and unbounded sensors and actuators stabilization issues for large flexible structures and an overview discussion of damping models for flexible structures   **Energy Methods in Continuum Mechanics** S.N. Antontsev,J.I. Díaz,S.I. Shmarev,2012-12-06 This volume contains the proceedings of the Workshop Energy Methods for Free Boundary Problems in Continuum Mechanics held in Oviedo Spain from March 21 to March 23 1994 It is well known that the conservation laws and the constitutive equations of

Continuum Mechanics lead to complicated coupled systems of partial differential equations to which as a rule one fails to apply the techniques usually employed in the studies of scalar uncoupled equations such as for instance the maximum principle The study of the qualitative behaviour of solutions of the systems re quires different techniques among others the so called Energy Methods where the properties of some integral of a nonnegative function of one or several unknowns allow one to arrive at important conclusions on the envolved unknowns This vol ume presents the state of the art in such a technique A special attention is paid to the class of Free Boundary Problems The organizers are pleased to thank the European Science Foundation Pro gram on Mathematical treatment of free boundary problems the DGICYT Spain the FICYT Principado de Asturias Spain and the Universities of Oviedo and Complutense de Madrid for their generous financial support Finally we wish to thank Kluwer Academic Publishers for the facilities received for the publication of these Proceedings **Free and Moving Boundaries** Roland Glowinski,Jean-Paul Zolesio,2007-06-06 Addressing algebraic problems found in biomathematics and energy Free and Moving Boundaries Analysis Simulation and Control discusses moving boundary and boundary control in systems described by partial differential equations PDEs With contributions from international experts the book emphasizes numerical and theoretical control of mo **Nonlinear Differential Equations of Monotone Types in Banach Spaces** Viorel Barbu,2010-01-01 This monograph is concerned with the basic results on Cauchy problems associated with nonlinear monotone operators in Banach spaces with applications to partial differential equations of evolutive type It focuses on major results in recent decades **An Introduction to Minimal Currents and Parametric Variational Problems** Enrico Bombieri,1985 *Control and Estimation of Distributed Parameter Systems* Wolfgang Desch,F. Kappel,Karl Kunisch,1994 A semigroup formulation of a nonlinear size structured distributed rate population model Damage detection and characterization in smart material structures Optimality conditions for non qualified parabolic control problems Convergence of trajectories for a controlled viscous Burgers equation Optimality conditions for boundary control problems of parabolic type Pontryagin s principle for optimal control problems governed by semilinear elliptic equations Invariance of the Hamiltonian in control problems for semilinear parabolic distributed parameter systems Rate distribution modeling for structured heterogeneous populations A model for a two layered plate with interfacial slip Numerical solution of a constrained control problem for a phase field model Uniform stabilizability of nonlinearly coupled Kirchhoff plate equations Boundary temperature control for thermally coupled Navier Stokes equations Adaptive estimation of nonlinear distributed parameter systems Decay estimates for the wave equation with internal damping On the controllability of the rotation of a flexible arm Modeling and controllability of interconnected elastic membranes On feedback controls for dynamic networks of strings and beams and their numerical simulation Various relaxations in optimal control of distributed parameter systems Convergence of an SQP method for a class of nonlinear parabolic boundary control problems Conditional stability in determination of densities of heat sources in a bounded domain Boundary stabilization of the Korteweg de Vries equation

Controllability of the linear system of thermoelasticity Dirichlet Neumann boundary conditions **European Control Conference 1991** ,1991-07-02 Proceedings of the European Control Conference 1991 July 2 5 1991 Grenoble France

Semilinear Hyperbolic Problems In Bounded Domains Book Review: Unveiling the Power of Words

In some sort of driven by information and connectivity, the ability of words has be evident than ever. They have the capacity to inspire, provoke, and ignite change. Such may be the essence of the book **Semilinear Hyperbolic Problems In Bounded Domains**, a literary masterpiece that delves deep into the significance of words and their impact on our lives. Compiled by a renowned author, this captivating work takes readers on a transformative journey, unraveling the secrets and potential behind every word. In this review, we shall explore the book is key themes, examine its writing style, and analyze its overall affect readers.

Semilinear Hyperbolic Problems In Bounded Domains Introduction

In this digital age, the convenience of accessing information at our fingertips has become a necessity. Whether its research papers, eBooks, or user manuals, PDF files have become the preferred format for sharing and reading documents. However, the cost associated with purchasing PDF files can sometimes be a barrier for many individuals and organizations. Thankfully, there are numerous websites and platforms that allow users to download free PDF files legally. In this article, we will explore some of the best platforms to download free PDFs. One of the most popular platforms to download free PDF files is Project Gutenberg. This online library offers over 60,000 free eBooks that are in the public domain. From classic literature to historical documents, Project Gutenberg provides a wide range of PDF files that can be downloaded and enjoyed on various devices. The website is user-friendly and allows users to search for specific titles or browse through different categories. Another reliable platform for downloading Semilinear Hyperbolic Problems In Bounded Domains free PDF files is Open Library. With its vast collection of over 1 million eBooks, Open Library has something for every reader. The website offers a seamless experience by providing options to borrow or download PDF files. Users simply need to create a free account to access this treasure trove of knowledge. Open Library also allows users to contribute by uploading and sharing their own PDF files, making it a collaborative platform for book enthusiasts. For those interested in academic resources, there are websites dedicated to providing free PDFs of research papers and scientific articles. One such website is Academia.edu, which allows researchers and scholars to share their work with a global audience. Users can download PDF files of research papers, theses, and dissertations covering a wide range of subjects. Academia.edu also provides a platform for discussions and networking within the academic community. When it comes to downloading Semilinear Hyperbolic Problems In Bounded Domains free PDF files of magazines, brochures, and catalogs, Issuu is a popular choice. This digital publishing platform hosts a vast collection of publications from around the world. Users can search for specific titles or explore various categories and genres. Issuu offers a seamless reading experience with its user-friendly interface and allows users to download PDF files for offline reading. Apart from dedicated platforms, search engines also play a crucial role in finding free PDF files. Google, for instance, has an advanced search feature that allows users to filter results by file type. By specifying the file type as "PDF," users can find websites that offer free PDF downloads on a specific topic. While downloading

Semilinear Hyperbolic Problems In Bounded Domains free PDF files is convenient, its important to note that copyright laws must be respected. Always ensure that the PDF files you download are legally available for free. Many authors and publishers voluntarily provide free PDF versions of their work, but its essential to be cautious and verify the authenticity of the source before downloading Semilinear Hyperbolic Problems In Bounded Domains. In conclusion, the internet offers numerous platforms and websites that allow users to download free PDF files legally. Whether its classic literature, research papers, or magazines, there is something for everyone. The platforms mentioned in this article, such as Project Gutenberg, Open Library, Academia.edu, and Issuu, provide access to a vast collection of PDF files. However, users should always be cautious and verify the legality of the source before downloading Semilinear Hyperbolic Problems In Bounded Domains any PDF files. With these platforms, the world of PDF downloads is just a click away.

FAQs About Semilinear Hyperbolic Problems In Bounded Domains Books

How do I know which eBook platform is the best for me? Finding the best eBook platform depends on your reading preferences and device compatibility. Research different platforms, read user reviews, and explore their features before making a choice. Are free eBooks of good quality? Yes, many reputable platforms offer high-quality free eBooks, including classics and public domain works. However, make sure to verify the source to ensure the eBook credibility. Can I read eBooks without an eReader? Absolutely! Most eBook platforms offer web-based readers or mobile apps that allow you to read eBooks on your computer, tablet, or smartphone. How do I avoid digital eye strain while reading eBooks? To prevent digital eye strain, take regular breaks, adjust the font size and background color, and ensure proper lighting while reading eBooks. What the advantage of interactive eBooks? Interactive eBooks incorporate multimedia elements, quizzes, and activities, enhancing the reader engagement and providing a more immersive learning experience. Semilinear Hyperbolic Problems In Bounded Domains is one of the best book in our library for free trial. We provide copy of Semilinear Hyperbolic Problems In Bounded Domains in digital format, so the resources that you find are reliable. There are also many Ebooks of related with Semilinear Hyperbolic Problems In Bounded Domains. Where to download Semilinear Hyperbolic Problems In Bounded Domains online for free? Are you looking for Semilinear Hyperbolic Problems In Bounded Domains PDF? This is definitely going to save you time and cash in something you should think about.
