**Sense and Nonsense of Statistical Inference** Charmont Wang, 2020-07-24 This volume focuses on the abuse of statistical inference in scientific and statistical literature as well as in a variety of other sources presenting examples of misused statistics to show that many scientists and statisticians are unaware of or unwilling to challenge the chaotic state of statistical practices The book provides examples of ubiquitous statistical tests taken from the biomedical and behavioural sciences economics and the statistical literature discusses conflicting views of randomization emphasizing certain aspects of induction and epistemology reveals fallacious practices in statistical causal inference stressing the misuse of regression models and time series analysis as instant formulas to draw causal relationships treats constructive uses of statistics such as a modern version of Fisher's puzzle Bayesian analysis Shewhart control chart descriptive statistics chi square test nonlinear modeling spectral estimation and Markov processes in quality control

Shibles, 2010-11-03 This book challenges the unchallenged methods in medicine such as evidence based medicine which claim to be but often are not scientific It completes medical care by adding the comprehensive humanistic perspectives and philosophy of medicine No specific or absolute recommendations are given regarding medical treatment moral approaches or legal advice Given rather is discussion about each issue involved and the strongest arguments indicated Each argument is subject to further critical analysis This is the same position as with any philosophical medical or scientific view The argument that decision making in medicine is inadequate unless grounded on a philosophy of medicine is not meant to include all of philosophy and every philosopher On the contrary it includes only sound practical and humanistic philosophy and philosophers who are creative and critical thinkers and who have concerned themselves with the topics relevant to medicine These would be those philosophers who engage in practical philosophy such as the pragmatists humanists naturalists and ordinary language philosophers A new definition of our own philosophy of life emerges and it is necessary to have one Good lifestyle no longer means just abstaining from cigarettes alcohol and getting exercise It also means living a holistic life which includes all of one
