Sensitive Populations and Environmental Standards Robert D. Friedman, 1981

Genomics and Environmental Regulation Richard R. Sharp, Gary E. Marchant, Jamie A. Grodsky, 2008-10-14 To reduce the deleterious effects of environmental contamination governments across the world have enacted regulations broadly conceived for entire populations Information arising out of the Human Genome Project and other cutting edge genetic research is shifting the policymaking process This fascinating volume draws on experts from academia government industry and nongovernmental organizations to examine the science of genomic research as applied to environmental policy The first section explores environmental policy applications including subpopulation genetic profiling industrial regulations and standardizing governmental evaluation of genomic data The second section assesses from multiple angles the legal framework involved in applying genomics to environmental regulation In the third section the contributors review closely the implications of genomic research for occupational health from disease prevention and genetic susceptibility to toxicants to workers rights and potential employment discrimination A fourth section explores the bioethical and philosophical complications of bringing genetic data and research into nonclinical regulatory frameworks *Genomics and Environmental Regulation* points to ways in which information on toxicology and genetics can be used to craft more precise and efficient regulations Wendy Wagner University of Texas

Public Policies for Environmental Protection Paul R. Portney, 2016-03-17 Originally published in 1990 this study tracks the issues progress and problems in environmental issues in the United States from the 1980 s Improvements in air and water quality as well as regulation of hazardous waste and toxic substances has led to new policies such as the Superfund Act and a general increase in awareness about environmental issues on a federal level Placing an emphasis on economics these papers analyse the effectiveness of environmental policy and progress made in relation to air pollution water quality hazardous wastes toxic substances and enforcement of regulations This title will be of interest to students of environmental studies

Environmental Law, Policy, and Economics Nicholas Askounes Ashford, Charles C. Caldart, 2008 The past twenty five years have seen a significant evolution in environmental policy with new environmental legislation and substantive amendments to earlier laws significant advances in environmental science and changes in the treatment of science and scientific uncertainty by the courts This book offers a detailed discussion of the important issues in environmental law policy and economics tracing their development over the past few decades through an

examination of environmental law cases and commentaries by leading scholars The authors focus on pollution addressing both pollution control and prevention but also emphasize the evaluation design and use of the law to stimulate technical change and industrial transformation arguing that there is a need to address broader issues of sustainable development Environmental Law Policy and Economics which grew out of courses taught by the authors at MIT treats the traditional topics covered in most classes in environmental law and policy including common law and administrative law concepts and the primary federal legislation But it goes beyond these to address topics not often found in a single volume the information based obligations of industry enforcement of environmental law market based and voluntary alternatives to traditional regulation risk assessment environmental economics and technological innovation and diffusion Countering arguments found in other texts that government should play a reduced role in environmental protection this book argues that clear stringent legal requirements coupled with flexible means for meeting them and meaningful stakeholder participation are necessary for bringing about environmental improvements and technological transformations
