authors attempt to establish a dialogue with the reader by means of proposed experiments and open ended questions that are designed to both reinforce and question the text This volume is intended to be a book of ideas for the novice or seasoned researcher in neuroscience **Sensing Law** Sheryl Hamilton,Diana Majury,Dawn Moore,Neil Sargent,Christiane

Wilke,2016-11-25 A rich collection of interdisciplinary essays this book explores the question what is to be found at the intersection of the sensorium and law s empire Examining the problem of how legal rationalities try to grasp what can only be sensed through the body these essays problematize the Cartesian framework that has long separated the mind from the body reason from feeling and the human from the animal In doing so they consider how the sensorium can operate variously as a tool of power or as a means of countering the exercise of regulatory force The senses it is argued operate as a vector for the implication of subjects in legal webs but also as a powerful site of resistance to legal definition and determination From the sensorium of animals to technologically mediated perception the ways in which the law senses and the ways in which senses are brought before the law invite a questioning of the categories of liberal humanism And as this volume demonstrates this questioning opens up the both interesting and important possibility of imagining other sensual subjectivities *Signs in the Dust* Nathan Lyons,2019-02-28 Modern thought is characterized by a dichotomy of meaningful

culture and unmeaning nature Signs in the Dust uses medieval semiotics to develop a new theory of nature and culture that resists this familiar picture of things Through readings of Thomas Aquinas Nicholas of Cusa and John Poinsett John of St Thomas it offers a semiotic analysis of human culture in both its anthropological breadth as an enterprise of creaturely sign making and its theological height as a finite participation in the Trinity which can be understood as an absolute cultural nature Signs in the Dust then extends this account of human culture backwards into the natural depth of biological and physical nature It puts the biosemiotics of its medieval sources along with Felix Ravaisson s philosophy of habit into dialogue with the Extended Evolutionary Synthesis that is emerging in contemporary biology to show how all living things participate in semiosis so that that a cultural dimension is present through the whole order of nature and the whole of natural history It also retrieves Aquinas doctrine of intentions in the medium to show how signification can be attributed in a diminished way to even inanimate nature with the ontological implication that being as such should be reconceived in semiotic terms The phenomena of human culture are therefore to be understood not as breaks with a meaningless nature but instead as heightenings and deepenings of natural movements of meaning that long precede and far exceed us Against the modern divorce of nature and culture Signs in the Dust argues that culture is natural and nature is cultural through and through

Life's Solution Simon Conway Morris,2003-09-04 The assassin s bullet misses the Archduke s carriage moves forward and a catastrophic war is avoided So too with the history of life Re run the tape of life as Stephen J Gould claimed and the outcome must be entirely different an alien world without humans and maybe not even intelligence The history of life is littered with accidents any twist or turn may lead to a completely different world Now this view is being challenged Simon

Conway Morris explores the evidence demonstrating life's almost eerie ability to navigate to a single solution repeatedly. Eyes, brains, tools, even culture, all are very much on the cards. So if these are all evolutionary inevitabilities, where are our counterparts across the galaxy? The tape of life can only run on a suitable planet, and it seems that such Earth-like planets may be much rarer than hoped. Inevitable humans, yes, but in a lonely Universe.
