Sentencing State And Federal Law In Victoria:

Sentencing, State and Federal Law in Victoria, 1985 *Australian Cartel Regulation* Caron Beaton-Wells, Brent Fisse, 2011-04-25 Cartel regulation is a prime element of competition policy and an essential means of minimising the adverse effects of cartel activity on economic welfare However effective cartel regulation poses distinct challenges for governments competition authorities and commentators across the globe In *Australian Cartel Regulation* leading competition law experts Caron Beaton Wells and Brent Fisse reflect on developments in anti cartel law in Australia over the last 30 years They provide a comprehensive account of the current law on cartels as well as discussing key issues that may arise in the future This definitive volume not only identifies the practical and theoretical issues but also recommends workable solutions and does so with the benefit of comparative analysis of the anti cartel laws of major overseas jurisdictions Many of the issues identified and discussed in *Australian Cartel Regulation* are common to any scheme designed to regulate cartel conduct

Fox & Freiberg's Sentencing Arie Freiberg, 2014 **Penal Populism, Sentencing Councils and Sentencing Policy** Arie Freiberg, Karen Gelb, 2014-03-05 Public outcries and political platforms based on misinformation and misconceptions about the criminal justice system and current sentencing practice occur all too often in democratic societies *Penal Populism Sentencing Councils and Sentencing Policy* attempts to address this problem by bringing together important contributions from a number of distinguished experts in the field *Penal Populism* presents theoretical perspectives on the role of the public in the development of sentencing policy It places particular emphasis on the emerging role of sentencing commissions advisory councils or panels in a number of English speaking countries Australia New Zealand the United States the United Kingdom Scotland and South Africa The book explains expands and develops the existing literature that looks at public attitudes to justice and the role that the public can play in influencing policy Written in a scholarly yet accessible style *Penal Populism* asks the critical questions should public opinion or preferably public judgment be relevant to court decision making to institutional decision making and to the political process And if so how **Sentencing and Criminal Justice** Andrew Ashworth, Rory Kelly, 2021-07-15 This revised and updated new edition focuses on major developments in sentencing law practice and theory *Sentencing in England and Wales* is now dominated by Sentencing Council guidelines and scrutiny of those guidelines is central to this book Issues of principle are identified and discussed to include the constitutional position of the Sentencing Council the meaning of and challenges to proportionality and the sentencing of BAME offenders and women offenders The book welcomes the new Sentencing Code introduced as the Sentencing Act 2020 and critically examines the government's plans for sentencing reform set out in the 2020 White Paper *A Smarter Approach to Sentencing* Throughout the book sentencing is explored in its wider criminal justice context making it essential reading for courses on sentencing criminal justice and criminal law **Towards Human Rights Compliance in Australian Prisons** Anita Mackay, 2020-11-11 Imprisoned people have always been vulnerable and in need of human rights protections The slow but

steady growth in the protection of imprisoned people's rights over recent decades in Australia has mostly come from incremental change to prison legislation and common law principles. A radical influence is about to disrupt this slow change. Australian prisons and other closed environments will soon be subject to international inspections by the United Nations Subcommittee on the Prevention of Torture (SPT). This is because the Australian Government ratified the Optional Protocol to the Convention Against Torture and other Cruel, Inhuman or Degrading Treatment or Punishment (OPCAT) in December 2017. Australia's international human rights law obligations as they apply to prisons are complex and stem from multiple Treaties. This book distils these obligations into five prerequisites for compliance consistent with the preventive focus of the OPCAT. They are: reduce reliance on imprisonment; align domestic legislation with Australia's international human rights law obligations; shift the focus of imprisonment to the goal of rehabilitation and restoration; support prison staff to treat imprisoned people in a human rights consistent manner; ensure decent physical conditions in all prisons. Attention to each of these five areas will help all levels of Australian government and prison managers take the steps required to move towards compliance. Human rights led prison reform is necessary both to improve the lives of imprisoned people and for Australia to achieve compliance with the international human rights legal obligations to which it has voluntarily committed itself.

Its scope extends to both serious and minor regulatory regimes as well as the entire contemporary breadth of criminal law, ranging from pollution to public order, traffic to trafficking and domestic violence to work safety. The Handbook of Comparative Criminal Law Kevin Jon Heller, Markus Dubber, 2010-12-01. This handbook explores criminal law systems from around the world with the express aim of stimulating comparison and discussion. General principles of criminal liability receive prominent coverage in each essay, including discussions of rationales for punishment, the role and design of criminal codes, the general structure of criminal liability, accounts of mens rea and the rights that criminal law is designed to protect. Before the authors turn to more specific offenses like homicide, theft, sexual offenses, victimless crimes and terrorism, this key reference covers all of the world's major legal systems: common civil, Asian and Islamic law traditions, with essays on sixteen countries on six different continents. The introduction places each country within traditional distinctions among legal systems and explores noteworthy similarities and differences among the countries covered, providing an ideal entry into the fascinating range of criminal law systems in use.

the world over **Dangerous Offenders** Mark Brown, John Pratt, 2002-01-04 This highly controversial new book considers how the dangerous offender has become such a figure of collective anxiety for the citizens of rationalised Western societies. The authors consider ideas of danger and social threat in historical perspective, legal responses to violent criminals, attempts to predict dangerous behaviour, why particular groups such as women remain at risk from violent crime. This inspired collection invites us to rethink the received wisdom on dangerous offenders and will be of interest to students and scholars in the fields of criminology and the sociology of Risk **The Role of the Media in Criminal Justice Policy** Natalia

Antolak-Saper, 2022-09-09 This book provides a socio-legal examination of the media's influence on the development and implementation of criminal justice policy. This impact is often assumed. And especially in the wake of high-profile crimes, the press is routinely observed calling for sentences to be harsher and for governments to be tougher on crime. But how do we know that there is a connection? To answer this question, the book draws on a case study of the media reporting of the rape and murder of Jill Meagher in Melbourne, Australia, as well as other well-known cases including those of James Bulger, Sarah Payne, Stephen Lawrence, and Michael Brown, among others. Deploying a socio-legal framework to examine how the media's often powerful and emotive narratives play a crucial role in the development and implementation of law, the book provides a deep and critical reflection on its influence. The book concludes with a number of suggestions for media reform, both to moderate the media's influence and to incorporate a broader range of viewpoints. This multi-disciplinary book will appeal to scholars and students in socio-legal studies, criminology, and criminal law, as well as those working in relevant areas in sociology and media studies **Judicial Applications of Artificial Intelligence** Giovanni Sartor, L. Karl

Branting, 2013-04-17 The judiciary is in the early stages of a transformation in which AI (Artificial Intelligence) technology will help to make the judicial process faster, cheaper, and more predictable without compromising the integrity of judges' discretionary reasoning. Judicial decision-making is an area of daunting complexity where highly sophisticated legal expertise merges with cognitive and emotional competence. How can AI contribute to a process that encompasses such a wide range of knowledge, judgment, and experience? Rather than aiming at the impossible dream or nightmare of building an automatic judge, AI research has had two more practical goals: producing tools to support judicial activities, including programs for intelligent document assembly, case retrieval, and support for discretionary decision-making; and developing new analytical tools for understanding and modeling the judicial process, such as case-based reasoning and formal models of dialectics, argumentation, and negotiation. Judges, squeezed between tightening budgets and increasing demands for justice, are desperately trying to maintain the quality of their decision-making process while coping with time and resource limitations. Flexible AI tools for decision support may promote uniformity and efficiency in judicial practice while supporting rational judicial discretion. Similarly, AI may promote flexibility, efficiency, and accuracy in other judicial tasks, such as drafting various judicial documents. The contributions in this volume exemplify some of the directions that the AI transformation of the

A Theory of Legal Punishment Matthew Altman, 2021-05-05 This book argues for a mixed theory of legal punishment that treats both crime reduction and retribution as important aims of the state A central question in the philosophy of law is why the state's punishment of its own citizens is justified Traditionally two theories of punishment have dominated the field consequentialism and retributivism According to consequentialism punishment is justified when it maximizes positive outcomes According to retributivism criminals should be punished because they deserve it This book recognizes the strength of both positions According to the two tiered model the institution of punishment and statutory penalties as set by the

legislature are justified based on their costs and benefits in terms of deterrence and rehabilitation The law exists to preserve the public order Criminal courts by contrast determine who is punished and how much based on what offenders deserve The courts express the community's collective sense of resentment at being wronged This book supports the two tiered model by showing that it accords with our moral intuitions commonly held compatibilist theories of freedom and assumptions about how the extent of our knowledge affects our obligations It engages classic and contemporary work in the philosophy of law and explains the theory's advantages over competing approaches from retributivists and other mixed theorists The book also defends consequentialism against a longstanding objection that the social sciences give us little guidance regarding which policies to adopt Drawing on recent criminological research the two tiered model can help us to address some of our most pressing social issues including the death penalty drug policy and mass incarceration This book will be of interest to philosophers legal scholars policymakers and social scientists especially criminologists economists and political scientists

The Oxford Handbook of the Philosophy of Punishment Jesper Ryberg, 2024-11 **Public Sector Criminological Research** Russell G. Porter, Baden Offord, 2006 Papers originally presented at an international conference held in Australia 2003 *Government Managing Risk* Bruce Chapman, 2006-09-27 Higher education rates are increasing throughout the Western world yet at the same time government budgets face increasing constraints This has ensured that the importance of student support is recognized in many countries In recent years there has been a world wide movement towards the use of income contingent loans ICL for higher education ICLs are now used in six countries following the Australian innovation of 1989 with the governments of many more countries looking very seriously at the model This impressive new book by Bruce Chapman analyzes ICLs particularly their use in supporting students exploring the experiences of a number of other countries adopting them Chapman presents analysis of a number of disparate case studies to illustrate how ICLs can aid risk management policy reforming in both progressive and administratively feasible ways This book describes examines and promotes an exciting new role for the public sector as a manager of risk and argues that ICLs have enormous potential to change the extent and nature of social and economic
