Voss,2020-09-21 This volume addresses controversies connected to the testing of the capacities and potentials of mediums Today we commonly associate the term medium with the technical communication between transmitters and receivers Yet this term likewise applies to those who cooperate with agencies that exceed the presumed domain of the material world Insofar as one presumes a division between distinctly opposed categories of religion and the secular technical media tend to be associated with the secular and human trance mediums tend to be associated with religion after 1900 This volume concerns the ways in which the term medium still marks an overlapping of and thus problematizes the aforementioned division between religion and the secular the personal and the technological The term medium carries with it a seed of doubt that is itself inseparable from investment in the medium s power insofar as they communicate with an other realm mediums offer the hope and promise of new possibilities and improved efficiency and thus of a better life yet they have simultaneously been under suspicion of altering or even inventing the messages they communicate It is due to this combination of promise and suspicion that mediumism has tended to evoke scientific religious and moral controversies Thus we can speak of a mediumistic trial that is a process in which a medium is put to the test concerning its potentials and trustworthiness Around 1800 experts were asked if a modern secular institution would be capable of inspiring domesticating or excluding trance mediumship This question has stayed with us ever since and the answers have remained inconclusive That is why the past and present of mediumship may be asked to elucidate each other      Substance Abuse Michael Floyd,J Paul Seale,2018-08-17
