*Russian Executive Government Encyclopedic Directory* ,2003      Biowarrior Igor V. Domaradskij,Wendy Orent,2010-05 This extraordinary memoir by a leading Russian scientist who worked for decades at the nerve center of the top secret Biopreparat offers a chilling look into the biological weapons program of the former Soviet Union vestiges of which still exist today in the Russian Federal Republic Igor Domaradskij calls himself an inconvenient man a dedicated scientist but a nonconformist who was often in conflict with government and military apparatchiks In this book he reveals the deadly nature of the research he participated in for almost fifteen years From 1950 till 1973 Domaradskij played an increasingly important role as a specialist in the area of epidemic bacterial infections He was largely responsible for an effective system of plague control within the former USSR which prevented mass outbreaks of rodent born diseases But after twenty three years of

making significant scientific contributions his work was suddenly redirected Under pressure from the Soviet military he helped design create and direct Biopreparat the goal of which was to develop new types of biological weapons From the inception of this highly secret venture Domaradskij openly expressed his skepticism and criticized it as a risky gamble and a serious error by the government Eventually his critical attitude forced him out of the communist party and finally cost him the opportunity of continuing his scientific work Domaradskij goes into great detail about the secrecy intrigue and the bureaucratic maze that enveloped the Biopreparat scientists making them feel like helpless pawns What stands out in his account is the hasty patchwork nature of the Soviet effort in bioweaponry Far from being a smooth running terrifying monolith this was an enterprise cobbled together out of the conflicts and contretemps of squabbling party bureaucrats military know nothings and restless ambitious scientists In some ways the inefficiency and lack of accountability in this system make it all the more frightening as a worldwide threat For today its dimensions are still not fully known nor is it certain that any one group is completely in control of the proliferation of this lethal weaponry Biowarrior is disturbing but necessary reading for anyone wishing to understand the nature and dimensions of the biological threat in an era of international terrorism Igor V Domaradskij Moscow Russia is chief research fellow of the Moscow Gabrichevsky G N Institute of Epidemiology and Microbiology a member of the Russian Academy of Medical Sciences and the Academy of Natural Sciences of Russia and the author of fourteen books on microbiology biochemistry and immunology Wendy Orent Atlanta GA is a freelance writer and ethnologist

**War Scare** Peter Pry, 1999-09-30 Why do some American intelligence officials maintain fallout shelters and private contingency plans to evacuate their families in the event of a Russian nuclear strike even in today's post Cold War era of U S Russian partnership The frightening answer lies within the pages of War Scare a terrifying assessment of the prospect for nuclear holocaust in our day Written by Peter Vincent Pry a former CIA military analyst War Scare provides a history of our country's little known brushes with nuclear war and warns that contrary to popular opinion and the assurances of our political leaders the possibility of a Russian attack still exists Nuclear deterrence has been the foundation of Western security for the last 50 years but since the end of the Cold War Russian military doctrine has become more destabilizing and much more dangerous than is commonly believed By making use of a wealth of declassified and unclassified material Dr Pry illustrates how Russia's brutal past continues to shape the consciousness and decision making of its leaders many of whom are unreconstructed ideologues from the old Soviet regime Gripped by a perpetual perception of imminent threat a war scare the Russian General Staff which controls the technical capability of launching a nuclear strike has shown itself to be unstable at best The author explores recent history and near disasters such as the Bosnian crisis the Norway missile incident and U S air strikes on Iraq from the perspective of the Russian General Staff believing that only by understanding their viewpoint can we minimize the risk of unintentionally

provoking a deadly attack Wary of NATO expansion and reeling from the Russian economy's descent into chaos the General Staff may interpret Western military exercises and operations in the Middle East and elsewhere as concealing surprise aggression against Russia This is a grave situation indeed as even after the START I II and III agreements Russia will retain enough nuclear weapons to destroy the world not to mention significantly expanded chemical and biological warfare capability War Scare convincingly shows that we ignore these facts at our peril Religion and Violence in Russia Olga Oliker, 2018-06-13 Religious violence is surely as old as both faith and fighting themselves In the Russian Federation as elsewhere in the world religious teachings and philosophies are used both to justify and combat violence While many including Russian authorities increasingly view religious conflict through the prism of violent radical Islamic jihadism the full picture is much more complicated It includes religious propaganda employed by violent right wing groups violent repression of religious communities and organizations by local and federal authorities and conflict within religious confessions Violence may be couched in the language of self defense as modernity clashes with a multitude of perceived and real traditions A better understanding of the dynamics at the heart of religious violence in Russia in its many manifestations is critical to the country's future development and its security The analyses collected in this volume aim to contribute to the body of knowledge on these topics and inform policy solutions to make Russia and Russians of all religions and no religion safer and more secure *Russia Executive Government Encyclopedic Directory Volume 2 Top Government Officials: Strategic Information and Contacts* IBP USA, 2013-08 2011 Updated Reprint Updated Annually Russia Executive Government Encyclopedic Directory **European Union and Strategy** Kjell Engelbrekt, Jan Hallenberg, 2010-09-13 This edited volume sets out to explore the paradox that the European Union EU produces policies with strategic qualities but lacks the institutions and concepts to engage in strategic reasoning and action proper The book has a two fold agenda exploring current EU external policies that are or seem to be linked to strategic priorities and also studying the concept of strategy in the particular context of EU decision and policymaking The volume first examines the character of the Union as a strategic actor at this stage of its development It then explores the ability of the Union to act and otherwise influence both its periphery and the wider world focusing in particular on how it is perceived by other actors The final section comprises personal assessments by a group of contributors regarding the character of the union as a strategic actor in the present and future When these are pieced together a picture emerges of a European strategy in the making albeit one that so far is modest and partial This book will be of interest to students of European Security European Politics and IR **Sight and Sound**, 2000 **Russia Executive Government Encyclopedic Directory Volume 1 Federal Government - Strategic Information and Contacts** IBP USA, 2013-08 Russia Executive Government Encyclopedic Directory VOL 1 2012 **Former Soviet Biological Weapons Facilities in Kazakhstan** Gulbarshyn Bozheyeva, Yerlan Kunakbayev, Dastan Yeleukenov, 1999 *Russia Executive Government Encyclopedic Directory* IBP USA Staff, 2013-08 2011 Updated Reprint Updated Annually

*Central Asia Human Development Report* Johannes F. Linn, Martha Blaxall, 2005 This report is a comprehensive analysis of the many challenges that confront Central Asia including high trade costs environmental devastation increased inequality rising migration the rapid spread of HIV AIDS and poor governance There has been recent progress towards regional cooperation but the barriers created by borders negatively affect peoples lives It is contended that increased cooperation among the Central Asian republics Kazakhstan Kyrgyzstan Tajikistan Turkmenistan and Uzbekistan would produce substantial political and economic gains including income increases of 50 percent to 100 percent over the next ten years The cost of non cooperation is continued deterioration in income distribution social services and general living conditions according to the Report and possibly a descent into the vicious cycle of economic crisis and corrupt governance that often leads to social unrest
