**Serial Verb Constructions** Aleksandra IľUľr'evna Aikhenval'd, R.M.W. Dixon, 2006 A serial verb construction is a sequence of verbs which acts together as one This outstanding book is the first to study the phenomenon across languages of different typological and genetic profiles The authors all experienced linguistic fieldworkers follow a unified typological approach and avoid formalisms

Proceedings of 27th International Symposium on Frontiers of Research in Speech and Music Keikichi Hirose, Deepak Joshi, Shankha Sanyal, 2024-06-18 This book features original papers from 27th International Symposium on Frontiers of Research in Speech and Music FRSM 2023 jointly organized by Sardar Vallabhbhai National Institute of Technology Surat India and Sir C V Raman Centre for Physics and Music Jadavpur University Kolkata India during 4 5 August 2023 The book is organized into four main sections considering both technological advancement and interdisciplinary nature of speech music language and their applications The first section includes chapters related to computational modelling and cognitive aspects of the speech signal The second part contains chapters covering the foundations of both vocal and instrumental music processing with the signal computational and cognitive aspects The third section relates to the variety of research being done in the peripheral areas of languages and linguistics with special focus on regional languages of India A lot of research is being performed within the speech and music information retrieval domain which is potentially interesting for most users of computers and the Internet Therefore the fourth and final section is dedicated to the chapters related to multidisciplinary applications of speech and music signal processing

**Serial Verb Constructions in Austronesian and Papuan Languages** Gunter Senft, 2008 This volume of new work explores the nature of verb serialisation in a range of languages from the Pacific region both Austronesian and non Austronesian Serial verbs can be described linguistically as a sequence of verbs which behave as a single complex predicate A particular focus of this book is the detailed examination given by most authors to the relationship of such uniclausal linguistic structures with the real world notion of eventhood The book also makes a valuable addition to the description and analysis of serial verb constructions from the Pacific a region which has generally been under represented in cross linguistic discussions of verb serialisation The book will appeal to syntacticians and typologists as well as to Austronesianists and Papuanists Provided by publisher

A Grammar of Vaeakau-Taumako Åshild Næss, Even Hovdhaugen, 2011-06-30 Vaeakau Taumako also known as Pileni is a Polynesian Outlier language spoken in the Reef and Duff Islands in the Solomon Islands Temotu Province This is an area of great linguistic diversity and long standing language contact which has had far reaching effects on the linguistic situation Historically speakers of Vaeakau Taumako were shipbuilders and navigators who made trade voyages throughout the area bringing them into constant contact with speakers of the Reefs Santa Cruz Utupua and

Vanikoro languages The latter languages are only distantly related to Vaeakau Taumako making up an only recently identified first order subgroup of Oceanic Polynesian speakers first arrived in the area some 700 1000 years ago from the core Polynesian areas to the east While today most intra group communication takes place in Solomon Islands Pijin traditionally the situation was one of extensive multilingualism and this has left profound traces in the grammar of Vaeakau Taumako which shows a number of structural properties not known from other Polynesian languages A Grammar of Vaeakau Taumako is the most comprehensive grammar of any Polynesian Outlier to date and the first full length grammar of any language of Temotu Province Based on extensive fieldwork it is structured as a reference grammar dealing with all aspects of language structure from phonology to discourse organization and including a selection of glossed texts It will be of interest to typologists Oceanic linguists and researchers interested in language contact P Language Description, History and Development Jeff Siegel, John Lynch, Diana Eades, 2007-03-14 This volume in memory of Terry Crowley covers a wide range of languages Australian Oceanic Pidgins and Creoles and varieties of English Part I Linguistic Description and Typology includes chapters on topics such as complex predicates and verb serialization noun incorporation possessive classifiers diphthongs accent patterns modals in Australian English and directional terms in atoll based languages Part II Historical Linguistics and Linguistic History ranges from the reconstruction of Australian languages to reflexes of Proto Oceanic to the lexicon of early Melanesian Pidgin Part III Language Development and Linguistic Applications comprises studies of lexicography language in education and language endangerment and language revival spanning the Pacific from South Australia and New Zealand to Melanesia and on to Colombia The volume will whet the appetite of anyone interested in the latest linguistic research in this richly multilingual part of the globe **Associated Motion** Antoine Guillaume, Harold Koch, 2021-03-08 This volume is the first book length presentation of the grammatical category of Associated Motion It provides a framework for understanding a grammatical phenomenon which though present in many languages has gone unrecognized until recently Previously known primarily from languages of Australia and South America grammatical AM marking has now been identified in languages from most parts of the world except Europe and is becoming an important topic in linguistic typology The chapters provide a thorough introduction to the subject discussion of the relation between AM and related grammatical concepts detailed descriptions of AM in a wide range of the world s languages and surveys of AM in particular language families and areas *New Perspectives in Role and Reference Grammar* Wataru Nakamura, 2011-09-22 *New Perspectives in Role and Reference Grammar* presents a broad picture of current developments in Role and Reference Grammar RRG a version of parallel structure grammar with an emphasis on typological adequacy Since its inception RRG has been applied to a wide range of languages in particular to case marking complex clauses e g control raising and serial verb constructions unaccusativity unergativity and the interplay between syntax and information structure The present book is a continued investigation of the intermodular correspondence in a variety of languages and comprises 13 papers which not

only contribute to the further development of the theory but also investigate controversial areas of linguistic theory including inflectional and derivational morphology verbal semantics and argument structure anticausative and serial verb constructions the argument adjunct distinction an extended typology of complex clauses the syntax information structure interface and interactions between the lexicon and constructions In addition three papers illustrate how RRG may be applied to sign languages language acquisition and machine translation from Arabic to English

**Melanesian Pidgin and Tok Pisin** John W.M. Verhaar, S.J.,1990-01-01 The First International Conference on Pidgins and Creoles in Melanesia was planned mainly for Tok Pisin but no predetermined theme s had been proposed to the participants Nevertheless in this collection of papers several principal themes stand out One is that of a revived interest in substratology both for Tok Pisin and for Bislama Another is what in fact amounts to a change in perspective from universalism as supposedly competitive with the substratological orientation towards a generalist approach to typology which reduces the apparent polarity from a theoretical point of view A third is the pervasive interest of contributors in wider language issues in the social and political life of Papua New Guinea These interests go back to the linguistic and social experience of the participants most of whom have a long record of living among the people whose languages they have studied on a day to day basis and to the relative remoteness of their inspiration from the more theoretical and perhaps ultimately untestable issues which surround the universalist approach and its claims for a bioprogram foundation for language

**Form and Function in Language Research** Johannes Helmbrecht,Yoko Nishina,Yong-Min Shin,Stavros Skopeteas,Elisabeth Verhoeven,2009-09-07 Language description enriches linguistic theory and linguistic theory sharpens language description Based on evidence from the world s languages functional typological linguistics has established a number of thorough generalizations about the nature of linguistic categorizations and their manifestation in natural languages Empirical studies in these fields of linguistics have contributed to sharpen linguistic theory in several respects This volume is a collection of 19 contributions from outstanding scholars in the field of functional typological linguistics that address fundamental issues in the study of language such as the nature of linguistic categories the constitution of functional domains and the form of cross linguistic continua Empirical data from individual languages and from typological samples are investigated in order to achieve generalizations about the properties of human grammar s Several grammatical phenomena are dealt with including tonal systems person distinctions modalities reciprocity complex predicates grammatical relations word order clause linkage and information structure The structure of the book illustrates the fundamental importance of the analytical distinction between the onomasiological and the semasiological approach to language and language diversity Both perspectives are integrated in most papers with a dominant focus on either the former or the latter perspective

*Niuean* Diane Massam,2020-04-09 This volume explores the grammar of Niuean an endangered Polynesian language spoken on the island of Niue and in New Zealand with a focus on the issue of predication Since Aristotle it has been claimed that a sentence consists of a subject and a predicate Niuean

constitutes the perfect testing ground for this claim it displays verb subject object word order in which the subject interrupts the predicate and has an ergative case system in which subjects are not clearly distinguished from objects in their marking for grammatical case Diane Massam uses the framework of generative grammar to carry out a detailed analysis of the internal structure of Niuean predicates and arguments as well as the relations between them touching on many other topics including the nature of displacement word formation determiners and thematic roles The proposal is that Niuean complex predicates are formed via successive inversion prior to the merge of all arguments high argument merge and that the predicate undergoes fronting to initial position across the arguments with the same structure found also in nominal clauses The conclusion is that Niuean does not have a subject in the usual sense and this is related to the fact that the language has isolating morphology lacking all tense and agreement inflection and nominative case Instead the language exhibits low absolutive predication applicative ergative agents and predicate fronting in lieu of subject extraction The book extends our understanding of cross linguistic sentence structure and grammatical case and will be of interest to scholars in the fields of Austronesian linguistics typology and theoretical linguistics

The Linguistics of Sitting, Standing and Lying John Newman, 2002-01-01 This volume explores properties of sit stand and lie verbs reflecting three of the most salient postures associated with humans An introductory chapter by the Editor provides an overview of directions for research into posture verbs These directions are then explored in detail in a number of languages Dutch Korean Japanese Lao Chantyal Magar Tibeto Burman Chipewyan Athapaskan Trumai spoken in Brazil Kxoe Khoisan Mbay Nilo Saharan Oceanic Enga Ku Waru Papuan Arrernte Pitjantjatjara Ngan gityemerri Australian The contributors discuss data relevant to many fields of linguistic inquiry including patterns of lexicalization e g simplex or complex verb forms morphology e g state vs action formations grammaticalization e g extension to locational predicates aspect markers auxiliaries copulas classifiers and figurative extension A final chapter reports on an experimental methodology designed to establish the relevant cognitive parameters underlying speakers judgements on the polysemy of English stand Taken together the chapters provide a wealth of cross linguistic data on posture verbs

*Dependencies in language* N. J. Enfield, 2017-05-16 Dependency is a fundamental concept in the analysis of linguistic systems The many if then statements offered in typology and grammar writing imply a casually real notion of dependency that is central to the claim being made usually with reference to widely varying timescales and types of processes But despite the importance of the concept of dependency in our work its nature is seldom defined or made explicit This book brings together experts on language representing descriptive linguistics language typology functional cognitive linguistics cognitive science research on gesture and other semiotic systems developmental psychology psycholinguistics and linguistic anthropology to address the following question What kinds of dependencies exist among language related systems and how do we define and explain them in natural causal terms

**Serial Verbs** Alexandra Y. Aikhenvald, 2018-10-18 This book provides an in depth typological account of the forms functions and histories of serial verb

constructions Serial verbs in which several verbs combine to form a single predicate describe what is conceptualized as a single event The verbs in the construction have the same tense aspect mood modality and evidentiality values cannot be negated or questioned separately and usually share the same subject and object They are a powerful means of portraying various facets of one event and can express grammatical meanings such as aspect direction and causation particularly in languages where few other means are available In this volume Alexandra Aikhenvald seeks to answer unresolved questions such as What are the parameters of variation in serial verbs How do serial verbs differ from other superficially similar multi verb constructions How do serial verbs emerge and what happens to them over time What role do they play in the representation of event structure The book uses an inductively based framework for the analysis and draws on data from languages with different typological profiles and genetic affiliations It will be of interest to researchers and students from a wide range of fields of linguistics especially typology anthropological linguistics and language contact

*Serial Verbs*  
Aleksandra Iŭr'evna Aikhenval'd, 2018 This book provides an in depth typological account of the forms functions and histories of serial verb constructions in which several verbs combine to form a single predicate It uses an inductively based framework for the analysis and draws on data from languages with different typological profiles and genetic affiliations

**Clause Linking and Clause Hierarchy** Isabelle Bril, 2010 This collective volume explores clause linkage strategies in a cross linguistic perspective with greater emphasis on subordination Part I presents some theoretical reassessment of syntactic terminologies and distinctive criteria for subordination as well as typological methods based on sets of variables and statistics allowing cross linguistic comparability Part II deals with strategies relating to clause chaining conjunctive conjugations converbial constructions masdars Part III centers on the interaction between the syntax pragmatics and semantics of clause linking and subordination in relation to information structure to referential hierarchy and correlative constructions Part IV presents insights in the clause linking and subordinating functions of some T A M markers verbal inflectional morphology and conjugation systems which may also interact with information hierarchy via the backgrounding effects and lack of illocutionary force of some aspect and mood forms The volume is of particular interest to linguists and typologists working on clause linkage systems and on the interface between syntax pragmatics and semantics

**Auxiliary Verb Constructions** Gregory D. S. Anderson, 2006-06-08 This is the most comprehensive survey ever published of auxiliary verb constructions as in he could have been going to drink it and she does eat cheese Drawing on a database of over 800 languages Dr Anderson examines their morphosyntactic forms and semantic roles He investigates and explains the historical changes leading to the cross linguistic diversity of inflectional patterns and he presents his results within a new typological framework The book's impressive range includes data on variation within and across languages and language families In addition to examining languages in Africa Europe and Asia the author presents analyses of languages in Australasia and the Pacific and in North South and Meso America In doing so he reveals much that is new about the language

families of the world and makes an important contribution to the understanding of their nature and evolution His book will interest scholars and researchers in language typology historical and comparative linguistics syntax and morphology

**Bridging constructions** Valérie Guérin,2019 Many descriptive grammars report the use of a linguistic pattern at the interface between discourse and syntax which is known generally as tail head linkage This volume takes an unprecedented look at this type of linkage across languages and shows that there exist three distinct variants all subsumed under the hypernym bridging constructions The chapters highlight the defining features of these constructions in the grammar and their functional properties in discourse The volume reveals that Bridging constructions consist of two clauses a reference clause and a bridging clause Across languages bridging clauses can be subordinated clauses reduced main clauses or main clauses with continuation prosody Bridging constructions have three variants recapitulative linkage summary linkage and mixed linkage They differ in the formal makeup of the bridging clause In discourse the functions that bridging constructions fulfil depend on the text genres in which they appear and their position in the text If a language uses more than one type of bridging construction then each type has a distinct discourse function Bridging constructions can be optional and purely stylistic or mandatory and serve a grammatical purpose Although the difference between bridging constructions and clause repetition can be subtle they maintain their own distinctive characteristics

**Grammaticalization from a Typological Perspective** Heiko Narrog,Bernd Heine,2018 This volume explores the way in which grammaticalization processes converge and differ across languages and language areas Chapters systemically explore these processes languages of Africa Europe Asia and the Pacific and the Americas and in creole languages revealing a number of unique pathways as well as shared features

*Serial Verbs in White Hmong* Nerida Jarkey,2015-06-02 In *Serial Verbs in White Hmong* Nerida Jarkey investigates verb serialization a highly productive grammatical strategy in this dynamic Southeast Asian language in which multiple verbs are simply concatenated within a single clause to depict a single event The investigation identifies four major types of serial verb construction SVC in White Hmong and finds that the key function of all these types is to depict a single event in an elaborate and vivid way a much favoured method of description in this language These findings concerning the nature and function of SVCs in White Hmong contribute to broader discussions on the nature of events as both cognitive and cultural constructs
