The Architectural Models of Theodore Conrad Teresa Fankhänel,2021-06-17 Based on the recent discovery of his fully preserved private archive models photos letters business files and drawings this book tells the story of Theodore Conrad 1910 1994 the most prominent and prolific architectural model maker of the 20th century Conrad s innovative models were instrumental in the design and realization of many icons of American Modernism from the Rockefeller Center to Lever House and the Seagram Building He revolutionized the production of architectural models and became a model making entrepreneur in his own right Yet despite his success and the well known buildings he helped to create until now little has

been known about Conrad's work and his impact on 20th century architectural history. With exclusive access to Conrad's archive as well as that of model photographer Louis Checkman both of which have lain undiscovered in private storage for decades this book examines Conrad's work and legacy accompanied by case studies of his major commissions and full color photographs of his works. Set against the backdrop of the surge in model making in the 1950s and 1960s which Jane Jacobs called The Miniature Boom it explores how Conrad's models prompt broader scholarly questions about the nature of authorship in architecture the importance of craftsmanship and about the translation of architectural ideas between different media. The book ultimately presents an alternative history of American modern architecture highlighting the often overlooked influence of architectural models and their makers.

The Mapmakers John Noble Wilford, 2001-12-04 In his classic text two time Pulitzer Prize winner John Noble Wilford recounts the history of cartography from antiquity to the space age. They are among the world's great pioneers and adventurers the mapmakers who for centuries have been expanding our knowledge of who and where we are and where we want to go. From the surprisingly accurate silk maps prepared by Chinese cartographers in the second century B.C. to medieval mapmakers who believed they had fixed the location of paradise through to the expeditions of Columbus and Magellan John Noble Wilford chronicles the exploits of the great pioneers of mapmaking. Wilford brings the story up to the present day as he shows the impact of new technologies that make it possible for cartographers to go where no one has been before from the deepest reaches of the universe where astronomers are mapping time as well as space to the inside of the human brain. These modern day mapmakers join the many earlier adventurers including ancient Greek stargazers Renaissance seafarers and the explorers who mapped the American West whose achievements shape this dramatic story of human inventiveness and limitless curiosity.
