A Philosophy of Comparisons Hartmut von Sass, 2021-09-09 Comparing is one of the most essential practices in our everyday life as well as in science and humanities In this in depth philosophical analysis of the structure practice and ethics of comparative procedures Hartmut von Sass expands on the significance of comparison Elucidating the ramified structure of comparing von Sass suggests a typology of comparisons before introducing the notion of comparative injustice and the limits of comparisons He elaborates on comparing as practice by relating comparing to three relative practices orienting describing and expressing oneself to unfold some of the most important chapters of what might be called comparativism This approach allows von Sass to clarify the idea of the incomparable distinguish between different versions of incomparability and shed light on important ethical aspects of comparisons today Confronting the claim that we are living in an age of comparisons his book is an important contribution to ideas surrounding all encompassing measurements and scalability and their critique

Incommensurability and its Implications for Practical Reasoning, Ethics and Justice Martijn Boot, 2017-06-27 If values conflict and rival human interests clash we often have to weigh them against each other However under particular conditions incommensurability prevents the assignment of determinable and impartial weights In those cases an objective balance does not exist The original thesis of this book sheds new light on aspects of incommensurability and its implications for public decision making ethics and justice Martijn Boot analyzes a number of previously ignored or unrecognized concepts such as incomplete comparability incompletely justified choice indeterminateness and ethical deficit concepts that are essential for comprehending problems of incommensurability Apart from problematic implications incommensurability has also favourable consequences It creates room for autonomous rational choices that are not dictated by reason Besides insight into incommensurability promotes recognition of different possible rankings of universally valid but sometimes conflicting human values This book avoids unnecessary technical language and is accessible not only for specialists but for a large audience of philosophers ethicists political theorists economists lawyers and interested persons without specialized knowledge

Practices of Comparing Angelika Epple, Walter Erhart, Johannes Grave, 2020-06-22 Practices of comparing shape how we perceive organize and change the world Supposedly innocent practices of comparing play a decisive role in forming categories boundaries and hierarchies but they can also give an impetus to question and change such structures Like almost no other human practice comparing pervades all social political economic and cultural spheres This volume outlines the program of a new research agenda that

places comparative practices at the center of an interdisciplinary exploration Its contributions combine case studies with overarching systematic considerations They show what insights can be gained and which further questions arise when one makes a seemingly trivial practice comparing the subject of in depth research

Mathea Slåttholm Sagdahl,2022 The potential conflicts between morality and self interest lies at the heart of ethics However moral philosophers sometimes think of their task as trying to gain knowledge simply of what we are morally required to do leaving aside the larger normative question of what we ought to do all things considered while others have assumed that what we ought to do all things considered just is what we morally ought to do Mathea Sagdahl grapples with the more fundamental question of what we ought to do all things considered but argues that there may be no simple answer to this question Behind the assumption that there is something we ought to do all things considered often lies another undefended assumption that the strength of moral and prudential reasons actually are comparable Instead of making such an assumption Sagdahl defends a pluralist theory of normativity where morality and prudence form two separate and incommensurable normative standpoints much like Henry Sidgwick s Dualism of Practical Reason This type of view has tended to be quickly dismissed by its opponents but Sagdahl argues that the theory is in fact well motivated and that the typical objections that tend to target it are much weaker than they are usually considered to be

Proportionality in Crime Control and Criminal Justice Emmanouil Billis,Nandor Knust,Jon Petter Rui,2021-04-22 This edited volume seeks to reassess the old and to analyse and develop novel approaches to the notion of proportionality in criminal matters and the new security architecture The discourse is not limited to conventional constitutional constellations and standard problems of sentencing in traditional criminal proceedings Rather the book offers an interdisciplinary and cross jurisdictional exploration of highly topical proportionality related issues pertinent to penal theory and legal philosophy criminalisation policies security and anti terrorism strategies alternative types of justice delivery and supranational enforcement as well as human rights and international criminal and humanitarian law In today s global risk society with its numerous visible and invisible enemies of the state and the individual balancing freedom and security has become nothing less than an attempt at untying a Gordian knot Against this background the proportionality of measures of crime prevention and repression is unquestionably an issue of utmost importance which basic research and legal policy in rule of law based systems are urgently called to address The timely and fascinating contributions in this book covering jurisdictions from both the common law and the civil law as well as hybrid and international jurisdictions will appeal to academics researchers policy advisers and practitioners working in the

areas of national and international criminal law comparative criminal justice criminology and legal philosophy as well as constitutional and security law

Schools for Thought John T. Bruer, 1994 *Schools for Thought* provides a straightforward general introduction to cognitive research and illustrates its importance for educational change If we want to improve educational opportunities and outcomes for all children we must start applying what we know about mental functioning how children think learn and remember in our schools We must apply cognitive science in the classroom *Schools for Thought* provides a straightforward general introduction to cognitive research and illustrates its importance for educational change Using classroom examples Bruer shows how applying cognitive research can dramatically improve students transitions from lower level rote skills to advanced proficiency in reading writing mathematics and science Cognitive research he points out is also beginning to suggest how we might better motivate students design more effective tools for assessing them and improve the training of teachers He concludes with a chapter on how effective school reform demands that we expand our understanding of teaching and learning and that we think about education in new ways Debates and discussions about the reform of American education suffer from a lack of appreciation of the complexity of learning and from a lack of understanding about the knowledge base that is available for the improvement of educational practice Politicians business leaders and even many school superintendents principals and teachers think that educational problems can be solved by changing school management structures or by creating a market in educational services Bruer argues that improvement depends instead on changing student teacher interactions It is these changes guided by cognitive research that will create more effective classroom environments A Bradford Book

Quantitative Development in Infancy and Early Childhood Kelly S. Mix, Janellen Huttenlocher, Susan Cohen Levine, 2002-04-04 The aim of this book is to define and discuss the key issues raised by new findings in the study of quantitative development One basic question addressed is how the abilities reported in infants and young children relate to later development In some accounts one is left with the impression that infants possess all the fundamental skills that make up mature quantitative reasoning According to this view subsequent development seems to consist of little more than the gradual expression of these skills in increasing complex and explicit tasks This is a major departure from previously held views of quantitative development such as that of Piaget To evaluate these new claims authors will first review the abilities attributed to infants and then define the parameters of early childhood competencies Comparing the two developmental periods the authors will evaluate the finding discuss the transition between these age periods and offer a framework for understanding later development of quantitative skills such as counting and calculation Underlying the argument throughout will be an examination of the nativist versus empiricist debate that has taken center stage in infancy research

Parent Families Trudi J. Renwick, 2021-12-12 First published in 1998 In August 1996 Congress passed welfare reform legislation designed to end welfare as we know it The people most affected by this radical transformation of the public assistance system are families headed by single parents The authors states that unfortunately misinformation regarding single parent families is widespread Too often public policy such as the 1996 welfare reform has been based on stereotypes and misperceptions rather than facts The primary objective was to show how the official measures of poverty underestimate the extent of material hardship in single parent families The facts as developed in this book show that for most single parent families income from employment is not sufficient to support a decent standard of living **Annual Report** New York State Agricultural Experiment Station, 1918 **Annual Report of the Board of Control of the New York Agricultural Experiment Station, (Geneva, Ontario County), ... , with Reports of Director and Other Officers** New York State Agricultural Experiment Station, 1918
