Making It Flow Learning From Commonwealth Experiences Water And Electricity Provision:

Making it Flow Commonwealth Foundation, 2004 These nine case studies of experiences in the provision of water and electricity services from across the Commonwealth present lessons arising from different ways of providing basic infrastructure services These include privatization public sector community partnership and NGO led service provision An overview chapter sets these experiences in the broader context of current debates and issues in essential service provision It highlights some of the issues that emerge from the case studies in the areas of utility reform including pricing and subsidies the importance of community awareness and decentralization and examines some of the challenges to private provision The case studies were commissioned by the Commonwealth Foundation to expand the debate on essential service delivery and inform policy and practice with examples from experience Prepared by researchers and civil society activists from Bangladesh Canada Ghana Guyana India Papua New Guinea South Africa Trinidad and Tobago and Uganda a common thread of the case studies is concern about putting people's needs at the centre of decision making about essential service delivery and factoring in the differential effects of policies on various groups in society *Handbook of Small States* Lino Briguglio, 2018-05-11 This handbook covers a wide spectrum of issues relating to small states Chapters in the volume have been grouped under the three main themes of economic social and environmental issues The economics sections include chapters dealing with trade finance and regulatory frameworks while the social theme covers health migration population ageing as well as overall social wellbeing The environmental theme examines matters such as measuring environmental performance natural disasters the ocean economy and the validity of the Sustainable Development Goals One major issue is the definition of small states As this volume demonstrates generally speaking population is used to measure country size in the literature However it clearly emerges that there is no real consensus as to the population cut off point that distinguishes small states from large ones While the approaches taken by the authors vary in all cases the chapters draw practical policy implications for small states The book can therefore be considered as a wide ranging depositary of information on small states with the aim of deriving policy prescriptions and thus as an excellent resource for academics students and policymakers
