effects of complex social changes *Ethnographic Film* Karl G. Heider, 2009-04-20 From reviews of the first edition Ethnographic Film can rightly be considered a film primer for anthropologists Choice This is an interesting and useful book about what it means to be ethnographic and how this might affect ethnographic filmmaking for the better It obviously belongs in all departments of anthropology and most ethnographic filmmakers will want to read it Ethnohistory Even before Robert Flaherty released *Nanook of the North* in 1922 anthropologists were producing films about the lifeways of native peoples for a public audience as well as for research and teaching Ethnographic Film 1976 was one of the first books to provide a comprehensive introduction to this field of visual anthropology and it quickly became the standard reference In this new edition Karl G Heider thoroughly updates Ethnographic Film to reflect developments in the field over the three decades since its publication focusing on the work of four seminal filmmakers Jean Rouch John Marshall Robert Gardner and Timothy Asch He begins with an introduction to ethnographic film and a history of the medium He then considers many attributes of ethnographic film including the crucial need to present whole acts whole bodies whole interactions and whole people to preserve the integrity of the cultural context Heider also discusses numerous aspects of making ethnographic films from ethics and finances to technical considerations such as film versus video and preserving the filmed record He concludes with a look at using ethnographic film in teaching **High Concept** Justin Wyatt, 2010-07-22 Steven Spielberg once said I like

ideas especially movie ideas that you can hold in your hand If a person can tell me the idea in twenty five words or less it's going to make a pretty good movie Spielberg's comment embodies the essence of the high concept film which can be condensed into one simple sentence that inspires marketing campaigns lures audiences and separates success from failure at the box office This pioneering study explores the development and dominance of the high concept movie within commercial Hollywood filmmaking since the late 1970s Justin Wyatt describes how box office success always important in Hollywood became paramount in the era in which major film studios passed into the hands of media conglomerates concerned more with the economics of filmmaking than aesthetics In particular he shows how high concept films became fully integrated with their marketing so that a single phrase Just when you thought it was safe to go back in the water could sell the movie to studio executives and provide copy for massive advertising campaigns a single image or a theme song could instantly remind potential audience members of the movie and tie in merchandise could generate millions of dollars in additional income
