Making Economic Policy:

The Making of Economic Policy Avinash K. Dixit, 1998-09-01 The Making of Economic Policy begins by observing that most countries trade policies are so blatantly contrary to all the prescriptions of the economist that there is no way to understand this discrepancy except by delving into the politics The same is true for many other dimensions of economic policy Avinash Dixit looks for an improved understanding of the politics of economic policy making from a transaction cost perspective Such costs of planning implementing and monitoring an exchange have proved critical to explaining many phenomena in industrial organization Dixit discusses the variety of similar transaction costs encountered in the political process of making economic policy and how these costs affect the operation of different institutions and policies Dixit organizes a burgeoning body of research in political economy in this framework He uses U S fiscal policy and the General Agreement on Tariffs and Trade GATT as two examples that illustrate the framework and show how policy often deviates from the economist's ideal of efficiency The approach reveals however that some seemingly inefficient practices are quite creditable attempts to cope with transaction costs such as opportunism and asymmetric information Copublished with the Center for Economic Studies and the Ifo Institute

United States Foreign

Economic Policy-making Kenneth A. Gold, 2019-07-19 This book develops an analytical framework for understanding United States foreign agricultural policy through a state interest approach and describes and analyses seven cases of food policy decisions through this perspective which shows that decision makers sought on most occasions to utilise US food resources to accomplish foreign policy objectives A fundamental aspect of the statist approach is the recognition that those sectors representing the interest of the state will inevitably confront other actors in the policy process who are likely pursuing conflicting objectives This book looks at contemporary circumstances in the formulation of US agricultural policy in particular those alterations that occurred beginning in 1972 It offers an analysis of the nature of foreign economic policy and outlines the re emergence of economics as an important component of US foreign policy and an analysis of the concept of food power

Political Economy of Economic Policy Wilfred L. David, 1988-09-02 David takes as his point of departure the orthodox rational paradigm of public policy making which he argues does not adequately reflect real world process to present an integrated model for economic policy formulation and execution By juxtaposing the theoretical foundations of the rationalist model with insights drawn from alternative systems of political economy he shows how economic decisionmaking is both more complex and less idealistic than the rational paradigm assumes In constructing his argument David systematically integrates ideas drawn from moral philosophy politics sociology systems theory institutional and neo Marxian economic thought and international dimensions of political economy He suggests a reorientation of theory and analysis based on an approach emphasizing the role of values conflicts power and divergent interests in the decisionmaking process Focusing throughout on questions raised by the rationalist model David builds his analysis around issues such as the validity of the dominant theories of public economic decision making the logical vis a vis ideological foundations of economic policy postulates the extent to which decisions can be made more responsive to values pertaining to human development

Striking a Balance Albert Rees, 1984-02-01 The language of economic policy is as familiar as the daily newspaper tax cuts the prime rate monetarism deregulation the balance of payments but how well do we understand it Too often the reasoning and the difficult choices that lead to economic policies are hidden from nonexperts in a fog of statistics and jargon Striking a Balance sets forth in clear nontechnical language the principal goals of national economic policy the instruments used to achieve these goals and the political and economic problems arising from conflicting goals and the choice of inappropriate instruments It is written not for economics students but for the general public and for students in the related fields of public policy journalism and law Unlike economics textbooks it is not organized according to theoretical categories such as supply and demand but around issues such as full employment and inflation It has no ideological axe to grind and tries to present

different views of controversial issues fairly Striking a Balance benefits from the wisdom and experience of a mature economist Albert Rees achieves the rare feat of explicating complex issues without oversimplification or trivialization

Hall, 2020-11-10 John Maynard Keynes once observed that the ideas of economists and political philosophers both when they are right and when they are wrong are more powerful than is commonly understood The contributors to this volume take that assertion seriously In a full scale study of the impact of Keynesian doctrines across nations their essays trace the reception accorded Keynesian ideas initially during the 1930s and then in the years after World War II in a wide range of nations including Britain the United States France Germany Italy Japan and Scandinavia The contributors review the latest historical evidence to explain why some nations embraced Keynesian policies while others did not At a time of growing interest in comparative public policy making they examine the central issue of how and why particular ideas acquire influence over policy and politics Based on three years of collaborative research for the Social Science Research Council the volume takes up central themes in contemporary economics political science and history The contributors are Christopher S Allen Marcello de Cecco Peter Alexis Gourevitch Eleanor M Hadley Peter A Hall Albert O Hirschman Harold James Bradford A Lee Jukka Pekkarinen Pierre Rosanvallon Walter S Salant Margaret Weir and Donald Winch Collected Papers in Theoretical Economics (Volume V): Economic Policy and Its Theoretical Bases Kaushik Basu, 2018-10-04 Effective policymaking is based on economics which is a blend of empiricism as well as theory It needs to be grounded not only in data statistics and the regularities observed therein but also analytics deductive reasoning and logic which are the constituents of theory Published during 2009 16 the seven years that Basu spent as a policymaker first as chief economic adviser to the Government of India and then as chief economist of the World Bank this volume draws on the work done by empirical economists and is rooted in analytics even while addressing practical down to earth problems The papers having a direct bearing on economic policymaking in this quintessential compilation range from topics such as financial regulation global policy coordination aspects of the Indian economy like fiscal and monetary policy design inflation management food grain policy and more generally the influence of theory on government policymaking The volume addresses some of the most compelling challenges of our times from the global
