The concept and prototype cars that are shown at major industry events feature cutting edge technologies that the automotive industry wishes to preview. Often these technologies make an appearance in future production models. Concept Car Year in Review 2013 provides insight to the key engineering ideas that were introduced in concept and prototype cars during that year. This full color book includes articles that were previously published and written by the award winning editors of Automotive Engineering International about these concept cars. This book provides a preview of the technologies we could experience in our vehicles in the future. It gives the reader an inside glimpse of how new ideas for vehicles are formed and how they are implemented into the cars we drive. Published for enthusiasts who are interested in future car models and their technologies as well as practicing automotive engineers who are interested in new engineering trends such as hybrid systems, powertrain designs, automotive design, lightweighting and materials, and new engineers who want an overview of future trends. Concept Car in Review 2013 also provides one place where readers can find information on key engineering trends over one year. Allows readers to easily find specific car models or read about all of them. Includes interviews with engineering innovators who pioneer technologies in concept cars. Features many large full color images and an attractive magazine format.
