Automated Software Testing Elfriede Dustin,Jeff Rashka,John Paul,1999-06-28 With the urgent demand for rapid turnaround on new software releases without compromising quality the testing element of software development must keep pace requiring a major shift from slow labor intensive testing methods to a faster and more thorough automated testing approach Automated Software Testing is a comprehensive step by step guide to the most effective tools techniques and methods for automated testing Using numerous case studies of successful industry implementations this book presents everything you need to know to successfully incorporate automated testing into the development process In particular this book focuses on the Automated Test Life Cycle Methodology ATLM a structured process for designing and executing testing that parallels the Rapid Application Development methodology commonly used today Automated Software Testing is designed to lead you through each step of this structured program from the initial decision to implement automated software testing through test planning execution and reporting Included are test automation and test management guidance for Acquiring management support Test tool evaluation and selection The automated testing introduction process Test effort and test team sizing Test team composition recruiting and management Test planning and preparation Test procedure development guidelines Automation reuse analysis and reuse library Best practices for test automation Artificial Intelligence and Other Innovative Computer Applications in the Nuclear Industry M. Catherine Majumdar,2012-12-06 This conference brought together experts from 15 countries to discuss application of Artificial Intelligence AI techniques to the nuclear industry It was apparent from the meeting that even those active in the field were surprised at the extent of work and the progress made There was a strong impression that application of this technology to nuclear power plants is inevitable The benefits to improved operation design and safety are simply too significant to be ignored This is a much different conclusion than might have been reached a few years ago when the technology was new and people were struggling to understand its significance We believe that this meeting reflects a major turning point for the technology It has moved from being a topic understood only by specialists to a situation where users are the most active people in the field A broad array of innovative work is described from all of the participating countries The activity in the u s is large and diverse Although there is no nationally focussed policy for AI research in the U S many of these activities are reported here Japan and France have a strong drive to integrate AI technology into their nuclear plants and this is reflected in these proceedings
