Modernism In Literature:

The Concept of Modernism Astradur Eysteinnsson, Ástráður Eysteinnsson, 1990 The term modernism is central to any discussion of twentieth century literature and critical theory Astradur Eysteinnsson here maintains that the concept of modernism does not emerge directly from the literature it subsumes but is in fact a product of critical practices relating to nontraditional literature Intervening in these practices and correlating them with modernist works and with modern literary theory Eysteinnsson undertakes a comprehensive reexamination of the idea of modernism Eysteinnsson critically explores various manifestations of modernism in a rich array of American British and European literature criticism and theory He first examines many modernist paradigms detecting in them a conflict between modernism's culturally subversive potential and its relatively conservative status as a formalist project He then considers these paradigms as interpretations and fabrications of literary history Seen in this light modernism both signals a historical change on the literary scene and implies the context of that change Laden with the implications of tradition and modernity modernism fills its major function that of highlighting and defining the complex relations between history and postrealist literature Eysteinnsson focuses on the ways in which the concept of modernism directs our understanding of literature and literary history and influences our judgment of experimental and postrealist works in literature and art He discusses in detail the relation of modernism to the key concepts postmodernism the avant garde and realism Enacting a crisis of subject and reference modernism is not so much a form of discourse he asserts as its interruption a possible other modernity that reveals critical aspects of our social and linguistic experience in Western culture Comparatists literary theorists cultural historians and others interested in twentieth century literature and art will profit from this provocative book **A History of Modernist Literature** Andrzej

the institutional history of the BBC and developments in ethical philosophy as mediated and forged by writers such as T S Eliot H G Wells E M Forster and Virginia Woolf Todd Avery shows how these and other prominent authors involvement with radio helped to shape the ethical contours of literary modernism In so doing Avery demonstrates the central role radio played in the early dissemination of modernist art and literature and also challenges the conventional assertion that modernists were generally elitist and anti democratic Intended for readers interested in the fields of media and cultural studies and modernist historiography this book is remarkable in recapturing for a twenty first century audience the interest fascination excitement and often consternation that British radio induced in its literary listeners following its inception in 1922
