coverage *Animal Rights & Human Morality* Bernard E. Rollin, 2010-12 It's been more than two decades since the first edition of this landmark book garnered public accolades for its sensitive yet honest and forthright approach to the many disquieting questions surrounding the emotional debate over animal rights. Is moral concern something owed by human beings only to human beings? Drawing upon his philosophical expertise, his extensive experience of working with animal issues all over the world, and his knowledge of biological science, Bernard E. Rollin, now widely recognized as the father of veterinary ethics, develops a compelling analysis of animal rights as it is emerging in society. The result is a sound basis for rational discussion and social policy development in this area of rapidly growing concern. He believes that society must elevate the moral status of animals and protect their rights as determined by their natures. His public speaking and published works have contributed to the passage of major federal legislation designed to increase the well-being of laboratory animals. This new third edition is greatly expanded and includes a new chapter on animal agriculture plus additional discussions of animal law, companion animal issues, genetic engineering, animal pain, animal research, and many other topics. What is the biological basis behind some heavy drinkers' belief that the hair of the dog method alleviates the effects of a hangover? Why does marijuana seem to affect one's problem-solving capacity? Intoxicating Minds is, in the author's words, a grand excavation of drug myth. Neither extolling nor condemning drug use, it is a story of scientific and artistic achievement, war and greed, empires and religions, and lessons for the future. Ciaran Regan looks at each class of drugs, describing the historical evolution of their use, explaining how they work within the brain's neurophysiology, and outlining the basic pharmacology of those substances. From a consideration of the effect of stimulants such as caffeine and nicotine and the reasons and consequences of their sudden popularity in the seventeenth century, the book moves to a discussion of more modern stimulants such as cocaine and ecstasy. In addition, Regan explains how we process memory, the nature of thought disorders, and therapies for treating depression and schizophrenia. Regan then considers psychedelic drugs and their perceived mystical properties and traces the history of placebos to ancient civilizations. Finally, Intoxicating Minds considers the physical consequences of our co-evolution with drugs, how they have altered our very being, and offers a glimpse of the brave new world of drug therapies. **The Language of Art History** Salim Kemal, Ivan Gaskell, 1991 The first volume in the series Cambridge Studies in Philosophy and the Arts offers a range of responses by distinguished philosophers and art historians to some crucial issues generated by the relationship between the art object and language in art history. Each of the chapters in this volume is a searching response to theoretical and practical questions in terms accessible to readers of all

human science disciplines The editors one a philosopher and one an art historian provide an introductory chapter which outlines the themes of the volume and explicates the terms in which they are discussed The contributors open new avenues of enquiry involving concepts of presence projective properties visual conventions and syntax and the appropriateness of figurative language in accounting for visual art The issues they discuss will challenge the boundaries to thought that some contemporary theorising sustains

Beatific Enjoyment in Medieval Scholastic Debates Severin Valentinov Kitanov,2014-03-25 Beatific Enjoyment in Medieval Scholastic Debates examines the religious concept of enjoyment as discussed by scholastic theologians in the Latin Middle Ages Severin Kitanov argues that central to the concept of beatific enjoyment *fruitio beatifica* is the distinction between the terms enjoyment and use *frui et uti* found in Saint Augustine's treatise *On Christian Learning* Peter Lombard a twelfth century Italian theologian chose the enjoyment of God to serve as an opening topic of his *Sentences* and thereby set in motion an enduring scholastic discourse Kitanov examines the nature of volition and the relationship between volition and cognition He also explores theological debates on the definition of enjoyment whether there are different kinds and degrees of enjoyment whether natural reason unassisted by divine

revelation can demonstrate that beatific enjoyment is possible whether beatific enjoyment is the same as pleasure whether it has an intrinsic cognitive character and whether the enjoyment of God in heaven is a free or un free act Even though the concept of beatific enjoyment is essentially religious and theological medieval scholastic authors discussed this concept by means of Aristotle s logical and scientific apparatus and through the lens of metaphysics physics psychology and virtue ethics Bringing together Christian theological and Aristotelian scientific and philosophical approaches to enjoyment Kitanov exposes the intricacy of the discourse and makes it intelligible for both students and scholars
