Laws and Societies in the Canadian Prairie West, 1670-1940 Louis A. Knafla, Jonathan Swainger, 2006-07 Laws and Societies in the Canadian Prairie West 1670 1940 examines the legal history of the north west frontier from the earliest years of European Native contact in the seventeenth century to the mid 1900s Challenging myths about a peaceful west and prairie exceptionalism the book explores the substance of prairie legal history and the degree to which the region's mentality is rooted in the historical experience of distinctive prairie peoples The chapters written by a cross section of established and emerging scholars working in the allied fields of law legal history sociology and criminology focus on what is distinctive in prairie legal culture By approaching the issue from a variety of perspectives those of colonial administrators fur company employees Native peoples women men entrepreneurs judges magistrates and the police among others the authors find evidence of a conscious effort to apply broad non regional experiences to seemingly familiar local issues The ways in which prairie peoples perceived themselves and their relationships to a wider world were directly framed by notions of law and legal remedy shaped by the course and themes of prairie history Legal history is not just about black letter law It is also deeply concerned with the ways in which people affect and are affected by the law in their daily lives By examining how central and important the law has been to individuals communities and societies in the Canadian Prairies this book makes an original contribution This collection will be of interest to students and scholars of Canadian history legal history sociology and criminology and anyone interested in the legal culture of the Canadian west from the frontier days to the present

New State-Making in the Pacific Rim, 1850-1974 Peter J. Aschenbrenner, 2024-08-21 European colonial empires were built on private wealth seeking gold silver and oil These extractive activities required massive public subsidies Drawing on the experience of three Pacific Rim nations Australia Japan and Canada and two territories in the US Hawaii and Alaska *New State Making in the Pacific Rim 1850 1974 Gold Silver Oil Greed and Government* demonstrates how 19th century colonialism contained the seeds of its own destruction Peter J Aschenbrenner identifies three factors that marked the turning point in the history of colonialism First governments demanded a greater return to the public treasury from private extractive activities and a reduced footprint measured in environmental devastation and obliteration of local cultures Second first residents acquired considerable skill in adaptation for survival that is fighting back against oppression manifested in programs of extermination forced population movement and hostility to language religion and traditional subsistence practices Third colonial nations participation in World War I required their armed forces to fill manpower needs by calling on minorities to perform military service This gave minorities significant leverage in their struggle to achieve equal political rights and access to their fair share of government benefits Rethinking colonial practices became a realistic option once national survival was at risk

courthouses Covering in detail all of Albertas historic courthouses built between 1874 and 1950 this book considers many facets of these unique and significant structures The Ways of Federalism in Western Countries and the Horizons of Territorial Autonomy in Spain Alberto López - Basaguren, Leire Escajedo San Epifanio, 2013-06-13 Territorial autonomy in Spain has reached a crossroads After over thirty years of development the consensus regarding its appropriateness has started to crumble The transformation project embodied by the reform of Statute of Catalonia 2006 has failed to achieve its most significant demands Although the concept of Spain as a Federation is disputed more within the country than beyond the evolution of the Spanish system needs to follow a markedly federalist path In this perspective reference models assume critical importance This edition gathers the works of a broad group of European American and Spanish experts who analyse the present day challenges of their respective systems The objective thus is to contribute ideas which might help to address the evolution of the Spanish system in the light of the experience of more established Federations This second volume focuses its attention on the difficulties and challenges faced in two particular fields On the one hand the field of intergovernmental relations and on the other questions related to the integration and acknowledgement of diversity and of Fundamental Rights with special reference to the cases of Canada and Spain Finally there is analysis of other specific aspects of the system of territorial autonomy in Spain *The Commonwealth Relations Office Year Book* Great Britain. Office of Commonwealth Relations, 1964 *Inuit Women* Janet Mancini Billson, Kyra Mancini, 2007 Inuit Women is the definitive study of the Inuit during a time of rapid change Based on fourteen years of research and fieldwork this analysis focuses on the challenges facing Inuit women as they enter the twenty first century Written shortly after the creation of Nunavut a new province carved out of traditional Inuit homelands in the Canadian North this compelling book combines conclusions drawn from the authors ethnographic research with the stories of Inuit women and men told in their own words In addition to their presentation of the personal portraits and voices of many Inuit respondents Janet Mancini Billson and Kyra Mancini explore global issues the impact of rapid social change and Canadian resettlement policy on Inuit culture women s roles in society and gender relations in Baffin Island in the Eastern Arctic They also include an extensive section on how the newly created territory of Nunavut is impacting the lives of Inuit women and their families Working from a research approach grounded in feminist theory the authors involve their Inuit interviewees as full participants in the process This book stands alone in its attention to Inuit women s issues and lives and should be read by everyone interested in gender relations development modernization globalization and Inuit culture **Canada** Michelangelo Sabatino, Rhodri Windsor Liscombe, 2016-11-15 Canada is a country of massive size of diverse geographical features and an equally diverse population all features that are magnificently reflected in its architecture In this book Rhodri Windsor Liscombe and Michelangelo Sabatino offer a richly informative history of Canadian architecture that celebrates and explores the country s many contributions to the spread of architectural modernity in the Americas A distinct Canadian design attitude coalesced during the twentieth century one

informed by a liberal hybrid and pragmatic mindset intent less upon the dogma of architectural language and more on thinking about the formation of inclusive spaces and places Taking a fresh perspective on design production they map the unfolding of architectural modernity across the country from the completion of the transcontinental railway in the late 1880s through to the present Along the way they discuss architecture within the broader contexts of political industrial and sociocultural evolution the urban suburban expansion and new building technologies Examining the works of architects and firms such as ARCOP Eric Arthur Ernest Cormier Brigitte Shim and Howard Sutcliffe this book brings Canadian architecture chronologically and thematically to life

Natural Resources and Conflict Dynamics in Federal Countries Eyene Okpanachi,2025-07-02 This book examines the dynamics of oil and gas conflicts within the context of federalism in Canada an older federation with broadly a decentralized institutional design governing oil and gas and Nigeria a newer federation with a largely centralized design It traces resource ownership control or regulation and revenue sharing conflict processes over time and provides a focused comparison of conflict over the role of oil in intergovernmental fiscal transfers in both countries In so doing the book provides a much needed corrective to conventional static notions of oil conflict as either violent or nonviolent outcomes by carefully analyzing the evolution and ebbs and flows of conflicts hidden within conflict patterns that appear to be self reinforcing and entrenched The book demonstrates that de centralization dynamics especially the continuities and shifts in federal institutional structural and ideational rules about oil itself are central to the concept of conflict dynamics It highlights the endogenous processes of federal institutional development and lends credence to the historical institutionalists emphasis on the entanglement of institutions in their own transformation Yet the book also reveals that conflict dynamics did not emerge solely from the initial compromise between federal and provincial state actors regarding the allocation of competence over oil The renegotiation

and reinterpretation of these rules over time which entails a redistribution of power resources in response to historical temporalities and shocks political agency and changing socioeconomic realities also generated unique patterns of conflict and conflict resolution within the federal institutional arenas
