The Northern and Western Isles in the Viking World Alexander Fenton, Hermann Pálsson, 1984 Om Orkney og Shetlands erne F r erne og Island *The Lesser-Known Varieties of English* Daniel Schreier, Peter Trudgill, Edgar W. Schneider, Jeffrey P. Williams, 2010-03-04 This is the first ever volume to compile sociolinguistic and historical information on lesser known and relatively ignored native varieties of English around the world Exploring areas as diverse as the Pacific South America the South Atlantic and West Africa it shows how these varieties are as much part of the big picture as major varieties and that their analysis is essential for addressing some truly important issues in linguistic theory such as dialect obsolescence and death language birth dialect typology and genetic classification patterns of diffusion and transplantation and contact induced language change It also shows how close interwoven fields such as social history contact linguistics and variationist sociolinguistics are in accounting for their formation and maintenance providing a thorough description of the lesser known varieties of English and their relevance for language spread and change

A Norse Settlement in the Outer Hebrides Niall Sharples, 2019-12-19 The settlement at Bornais in the Western Isles of Scotland is one of the largest rural settlements known from the Norse period in Britain It spans the period from the fifth to the fifteenth century AD when the Atlantic seaboard was subject to drastic changes The islands were systematically ravaged by Viking raiders and then colonised by Norse settlers In the following centuries the islanders were central to the emergence of the Kingdom of Man and the Isles played a crucial role in the development of the Lordship of the Isles and were finally assimilated into the Kingdom of Scotland This volume explores the stratigraphic sequence uncovered by the excavation of Bornais mounds 2 and 2A The excavation of mound 2 revealed a sequence of high status buildings that span the Norse occupation of the settlement One of these houses constructed at the end of the eleventh century AD was a well preserved bow walled longhouse and the careful excavation and detailed recording of the floor layers has revealed a wealth of finds that provides invaluable insight into the activities taking place in this building The final house in this sequence is very different in form and use and clearly indicates the increasing Scottish influence on the region at the beginning of the thirteenth century The excavation of mound 2A provides an insight into the less prestigious areas of the settlement and contributes a significant amount of evidence on the settlement economy The area was initially cultivated before it became a settlement local and throughout its life a focus on agricultural activities such as grain drying and processing appears to have been important In the thirteenth century the mound was occupied by a craftsman who produced composite combs gaming pieces and simple tools The evidence presented in this volume makes a major contribution to the understanding of Norse Scotland and the colonisation of the North Atlantic in a period of dramatic transformations World Englishes Volumes I-III Set Tommetro Hopkins, Kendall Decker, John McKenny, 2013-02-14 World Englishes is a twelve volume series presenting a comprehensive detailed survey of English as it is spoken all over the world The volumes are organised

into four groups covering Britain Europe America Africa and Asia and celebrate English in all its diversity The chapters contain maps facts and figures and a detailed description about English as it is spoken in each region and are an invaluable library resource for undergraduates postgraduates and academics interested in the diversity of the English language ,

Northern and Insular Scots Robert McColl Millar,2007-01-26 The Scots dialects of northern Scotland Orkney and Shetland are among the most traditional varieties of English exhibiting features not current elsewhere for centuries Until recently they were spoken in communities whose traditional occupations have encouraged the equation of speech with local identity They have all also been affected by contact with Gaelic or Norse or both In recent years however the decline of traditional industries has been matched by the discovery of oil off their coasts encouraging in migration of speakers of many varieties of English and other languages How well have these varieties maintained their traditional natures at the start of the 21st century *The British Isles* Bernd Kortmann,Clive Upton,2008-12-10 This volume gives a detailed overview of the varieties of English spoken on the British Isles including lesser known varieties such as those spoken in Orkney and Shetland and the Channel Islands The chapters written by widely acclaimed specialists provide concise and comprehensive information on the phonological morphological and syntactic characteristics of each variety discussed The articles are followed by exercises and study questions The exercises are geared towards students and can be used for classroom assignments as well as for self study in preparation for exams Instructors can use the exercises sound samples and interactive maps to enhance their classroom presentations and to highlight important language features **Negotiating the North** Sarah Semple,Alexandra Sanmark,Frode Iversen,Natascha Mehler,2020-06-11 This book brings together the cumulative results of a three year project focused on the assemblies and administrative systems of Scandinavia Britain and the North Atlantic islands in the 1st and 2nd millennia AD In this volume we integrate a wide range of historical cartographic archaeological field based and onomastic data pertaining to early medieval and medieval administrative practices geographies and places of assembly in Norway Sweden Denmark Iceland the Faroe Islands Scotland and eastern England This transnational perspective has enabled a new understanding of the development of power structures in early medieval northern Europe and the maturation of these systems in later centuries under royal control In a series of richly illustrated chapters we explore the emergence and development of mechanisms for consensus We begin with a historiographical exploration of assembly research that sets the intellectual agenda for the chapters that follow We then examine the emergence and development of the thing in Scandinavia and its export to the lands colonised by the Norse We consider more broadly how assembly practices may have developed at a local level yet played a significant role in the consolidation and at times regulation of elite power structures Presenting a fresh perspective on the agency and power of the thing and cognate types of local and regional assembly this interdisciplinary volume provides an invaluable in depth insight into the people places laws and consensual structures that shaped the early medieval and medieval kingdoms of northern Europe British

Consciousness and Identity Brendan Bradshaw, Peter Roberts, 2003-12-18 The historical resonances of the concept of Britain for the communities of the Atlantic Archipelago in the early modern period are explored here in terms of the ideological demands made upon it Various and competing concepts of Britishness are examined from the Henrician legislation which united Wales with England and which created the kingdom of Ireland to the Act of Union of the realms of England and Scotland The chequered history of the consciousness of Britain as a polity which embraced the united kingdoms is discussed in relation to the distinctive national identities of the constituent countries and the question of the impact of Britain on English policy making under the Tudor Stuart and the first Hanoverian monarchs is addressed The puzzling resistance of the Irish to assimilation in contrast to the docility of the Welsh and eventually of the Scots is also explored *Orkney & Shetland 2018*, 2018 **Transactions** Inverness Gaelic Society, 1895 List of members in each vol *The Wake of the Whale* Russell Fielding, 2018-10-08 Despite declining stocks and health risks island communities in the Caribbean and North Atlantic still use traditional methods to hunt whales and dolphins for food Russell Fielding presents the art history and purpose of whaling in these different cultures and describes what their future might look like as modern realities take hold

The Biggings, Papa Stour, Shetland B. E. Crawford, Beverley Ballin Smith, 1999 This study of a royal Norwegian farm on the Shetland island of Papa Stour was inspired by a document of 1299 recording the meeting between a Norwegian royal official and a woman who had accused him of treachery to his royal master **Scottish Land-names** Sir Herbert Maxwell, 1894
