Cornelis Lammers, David Hickson, 2013-08-21 This volume contrasts the life and problems of organizations in many parts of the world and highlights the differences between those societies as reflected in their different institutional sectors such as manufacturing commerce social services and government administration In so doing the book contributes to the theoretical foundations of the sociology of organizations by revealing previously unseen relationships between societies and institutions offering an original synthesis of available research *In Defence of Organisation Theory* Lex Donaldson, 1985-09-12 This book provides a concise clear survey and defence of organizational theory That theory and its associated research has in recent years become subject to strong criticism Rival perspectives on organizations have been put forward One of these stresses that organizations need to be understood as made up of individual people Another asserts the need to see organizations as part of the conflicts and radical struggles in society These alternative views have led to a host of critiques of conventional organization studies It is attacked as being tautological philosophically naive ideological and managerially biased To date there has been no substantial reply to these criticisms by a protagonist of organization theory This volume uniquely fills that gap In part one the author examines and rebuts each of the major lines of criticism In part two the rival approaches suggested by the critics are themselves subjected to an analysis of their limitations The book concludes with a new model of organizational design which provides a synthesis of previous research **Personnel Literature**, 1974
