Practice And Learn:

Practice and Service Learning in Occupational Therapy Theresa Lorenzo, Madeleine Duncan, Helen

Buchanan, Auldeen Alsop, 2006-07-11 While this book is based primarily on experiences of occupational therapy practice education in South Africa it aims to have international appeal as key principles of practice and service learning are drawn from the differing scenarios covered. Based on qualitative research some of the book's chapters describe issues faced by students in complex practice situations and highlight educational strategies for promoting socially responsive professional development. They show how students engage with the personal and professional challenges of working in a multicultural society and how situated learning can enhance their resourcefulness in meeting the needs of individuals, groups and communities. The book is divided into three sections. The first on the practice education agenda establishes the academic rationale for various forms of practice learning within an occupational therapy curriculum. The second section examines the learning opportunities offered by different practice contexts and highlights mechanisms for developing the professional identity of students. The final section on enhancing potential reviews mechanisms that may be used for supporting students in the field and ends with a look at the future of practice education and how it might develop in response to social and international drivers.

Learning to Learn in Nursing Practice Kath Sharples, 2009-06-16 Pre-registration student nurses spend 50 per cent of their training on practice placements which provide a wealth of opportunities for students to develop their knowledge and skills. However many students find themselves in a clinical environment which is foreign and confusing. This book will help the student to seek out and construct learning opportunities from within the clinical environment and to develop skills for practice learning which will help them to achieve a competent standard. This book will be first and foremost a practical and relevant guide for students on developing skills for learning during their practice placements. Practice, Learning and Change

Paul Hager, Alison Lee, Ann Reich, 2012-06-25 The three concepts central to this volume: practice, learning and change have received very different treatments in the educational literature: an oversight directly confronted here. While learning and change have been extensively theorised, their various contexts articulated and analysed, practice is notably underrepresented. Where much of the literature on learning and change takes the notion of practice as an unexamined given, its co-location as a term with various classifiers as in legal practice and teaching practice render it curiously devoid of semantic force. In this book, practice is the super-ordinate organising idea. Drawing on what has been termed the practice turn in contemporary theory, the work develops a conceptual framework for researching learning in and on practice. It challenges received notions of practice, questioning the assumptions, elisions, connotations and silences on the subject. In so doing, it offers fresh insights into learning and change and how they relate to practice. In tandem with this conceptual work, the book details site ontological studies of practice and learning in diverse professional and workplace contexts, examining the work of occupations as various as doctors, chefs and orchestral musicians. It demonstrates the value of

theorising practice learning and change as well as exploring the connections between them amid our evolving social and institutional structures

Practice Learning in Social Work Jennifer Burton, 2015-12-03 Learning through practice lies at the heart of social work education providing the opportunity for students to develop and employ the skills experience and knowledge they need to become effective social workers This exciting new addition to Palgrave's Practical Social Work series provides an integrated and user friendly approach to practice learning by putting placements within a broader learning framework Rather than treating placements as an isolated aspect of the social work degree Practice Learning in Social Work shows how they are relevant to all aspects of the social work experience Divided in to three parts this book's pragmatic approach mirrors students own journey as they progress from preparation for practice through to actual experience and then beyond this to support personal and professional development right up to qualification as a Newly Qualified Social Worker With a strong emphasis on service users and carers as central stake holders Practice Learning in Social Work illustrates the practical nature of the profession with realistic case scenarios based on real life learning experiences reflective learning exercises and practice led research references throughout Progress checklists linked to the Professional Capabilities Framework also provide readers with the opportunity to assess their own strengths and learning needs
