Putting Meat On The American Table Taste Technology Transformation:

Putting Meat on the American Table Roger Horowitz, 2006 This book explains how America became a meat eating nation from the colonial period to the present It examines the relationships between consumer preference and meat processing looking closely at the production of beef pork chicken and hot dogs The author argues that a series of new technologies have transformed American meat He draws on detailed consumption surveys that shed new light on America s eating preferences especially differences associated with income rural versus urban areas and race and ethnicity The Takeover Monica R. Gisolfi, 2017 Introduction From cotton to chicken 1914 1939 World War II and the command economy 1939 1945 Taking over integrators and the birth of the modern broiler industry Broiler sharecroppers and hired hands From public nuisance to toxic waste 1940 1990 Epilogue Feral Animals in the American South Abraham H. Gibson, 2016-08-30 The relationship between humans and domestic animals has changed in dramatic ways over the ages and those transitions have had profound consequences for all parties involved As societies evolve the selective pressures that shape domestic populations also change Some animals retain close relationships with humans but many do not Those who establish residency in the wild free from direct human control are technically neither domestic nor wild they are feral If we really want to understand humanity s complex relationship with domestic animals then we cannot simply ignore the ones who went feral This is especially true in the American South where social and cultural norms have facilitated and sustained large populations of feral animals for hundreds of years *Feral Animals in the American South* retells southern history from this new perspective of feral animals

A Rich and Fertile Land Bruce Kraig, 2017-10-15 The small ears of corn once grown by Native Americans have now become row upon row of cornflakes on supermarket shelves The immense seas of grass and herds of animals that supported indigenous people have turned into industrial agricultural operations with regular rows of soybeans corn and wheat that feed the world But how did this happen and why In *A Rich and Fertile Land* Bruce Kraig investigates the history of food in America uncovering where it comes from and how it has changed over time From the first Native Americans to modern industrial farmers Kraig takes us on a journey to reveal how people have shaped the North American continent and its climate based on the foods they craved and the crops and animals that they raised He analyzes the ideas that Americans have about themselves and the world around them and how these ideas have been shaped by interactions with their environments He details the impact of technical innovation and industrialization which have in turn created modern American food systems Drawing upon recent evidence from the fields of science archaeology and technology *A Rich and Fertile Land* is a unique and valuable history of the geography climate and food of the United States The Rural Midwest Since World War II J. L. Anderson, 2014-02-01 J L Anderson seeks to change the belief that the Midwest lacks the kind of geographic coherence historical issues and cultural touchstones that have informed regional identity in the American South West and Northeast The goal of this illuminating volume is to demonstrate uniqueness in a region that has always been amorphous and is

increasingly so Midwesterners are a dynamic people who shaped the physical and social landscapes of the great midsection of the nation and they are presented as such in this volume that offers a general yet informed overview of the region after World War II The contributors most of whom are Midwesterners by birth or residence seek to better understand a particular piece of rural America a place too often caricatured misunderstood and ignored However the rural landscape has experienced agricultural diversity and major shifts in land use Farmers in the region have successfully raised new commodities from dairy and cherries to mint and sugar beets The region has also been a place where community leaders fought to improve their economic and social well being women redefined their roles on the farm and minorities asserted their own version of the American Dream The rural Midwest is a regional melting pot and contributors to this volume do not set out to sing its praises or by contrast assume the position of Midwestern modesty and self deprecation The essays herein rewrite the narrative of rural decline and crisis and show through solid research and impeccable scholarship that rural Midwesterners have confronted and created challenges uniquely their own [American Empire](#) Joshua Freeman,2012-08-02

A compelling look at the movements and developments that propelled America to world dominance In this landmark work acclaimed historian Joshua Freeman has created an epic portrait of a nation both galvanized by change and driven by conflict Beginning in 1945 the economic juggernaut awakened by World War II transformed a country once defined by its regional character into a uniform and cohesive power and set the stage for the United States rise to global dominance Meanwhile Freeman locates the profound tragedy that has shaped the path of American civic life unfolding how the civil rights and labor movements worked for decades to enlarge the rights of millions of Americans only to watch power ultimately slip from individual citizens to private corporations Moving through McCarthyism and Vietnam from the Great Society to Morning in America Joshua Freeman s sweeping story of a nation s rise reveals forces at play that will continue to affect the future role of American influence and might in the greater world **Food and Drink in American History** Andrew F.

Smith,2013-10-28 This three volume encyclopedia on the history of American food and beverages serves as an ideal companion resource for social studies and American history courses covering topics ranging from early American Indian foods to mandatory nutrition information at fast food restaurants The expression you are what you eat certainly applies to Americans not just in terms of our physical health but also in the myriad ways that our taste preferences eating habits and food culture are intrinsically tied to our society and history This standout reference work comprises two volumes containing more than 600 alphabetically arranged historical entries on American foods and beverages as well as dozens of historical recipes for traditional American foods and a third volume of more than 120 primary source documents Never before has there been a reference work that coalesces this diverse range of information into a single set The entries in this set provide information that will transform any American history research project into an engaging learning experience Examples include explanations of how tuna fish became a staple food product for Americans how the canning industry emerged from

the Civil War the difference between Americans and people of other countries in terms of what percentage of their income is spent on food and beverages and how taxation on beverages like tea rum and whisky set off important political rebellions in U S history

Sovereignty Unhinged Deborah A. Thomas, Joseph Masco, 2023-01-18 Sovereignty Unhinged theorizes sovereignty beyond the typical understandings of action control and the nation state Rather than engaging with the geopolitical realities of the present the contributors consider sovereignty from the perspective of how it is lived and enacted in everyday practice and how it reflects people s aspirations for new futures In a series of ethnographic case studies ranging from the Americas to the Middle East to South Asia they examine the means of avoiding the political and historical capture that make one complicit with sovereign authority rather than creating the conditions of possibility to confront it The contributors attend to the affective dimensions of these practices of world building to illuminate the epistemological ontological and transnational entanglements that produce a sense of what is possible They also trace how sovereignty is activated and deactivated over the course of a lifetime within the struggle of the everyday In so doing they outline how individuals create and enact forms of sovereignty that allow them to endure fast and slow forms of violence while embracing endless opportunities for building new worlds Contributors Alex Blanchette Yarimar Bonilla Jessica Cattelino Mar a Elena Garc a Akhil Gupta Lochlann Jain Purnima Mankekar Joseph Masco Michael Ralph Danilyn Rutherford Arjun Shankar Kristen L Simmons Deborah A Thomas Leniqueca A Welcome Kaya Naomi Williams Jessica Winegar

Inflation Decade, 1910–1920 David I. Macleod, 2024-04-29 This book shows how inflation can disrupt politics and society With no recent precedent mild inflation spurred mass protests myriad remedial schemes and partisan political reversals between 1910 and 1914 Then wartime demand and inflationary fiscal policy doubled consumer prices from 1915 to 1920 triggering waves of strikes food riots by immigrant housewives class conflict and elite fears of revolution Middle class households resented falling real incomes Even more than today food prices dominated consumer concerns Yet farmers wanted high commodity prices Accordingly both sides blamed and attacked meatpackers wholesalers and retailers Then as now inflation hurt whichever party held the White House Fumbling responses by Wilson s administration and the Federal Reserve led to hesitant price controls punitive raids and prosecutions and a now familiar fallback high interest rates in 1920 and subsequent recession An epilogue traces continuing popular and political responses to changes in the consumer price index down to 2020

social problems such as poverty meant that nutritional and dietary health declined This volume explores the foods that were eaten in nineteenth century Britain Migrant Marketplaces Elizabeth Zanoni,2018-03-21 Italian immigrants to the United States and Argentina hungered for the products of home Merchants imported Italian cheese wine olive oil and other commodities to meet the demand The two sides met in migrant marketplaces urban spaces that linked a mobile people with mobile goods in both real and imagined ways Elizabeth Zanoni provides a cutting edge comparative look at Italian people and products on the move between 1880 and 1940 Concentrating on foodstuffs a trade dominated by Italian entrepreneurs in New York and Buenos Aires Zanoni reveals how consumption of these increasingly global imports affected consumer habits and identities and sparked changing and competing connections between gender nationality and ethnicity Women in particular by tradition tasked with buying and preparing food had complex interactions that influenced both global trade and their community economies Zanoni conveys the complicated and often fraught values and meanings that surrounded food meals and shopping A groundbreaking interdisciplinary study Migrant Marketplaces offers a new perspective on the linkages between migration and trade that helped define globalization in the late nineteenth and early twentieth centuries

Feeding Gotham Gergely Baics, **Building a Housewife's Paradise** Tracey Deutsch,2010 An examination of the history of food distribution in the United States explores the roles that gender business class and the state played in the evolution of American grocery stores *Protein Machines, Technology, and the Nature of the Future* Wyatt Galusky,2022-07-18 This book explores the relationships between humans chickens and environments in the context of protein production The history of these relationships reveals them to be increasingly technological which results in humans becoming more responsible for those animals and their environments Understanding this development through the configuration of various kinds of protein machines is key to confronting the kinds of future we wish to promote and the characteristics of the present we wish to sustain The book is organized around narratives that explore the concept of the protein machine with a particular focus on the development of the chicken as it has moved from the field to the factory to the laboratory These transformations are interconnected and culminate in efforts to cultivate meat without the animal Our ultimate goal will be to ask what kind of future does this technology envision and what roles do humans and animals play in it
