Puzzles Of The Democratic Peace Theory Geopolitics And The Transformation Of World Politics:

Puzzles of the Democratic Peace K. Rasler, W. Thompson, 2016-01-26 Ever since the revival of Kant's Perpetual Peace thesis the linkages between democracy and peace has been a central topic in international relations research with sustained debate over whether it exists and if it does why it does In this stimulating volume two leading IR scholars place the democratic peace debate within a broader context including the extent of threats in international relations degree of satisfaction with the status quo the diffusion of democracy and the rise of the trading state Step by step Thompson and Rasler examine the democratic peace through a series of puzzles concerning arguments at the dyadic systemic and individual state levels Synthesizing a broad range of knowledge and linking islands of theory *Puzzles of the Democratic Peace* provides a distinctive look at the state of the field and paths forward *Dictionary of International Security* Paul Robinson, 2008 This dictionary provides readers with a handy reference guide to the field of international security by including over 200 articles on a wide range of concepts issues treaties and institutions from absolute war to weapons of mass destruction **History and International Relations** Howard LeRoy Malchow, 2015-11-19 History and International Relations examines from a historian's perspective the evolution of international relations as a discipline and charts its engagement with the history of war peace and foreign relations from the ancient world to the present day In three parts it looks at the field's development its contribution to historical narrative and its contemporary practice Part I The History of a Discipline locates the development of IR scholarship in its own historical contexts examining the origin of dominant IR theories their use of historical evidence and their relation to other social science disciplines Part II IR and International History explores key moments in the history of war and peace from the Peloponnesian War to the Cold War and beyond and the role they played in constructing the discipline Part III Contemporary IR and the Uses of History reflects on the current ferment in IR over its Eurocentric theory and practice its key concepts of state and sovereignty the impact of non state actors and human rights and the return of history Rethinking the Value of Democracy Renske Doorenspleet, 2018-07-21 This book is the first comprehensive analysis of the instrumental value of democracy in a comparative perspective Based on extensive analyses of quantitative studies from different disciplines it explores both the expected beneficial and harmful impact of democracy Democracy's reputation as delivering peace and development while controlling corruption is an important source of its own legitimacy Yet as this book acutely demonstrates the arguments tend to be normatively driven interventions in ideologically charged policy debates The book argues that we need neither a utopian framing of democracy as delivering all good things in politics nor a cynical one that emphasizes only the dangerous underbelly of this form of government The author also raises critical questions about the value of the study of democracy the choice for particular concepts and measures the unknown mechanisms and the narrow focus on specific instrumental values This volume will be necessary reading for anyone interested in debates on democracy in the contemporary global context *The Transformation of Violent Intercommunal*

Conflict Stephen Ryan, 2016-02-24 In recent years there has been a remarkable growth of interest in the concept of conflict transformation and the closely related strategy of grass roots peace building Yet there exists no general critical analysis of the concept of conflict transformation in the context of violent inter communal conflict and the different approaches that can be included in response to this category of dispute This study offers a comprehensive survey and critical overview of this emerging area Examining the reasons for the growing interest in the concept of conflict transformation in situations of ethnic conflict the book explores the different dimensions of transformation It draws on examples of strategies from a number of situations of ethnic conflict including Northern Ireland Israel Palestine Bosnia Kosovo Cyprus Spain Sri Lanka and the former Soviet Union to identify and assess key issues and problems that have emerged and ultimately to propose a stronger emphasis on the promotion of inter subjective understanding *Democracy and Security* , **Democratic Peace Across the Middle East** Yakub Halabi, 2016-05-24 From Tunisia to Egypt and from Israel to Iran the debates surrounding the concept of democracy in the Middle East are never straightforward This has been particularly evident since the events of 2009 in Iran and the uprisings across the Arab world in late 2010 and 2011 Against this backdrop Democratic Peace across the Middle East critically analyses the prospects for democracy throughout the region specifically asking whether political and social modernisation are absolute preconditions for democratic peace to take hold in the region or whether democracy without modernisation might be enough It explores the dynamics between neo patriarchy and Islam on the one hand and democratisation and modernisation on the other and also considers the prospect of the political accommodation of opposition groups Incorporating an analysis of a variety of key dynamics which affect each Middle Eastern country in turn such as tribal and sectarian identity Islamism and the structure of political party systems this book will appeal to those researching the Middle East and its patterns of rule **Power Concentration in World Politics** William R. Thompson, 2020-06-10 This book discusses the role of space time and cyclical behavior in world politics More specifically the political economic role of lead economies the world s most innovative economies for finite periods of time in world politics These represent unusual concentrations of new technologies energy sources and military capabilities of global reach that play disproportional roles in the conduct of international affairs and the provision of limited governance at the most macro level They also possess close links to economic growth and intense conflict The book describes the economic military and political processes behind the systemic leadership of a state at the international level It also highlights the economic preconditions of systemic leadership such as economic monopoly of new technologies and energy which underlie the system leader s material advantage over others Analyzing lead economies and the evolution of power over a number of centuries the author demonstrates how disruptions wrought by the emergence of new technologies and energy sources are partly responsible for global conflicts This book appeals to international relations scholars as well as anyone interested in the political economy of systemic leadership growth and conflict in world politics *Nuclear Asymmetry and Deterrence* Jan Ludvik, 2016-11-10 This book

offers a broader theory of nuclear deterrence and examines the way nuclear and conventional deterrence interact with non military factors in a series of historical case studies The existing body of literature largely leans toward the analytical primacy of nuclear deterrence and it is often implicitly assumed that nuclear weapons are so important that when they are present other factors need not be studied This book addresses this omission It develops a research framework that incorporates the military aspects of deterrence both nuclear and conventional together with various perceptual factors international circumstances domestic politics and norms This framework is then used to re examine five historical crises that brought two nuclear countries to the brink of war the hostile asymmetric nuclear relations between the United States and China in the early 1960s between the Soviet Union and China in the late 1960s between Israel and Iraq in 1977 1981 between the United States and North Korea in 1992 1994 and finally between the United States and the Soviet Union during the 1962 Cuban missile crisis The main empirical findings challenge the common expectation that the threat of nuclear retaliation represents the ultimate deterrent In fact it can be said with a high degree of confidence that it was rather the threat of conventional retaliation that acted as a major stabilizer This book will be of much interest to students of nuclear proliferation cold war studies deterrence theory security studies and IR in general

The Democratic Politics of Military Interventions Wolfgang Wagner, 2020-07-09 According to a widely shared notion foreign affairs are exempted from democratic politics i e party political divisions are overcome and should be overcome for the sake of a common national interest This book shows that this is not the case Examining votes in the US Congress and several European parliaments the book demonstrates that contestation over foreign affairs is barely different from contestation over domestic politics Analyses of a new collection of deployment votes of party manifestos and of expert survey data show that political parties differ systematically over foreign policy and military interventions in particular The left right divide is the best guide to the pattern of party political contestation support is weakest at the far left of the spectrum and increases as one moves along the left right axis to green social democratic liberal and conservative parties amongst parties of the far right support is again weaker than amongst parties of the centre An analysis of parliamentary debates in Canada Germany and the United Kingdom about the interventions in Afghanistan and against Daesh in Iraq and Syria shows that political parties also differ systematically in how they frame the use of force abroad For example parties on the right tend to frame their country's participation in the US led missions in terms of national security and national interests whereas parties on the left tend to engage in spiral model thinking i e they critically reflect on the unintended consequences of the use of force in fuelling the conflicts with the Taliban and Daesh

Regions, Power, and Conflict William R. Thompson, Thomas J. Volgy, Paul Bezerra, Jacob Cramer, Kelly Marie Gordell, Manjeet Pardesi, Karen Rasler, J. Patrick Rhamey Jr., Kentaro Sakuwa, Rachel Van Nostrand, Leila Zakhirova, 2022-08-16 The three main levels of analysis in international relations have been the systemic the national and the individual A fourth level that falls between the systemic and the national is the region It is woefully underdeveloped in

comparison to the attention afforded the other three Yet regions tend to be distinctive theaters for international politics Otherwise we would not recognize that Middle Eastern interstate politics somehow does not resemble Latin American interstate politics or interstate politics in Southern Africa although once the Middle East and Southern Africa may have seemed more similar in their mutual fixation with opposition to domestic policies in Israel and South Africa respectively This book divided into three parts first makes a case for studying regional politics even though it must also be appreciated that regional boundaries are also hazy and not always easy to pin down empirically The second part examines power distributions within regions as an important entry point to studying regional similarities and differences Two emphases are stressed One is that regional power assessments need to be conditioned by controlling for weak states which are more common in some regions than they are in others The other emphasis is on regional power hierarchies Some regions have strong regional hierarchies while others do not Regions with strong hierarchies operate much differently from those without them in the sense that the former are more pacific than the latter The third part of the book focuses on regional differences in terms of conflict behavior order preferences rivalries and rivalry termination

The Eastern Mediterranean in Transition

Spyridon N. Litsas, Aristotle Tziampiris, 2016-03-09 The wider region of the Eastern Mediterranean is in transition What is being evinced is a situation of continuous volatility centering on developments such as the Arab Spring the Greek sovereign debt crisis Islamic terrorism the continuation of deadlock over the Cypriot and Palestinian Issues significant energy finds in the Levantine Basin concerns over nuclear proliferation and more recently the Syrian Civil War At a systemic level the move towards a regional multipolar reality has also contributed to volatility by creating a crescendo of antagonisms between all the major international actors who continuously strive for more influence power and prestige This collective project by leading experts represents a unique combination of International Theory and International Politics analysis that deals exclusively with the wider Eastern Mediterranean It scrutinizes in a multidimensional manner the current geostrategic and geopolitical conditions that include the latest domestic socio political events as well as the active involvement of the Great Powers in the region This book should be of interest to academics decision makers and a general reading public focusing on a significant and influential region in flux

Democracy in

Turkey Ali Resul Usul, 2010-09-13 This book examines the impact of European political conditionality on the process of

democratization in Turkey over a twenty year period Employing theoretical and conceptual approaches to the issue of EU conditionality the author compares the case of Turkey to that of other European nations Arguing that Turkey became vulnerable to the European conditionality when it applied for membership in 1987 he shows how the political reforms demanded of Turkey were not fully carried out as the EU had not in essence accepted Turkey as an official candidate during this period The EU has started to exert real active leverage since Turkey was declared an official candidate in 1999 and the author explores how these conditions have exerted a positive influence on democratic consolidation in Turkey However its effectiveness in this regard has diminished to a significant extent due to a number of problems that have continued to remain central in EU Turkey relations This comprehensive analysis of Turkey EU political relations and democratization places the case of Turkey within an international context As such it will be of interest not only to those studying Turkish politics government and democracy but anyone working in the area of international relations and the EU

Evaluating Progress in International Relations Annette Freyberg-Inan, Ewan Harrison, Patrick James, 2016-10-04 This edited volume offers a systematic evaluation of how knowledge

is produced by scholarly research into International Relations The contributors explore three key questions To what extent is scientific progress and accumulation of knowledge possible What are the different accounts of how this process takes place And what are the dominant critiques of these understandings It is the first publication to survey the full range of perspectives available for evaluating scientific progress as well as dominant critiques of scientism In its second part the volume applies this range of perspectives to the research program on the democratic peace It shows what we gain by accommodating and enabling dialogue among the full range of epistemological approaches The contributors elaborate and defend the epistemological position of sociable pluralism as one that seeks to build bridges between soft positivism critical theory and critical realism The underlying idea is that if the differences between the various approaches used by different communities of researchers can be understood more clearly this will facilitate meaningful cross cutting communication dialogue and debate and thereby enable us to address real world problems more effectively This timely and original work will be of great interest to advanced level students and scholars dealing with philosophy of science and methodological questions in International Relations

History & Mathematics Leonid E. Grinin, Andrey V. Korotayev, Our Yearbook History and Mathematics has already celebrated its 10th anniversary and has confidently entered its second decade The common feature of all our Yearbooks including the present volume is the usage of formal methods and social studies methods in their synthesis to analyze different historical phenomena The present Yearbook which is the seventh in the series is subtitled Big History Aspects This issue is devoted to the problems of evolutionary development of the world In no way will it be a digression from the direction which we have initially defined for our Yearbook but just an extension of the scope of the research The matter is that there are two kinds of history the history of nature or more exactly the Universe and the Earth and the history of humans and mankind It is not surprising that the idea of historicism penetrated almost every scientific field At the same time the search for common foundations of this endless in its diversity world has intensified One of the directions of this interdisciplinary search for the unity of the world in its diversity is Universal Evolutionism Big History Mathematical and formal methods help to understand much deeply both natural and human history This issue of the Yearbook consists of four main sections I Patterns of Big History II Hypotheses of Deep Big History III Biological Aspects IV History and Future of Social Systems We hope that this issue will be interesting and useful both for historians and mathematicians as well as for all those dealing with various social and natural sciences
