History of Psychiatry and Medical Psychology Edwin R. Wallace,John Gach,2010-04-13 Most of the prefatory issues are extensively elaborated upon in the Prolegomenon which also contains the complete references to the texts and authors discussed below Nevertheless the Preface would be grossly incomplete without touching on some of these issues books and scholars Too many of this book s chapters e g Mora s Marx s D B Weiner s examine and reference important earlier as well as contemporary general histories of psychiatry and specialized monographs in German French Italian and Spanish Also in his 1968 Short History of Psychiatry d cussed below Ackerknecht pp xi xii references important nineteenth and earlier twentieth century psychiatric histories in English French and German Such citations will of course not be repeated here Finally thanks to several publishers re editions of dozens of classical psychiatric texts one can consult their bibliographies as well See Prolegomenon for references to these splendid series In a rough and ready sense medical history began in classical Greece for example On Ancient Medicine While traditionally included in the Hippocratic corpus this text seems more likely to have been written by a non or even anti Hippocratic doctor Moreover the Hippocratic and other schools were hardly as secular as we now suppose On Epilepsy for example does not so much declare the prevalent denotation of it as the sacred disease erroneous as it does that it is no more nor less sacred than any other disease *Positive Psychiatry* Edited by Dilip V. book Portrait of the Psychiatrist as a Young Man Allan Beveridge, 2011-08-25 RD Laing remains one of the most famous psychiatrists of the last 50 years. In the 1960s he enjoyed enormous popularity and received much publicity for his controversial views challenging the psychiatric orthodoxy. He championed the rights of the patient and challenged the often inhumane methods of treating the mentally ill. Based on a wealth of previously unexamined archives relating to his private papers and clinical notes, *Portrait of the Psychiatrist as a Young Man* sheds new light on RD Laing and in particular his early formative years, a crucial but largely overlooked period in his life. The first half of the book considers Laing's intellectual journey through the world of ideas and his development as a psychiatric theorist. An analysis of his notebooks and personal library reveals Laing's engagement not only with psychiatric theory but also with a wide range of other disciplines such as philosophy, literature, and religion. This part of the book considers how this shaped Laing's writing about madness and his evolution as a clinician. The second half draws on a rich and completely unexplored collection of Laing's clinical notes which detail his encounters with patients in his early years as a psychiatrist, firstly in the British Army, subsequently in the psychiatric hospitals of Glasgow, and finally in the Tavistock Clinic in London. These notes reveal what Laing was actually doing in clinical practice and how theory interacted with therapy. The majority of patients who were to appear in Laing's first two books, *The Divided Self* and *The Self and Others*, have been identified from these records, and this volume provides a fascinating account of how the published case histories compare to the original notes. There is a considerable mythology surrounding Laing, partly created by himself and partly by subsequent commentators. By a careful examination of primary sources, Allan Beveridge, both a psychiatrist and an historian, examines the many mythological narratives about Laing and provides a critical but not unsympathetic account of this colourful and contradictory thinker who addressed questions about the nature of madness which are still being asked today. This book will be of interest to mental health workers and social historians alike, as well as anybody interested in the philosophy of psychiatry. *Pieces of the Puzzle, Volume 2 - Our Reality* Trinda Latherow, 2005. A gripping account of an alien abduction and its connections to the breakdown of American society in the 1960s. Excellent and exhaustive. Colin Dickey, Slate. In the mid 1960s, Betty and Barney Hill became famous as the first Americans to claim that aliens had taken them aboard a spacecraft against their will. Their story involving a lonely highway late at night, lost memories, and medical

examinations by small gray creatures with large eyes has become the template for nearly every encounter with aliens in American popular culture since Historian Matthew Bowman examines the Hills story not only as a foundational piece of UFO folklore but also as a microcosm of 1960s America The Hills an interracial couple who lived in New Hampshire were civil rights activists supporters of liberal politics and Unitarians But when their story of abduction was repeatedly ignored or discounted by authorities they lost faith in the scientific establishment the American government and the success of the civil rights movement Bowman tells the fascinating story of the Hills as an account of the shifting winds in American politics and culture in the second half of the twentieth century He exposes the promise and fallout of the idealistic reforms of the 1960s and how the myth of political consensus has given way to the cynicism and conspiratorialism and the paranoia and illusion of American life today
