perspective that examines identities as lived and as performed the book follows the circulation of discourses about the nation and belonging and contrasts the articulation of identities at a local level with the discourses about the nation in the national television channels The book asks whether and in what ways does television influence identity discourses and practices When do people contest the official discourses about the nation and when do they rely on them Do the media play a role in relation to inclusion and exclusion from public life particularly in the case of minorities The book presents a compelling account of the contradictory and ambivalent nature of national and transnational identities while developing a nuanced approach to media power It is argued that although the media do not shape identities in a causal way they do contribute in creating common communicative spaces which often catalyse feelings of belonging or exclusion The book claims a place in the emerging sub field of media anthropology and represents the new generation of audience research that places media consumption in the wider social economic and political context
