Art and Art-Attempts Christy Mag Uidhir, 2013-06-27 Although few philosophers agree about what it is for something to be art most if not all agree on one thing art must be in some sense intention dependent Art and Art Attempts is about what follows from taking intention dependence seriously as a substantive necessary condition for something s being art Christy Mag Uidhir argues that from the assumption that art must be the product of intentional action along with basic action theoretic account of attempts goal oriented intention directed activity follows a host of sweeping implications for philosophical enquiry into the nature of art and its principal relata such as authorship art forms and art ontology e g An informative distinction between art non art and failed art that any viable theory of art must capture A far more productive minimal framework for authorship not only capable of systematically addressing issues of collective authorship appropriation etc but also one according to which artists just are authors A coherent and structurally precise account of art forms based upon the relation between artists artworks and the sortal properties thereof A unified and far less metaphysically suspect ontology of art according to which if there are such things as artworks then artworks must be concrete things Ultimately Mag Uidhir aims neither to propose nor to defend any particular precise answer to the question What is art Instead he shows the ways in which taking intention dependence seriously as a substantive necessary condition for being art can be profoundly revelatory and perhaps even radically revisionary as to the scope and limits of what any particular precise answer to such a question could viably be

The Forbidden Body Douglas E. Cowan,2022-05-17 Throughout history the religious imagination has attempted to control nothing so much as our bodies what they are and what they mean what we do with them with whom and under what circumstances how they may be displayed or more commonly how they must be hidden Religious belief and mandate affect how our bodies are used in ritual practice as well as how we use them to identify and marginalize threatening religious Others This book examines how horror culture treats religious bodies that have stepped or been pushed out of their proper place Unlike most books on religion and horror This book explores the dark spaces where sex sexual representation and the sexual body come together with religious belief and scary stories Because these intersections of sex horror and the religious imagination force us to question the nature of consensus reality supernatural horror especially as it concerns the body often shows us the religious imagination at work in real time It is important to note that the discussion in this book is not limited either to horror cinema or to popular fiction but considers a wide range of material including literary horror weird fiction graphic storytelling visual arts participative culture and aspects of real world religious fear It is less concerned with horror as a genre which is mainly a function of marketing and more with the horror mode a way of storytelling that finds expression across a number of genres a variety of media and even blurs the boundary between fiction and non fiction This expanded focus not only deepens the pool of potential examples but invites a much broader readership in for a swim The Movie
