*Economic Development in the Gulf Cooperation Council Countries* H  la Miniaoui,2020-10-26 This book delves into the economic development of the six Gulf Cooperation Council GCC countries Since the 1960s the GCC states have harnessed their potential to exploit the wealth accrued from the oil boom to build their infrastructure and grow their economies However the high level of dependency on oil as the primary source feeding their output made their economies volatile and vulnerable to fluctuations in the global oil prices Moreover the plunge in oil prices and the threat of depletion of this natural resource pose serious challenges to the GCC countries Consequently the GCC governments have realized the importance of diversifying their economies following the need to move away from reliance on hydrocarbon This book contributes to the theoretical literature by enriching the debate on the transition of the GCC countries from rentier states to diversified economies It helps students and scholars understand this transformation with an expansive comprehension of the contemporary challenges facing the region as well as outlining prospects for the future

**Natural Gas Flaring & Energy Transition** Eduardo G. Pereira,Magnus C. Abraham-Dukuma,Opeyemi Y. Omotuyi,2025-04-23 In the context of climate change it is generally agreed that natural gas has manifest advantages as a transition fuel that offers a potential bridge from overuse of coal and petroleum to a renewable low carbon future However the widespread ongoing practice of natural gas flaring the burning of unwanted gas for economic reasons is severely criticized for hampering progress in its flagrant waste of both valuable resources and revenues This important book covers natural gas flaring policies across twenty leading oil and gas jurisdictions from a global perspective providing the energy transition and environmental policy communities with detailed information on current developments in market regulations contractual arrangements and technological responses and clarifying ways to tackle natural gas flaring in the context of meeting climate change goals In the multifaceted approach provided by the book s contributors experts from a broad cross section of gas producing countries the book engages with such issues and topics as the following the technical aspects behind natural gas flaring alternative solutions to mitigating natural gas flaring via carbon capture utilization and storage energy security imperatives legal frameworks governing natural gas flaring with case studies from key twenty leading oil and gas jurisdictions best practices and potential solutions that can be adapted to different contexts environmental social and governance ESG considerations potential disputes arising from changing regulations and market conditions and recommendations for design application and implementation of natural gas development and marketing Bringing together legal policy and regulatory perspectives from natural gas hubs this work fills a significant gap in the existing literature with a rigorous exposition and comparative analysis of the business legal economic

and sustainability aspects of natural gas flaring and its role in the energy transition across global energy markets It will prove to be of immeasurable value to policymakers industry stakeholders regulators concerned nongovernmental organizations and legal practitioners in sustainable development and international relations It is sure to contribute to informed decision making and ultimately to more sustainable and equitable energy systems worldwide *Energy Abstracts for Policy Analysis* ,1986 Energy Relations and Policy Making in Asia Leo Lester,2016-10-31 This volume goes beyond a conventional analysis of Asia's energy relationships and explores the premise that energy relations in Asia in the 21st century should reinforce mutual interdependence Conventional analyses of international energy relations stress the asymmetric nature of the risks and costs of disruptions to energy flows Energy suppliers net exporters are concerned with the cost of a buyer looking elsewhere energy consumers net importers are preoccupied with the costs associated with an interruption of supply This perspective reflects the current transactional nature of energy relations and is clearly observed in the energy dynamics between countries in the Gulf Cooperation Council GCC and the economies of Northeast Asia NEA As the economies of both the GCC and NEA have enlarged there is under recognized potential for a move away from narrow transactional relations to broader interdependent ones This collection of essays from leading energy strategic and economic policy think tanks focused on how energy relations are forming in the 21st century offers energy scholars and policy makers answers to what these increasingly close relationships mean for international politics and trade International Energy Outlook ,2005 Economic Development in the Middle East Rodney Wilson,2013 By examining economic development in the Middle East in the aftermath of the Arab Spring this textbook introduces undergraduate and postgraduate students to the most pressing and topical economic issues in the contemporary Middle East With comprehensive coverage of the entire region the author examines the economic prospects for the Gulf and charts the growth of economic power in the region Organised thematically a full range of topics are discussed including the role of banks and capital markets in the region's development the impact of demographic changes such as the dramatic decline in birth rates and the implications for future employment the development of economic advances in oil and gas production the effects of the region's economic development on international and inter regional trade Through discussing the region's problems of the past as well as the present and future challenges this book provides students with a compact and manageable review of the state of economic development in the Middle East The Report: Qatar 2020 Oliver Cornock, Qatar has demonstrated considerable resilience in recent years successfully developing new homegrown industries while at the same time strengthening its global ties Although Covid 19 has introduced significant economic uncertainties in 2020 a rapid response from Qatar's authorities to curb the effects of the virus should stand the nation's economy in good stead over the medium and long term **Local Content and Sustainable Development in Global Energy Markets** Damilola S. Olawuyi,2021-03-04 Examines critical links between local content requirements and the application of sustainable development treaties in global energy markets

*The Green Economy in the Gulf* Mohamed Abdel Raouf, Mari Luomi, 2015-07-30 Filling a void in academic and policy relevant literature on the topic of the green economy in the Arabian Gulf this edited volume provides a multidisciplinary analysis of the key themes and challenges relating to the green economy in the region including in the energy and water sectors and the urban environment as well as with respect to cross cutting issues such as labour intellectual property and South South cooperation Over the course of the book academics and practitioners from various fields demonstrate why transitioning into a green economy a future economy based on environmental sustainability social equity and improved well being is not an option but a necessity for the Gulf Cooperation Council GCC States Through chapters covering key economic sectors and cross cutting issues the book examines the GCC states quest to align their economies and economic development with the imperatives of environmental sustainability and social welfare and proposes a way forward based on lessons learned from experiences in the region and beyond This volume will be of great relevance to scholars and policy makers with an interest in environmental economics and policy

**The Report: Qatar 2024** Oliver Cornock, Qatar has been working to position itself as a powerful economy and influential sovereign entity that is well prepared to address future challenges With a relatively small population and the third largest proven natural gas reserves in the world it is looking to attract greater foreign direct investment and support the private sector as it diversifies away from a reliance on hydrocarbons
